Board of Directors Regular Meeting December 7, 2015

5:30 pm Executive Session; 7:00 pm Regular Meeting HMT Recreation Complex, Peg Ogilbee Dryland Meeting Room 15707 SW Walker Road, Beaverton

<u>AGENDA</u>

- 1. Executive Session*
 - A. Land
 - B. Personnel
- 2. Call Regular Meeting to Order
- 3. Action Resulting from Executive Session
- 4. Presentation: Parks Bond Citizen Oversight Committee Annual Report
- 5. <u>Public Hearing: Approve Findings Supporting Brand Name Exemption for the HMT Aquatic Center Roof Project</u>
 - A. Open Hearing
 - B. Staff Report
 - C. Public Comment**
 - D. Board Discussion
 - E. Close Hearing
 - F. Board Action
- 6. Audience Time**
- 7. Board Time
- 8. Consent Agenda***
 - A. Approve: Minutes of November 2, 2015 Regular Board Meeting
 - B. Approve: Monthly Bills
 - C. Approve: Monthly Financial Statement
 - D. Award: Harman Swim Center Renovation Construction Contract
 - E. Approve: Resolution Appointing Audit Committee Member
 - F. <u>Approve: Resolution Authorizing Application for the 2016 Veterans and War Memorials</u> Grant Program for Relocation of Vietnam War Memorial
- 9. Unfinished Business
 - A. Approve: Trails Functional Plan
 - B. Information: General Manager's Report
- 10. New Business
 - A. Approve: Resolution Appointing Advisory Committee Members
 - B. Approve: Resolution Naming Recently Acquired Park Property
- 11. Adjourn

*Executive Session: Executive Sessions are permitted under the authority of ORS 192.660. Copies of the statute are available at the offices of Tualatin Hills Park & Recreation District. **Public Comment/Audience Time: If you wish to be heard on an item not on the agenda, or a Consent Agenda item, you may be heard under Audience Time with a 3-minute time limit. If you wish to speak on an agenda item, also with a 3-minute time limit, please wait until it is before the Board. Note: Agenda items may not be considered in the order listed. ***Consent Agenda: If you wish to speak on an agenda item on the Consent Agenda, you may be heard under Audience Time. Consent Agenda items will be approved without discussion unless there is a request to discuss a particular Consent Agenda item. The issue separately discussed will be voted on separately. In compliance with the Americans with Disabilities Act (ADA), this material, in an alternate format, or special accommodations for the meeting, will be made available by calling 503-645-6433 at least 48 hours prior to the meeting.

MEMO

DATE: November 30, 2015 **TO:** Board of Directors

FROM: Doug Menke, General Manager

RE: Information Regarding the December 7, 2015 Board of Directors Meeting

Agenda Item #4 - Parks Bond Citizen Oversight Committee Annual Report

Attached please find a memo reporting that Parks Bond Citizen Oversight Committee members Wink Brooks and Steve Pearson will be at your meeting to present the committee's sixth annual report.

<u>Agenda Item #5 – Public Hearing: Approve Findings Supporting Brand Name Exemption for Aquatic Center Roof Project</u>

Attached please find a memo requesting that the board of directors conduct a public hearing regarding district staff's request for a brand name exemption for the HMT Aquatic Center project's roofing material. Keith Hobson, director of Business & Facilities, will be at your meeting to provide an overview of the information and to answer any guestions the board may have.

Action Requested: Board of directors' approval of the selected roofing

manufacturer to be the only specified roofing for the HMT

Aquatic Center project's roof material.

Agenda Item #8 - Consent Agenda

Attached please find consent agenda items #8A-F for your review and approval.

Action Requested: Approve Consent Agenda Items #8A-F as submitted:

- A. Approve: Minutes of November 2, 2015 Regular Meeting
- B. Approve: Monthly Bills
- C. Approve: Monthly Financial Statement
- D. Award: Harman Swim Center Renovation Construction Contract
- E. Approve: Resolution Appointing Audit Committee Member
- F. Approve: Resolution Authorizing Application for the 2016

 Veterans and War Memorials Grant Program for Relocation
 of Vietnam War Memorial

Agenda Item #9 - Unfinished Business

A. <u>Trails Functional Plan</u>

Attached please find a memo and final draft Trails Functional Plan for the board's consideration of adoption. Keith Hobson, director of Business & Facilities, and Steve Gulgren, superintendent of Design & Development, will be at your meeting to provide an overview of the plan and to answer any questions the board may have.

Action Requested: Board of directors' approval of the Trails Functional Plan.

Administration Office • 15707 SW Walker Road, Beaverton, OR 97006 • 503/645-6433 • www.thprd.org

B. General Manager's Report

Attached please find the General Manager's Report for the December regular board meeting.

Agenda Item #10 - New Business

A. Resolution Appointing Advisory Committee Members

Attached please find a memo requesting board of director's appointment of 27 advisory committee members to three new committees, as well as board discussion and consensus of which board members are to serve as liaisons to the new advisory committees. Aisha Panas, director of Park & Recreation Services, and Bruce Barbarasch, superintendent of Natural Resources & Trails Management, will be at your meeting to provide an overview of the memo and to answer any questions the board may have.

Action Requested: Board of directors' approval of Resolution 2015-19, appointing advisory committee members.

B. Resolution Naming Recently Acquired Park Property

Attached please find a memo regarding proposed names for three recently acquired park properties: a neighborhood park in South Beaverton, and a neighborhood park and a natural area in the Cedar Mill area. Keith Hobson, director of Business & Facilities, and Steve Gulgren, superintendent of Design & Development, will be at your meeting to provide an overview of the proposal and to answer any questions the board may have.

Action Requested: Board of directors' approval of Resolution 2015-20, naming recently acquired park properties as Steeplechase Park, Timberland Park, and Cedar Mill Creek Greenway.

Other Packet Enclosures

- Management Report to the Board
- Monthly Capital Report
- Monthly Bond Capital Report
- System Development Charge Report
- Newspaper Articles

MEMO

DATE: November 30, 2015 **TO:** The Board of Directors

FROM: Doug Menke, General Manager

RE: Parks Bond Citizen Oversight Committee Annual Report

The Parks Bond Citizen Oversight Committee has compiled their sixth annual report (attached). Oversight committee members Steve Pearson and Wink Brooks will be at the December 7, 2015 Regular Board meeting to present the report to the board of directors and answer any questions they may have.

Action Requested

No board of directors action requested. Informational report only.

Tualatin Hills Park and Recreation District

Citizen Bond Oversight Committee

Tualatin Hills Park and Recreation District (THPRD) is the largest special park district in Oregon. It spans approximately 50 square miles and serves more than 230,000 residents in northeastern Washington County. In 2008 THPRD developed a \$100,000,000 bond measure (Measure 34-56 "Bonds to Preserve Natural Areas, Water, Improve Parks, Create Trails") to fund an extensive program of land acquisitions for parks, trails and natural areas, natural area restoration and preservation, park development, construction and rehabilitation of various facilities and other projects. District voters approved this in 2008. The Bond Measure included provisions for a citizen oversight committee and also required yearly financial audits by an independent auditor. The Citizens' Committee was directed to report annually to the Board and the public regarding conformance with stated Bond Measure objectives and to make recommendations, if any, for improving the Bond Program efficiency, administration or performance.

The initial decisions and guidelines for this process, with details of planning, financings, land acquisition and project completions through June 30, 2015, were described in the Committee's first five reports, delivered to the Board in November 2010, December 2011, and November 2012, 2013, and 2014. These earlier reports, prior to July, 2014, are available on the THPRD website at www.thprd.org under the 2008 Bond Measure/Citizen Oversight Committee tab.

Fiscal Year 2015 Overview

The bond program has now reached a relatively advanced phase. Many projects have been substantially completed and a majority of the bond proceeds have been spent or committed. This report will deal primarily with activities in the 2014-2015 fiscal year and other recent and proposed activities.

During the 2014-2015 fiscal year THPRD spent over \$5.8 million of its bond funds for a cumulative expenditure of \$73.4 million to June 30, 2015. The District acquired an additional 12.1 acres of land, and completed 27 construction projects. Many acquisitions and projects have been completed, and many more are approaching completion or are scheduled for near-term completion. THPRD has made substantive and appropriate progress in all areas of the Bond Program.

The year to year process of the Bond program shows in the following table. Money spent for construction and acquisitions ramped up slowly for the first two years (only \$465,172 was spent in FY 2009), and then increased considerably over the last six years. Some dollar values are slightly different from last year's report due to minor adjustments after the reports were published. A concern does exist regarding the projected \$2.9 million deficit projected at the end of June, 2015 (see Looking Forward section).

The steady progress of the program is shown in the following table.

THPRD Bond Program-Cumulative Snapshot of Activity

Financial and Project Summary Comments

For Fiscal Years 2009-2015, the primary reasons for the changes in the Adjusted Bond Program Allocation column are (1) Interest earned on unspent bond funds; (2) Additional Bond Proceeds; (3) Project Grouping Adjustments to the Parks and Youth Athletic Fields expenditure categories to move projects forward in tandem; (4) combining some funds from the Facility Rehabilitation category into the Facility Expansion and Improvement category for related work in the Elsie Stuhr Center project; (5) Project Management Adjustments; and (6) Funding Category Transfers.

Thru June 30, 2015 additional Bond Proceeds of \$1,464,347 and \$1,807,684 of earned interest on invested Bond Funds has increased the Original Bond Program amount from \$100,000,000 to its Adjusted Bond Program amount of \$103,446,911. The other adjustments indicated above are net zero.

Two items on THPRD's management of Bond Proceeds needs to be mentioned. The original \$100,000,000 was achieved by issuing \$98,565,000 in bonds that provided an additional \$1,435,000 thru premiums. The District subsequently issued the remaining authority and that plus a small additional premium totals the \$1,467,347 as additional bond proceeds. Also, thru Advance Refunding they were able to shorten the retirement of the bond issue by two years, resulting in a net present savings value of almost \$3,000,000 in interest costs, while maintaining a stable levy rate of 0.34 cents per thousand to the taxpayers. These provide additional funds as well as less overall interest expense to citizens.

Over \$2.3 million in outside funds have been secured to leverage the Bond Program's own funds on various projects. These additional funds are not included in the Financial Summary Table.

Land Acquisitions 2014-15

Land acquisitions have been evenly distributed throughout the territory of the Tualatin Hills Park & Recreation District (THPRD) this past year. The tables included in this report identify the actual purchases for the Fiscal Year 2014-15. The map shows each of the purchases for this past year and also includes existing THPRD parks and facilities throughout the district.

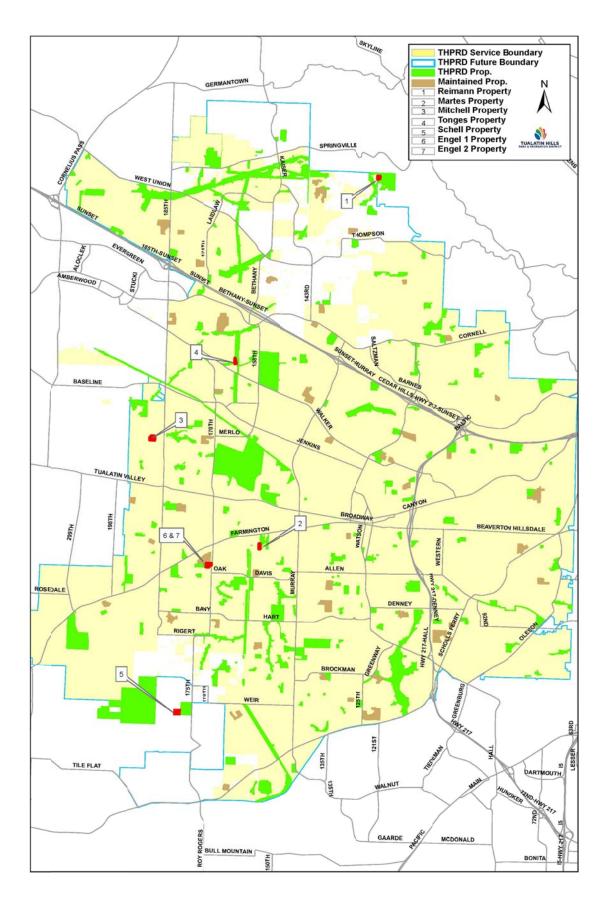

The tables in this report identify the purchases and actual spending in each acquisition category. Cost accounting for park, corridor, natural area and community center land acquisition includes the following costs: land acquisition specialists, property purchase price, appraisers and appraisal review, environmental review, title and other closing costs, as well as removal of debris and existing structures or hazards. Some of these additional costs have not been fully allocated to specific acquisitions and are reported in general terms in the table below.

Properties acquired for new parks, trails and natural areas will not necessarily be developed from Bond proceeds. Timing and funding for completion and development of these properties will be determined by the THPRD Board of Directors in the future pending funding availability and staff recommendations. Bond proceeds are intended to provide for development of some, but not all, of the land acquired for trails and linear parks, and are intended to provide for restoration of many of the sites acquired as natural areas.

In addition to Bond proceeds funding land acquisitions, other sources have contributed to the full costs of acquiring some of these lands that were purchased. These sources include Metro Nature in the Neighborhood Grants, System Development Charges (SDCs), City of Beaverton funding, and private donations.

As the local economy has continued to rebound and improve, costs for acquiring land has continued to rise significantly. This has been a major concern for the THPRD Board of Directors and the Parks Bond Citizen Oversight Committee. The Committee is encouraging accelerated purchases in the Natural Area category to ensure meeting citizen support for habitat and natural area acquisitions.

Work In Progress

Community and Neighborhood Parks & Youth Athletic Fields

The THPRD standard for a neighborhood park is about three acres. The target for community parks is between 10 and 25 acres. Park amenities depend on the size of the site, but community parks usually offer larger facilities such as sports fields, sheltered group picnic areas, on-site parking and restrooms.

Funds allocated for four Youth Athletic Fields, two Synthetic Turf fields and an Outdoor Splash Pad have been combined for efficiency with funds allocated to Community and Neighborhood Parks. The original commitment of 10 athletic fields and two synthetic turf fields and splash pad will be monitored and confirmed in future reports.

As of June 30, 2015 the current budget for the 26 Parks, Athletic Fields and Splash Pad is \$30,608,300. Actual and estimated future expenditures total \$36,545,500 resulting in a projected deficit of \$5,927,200. Sixteen of the 26 parks, fields and splash pad have been completed. Additional comments on how the deficit will be managed in order to stay within available bond funds are found in the Administrative section of this report.

Natural Area Restoration Projects

The current total project budget for this category is \$3.8 million of which 29 percent has been spent to date. Much of the natural area restoration takes place in conjunction with other park projects, with approximately 20 percent of target funds being set aside for restoration work on newly acquired natural areas. Currently, THPRD expects this area to be \$865,000 under budget due primarily to partnering with other agencies. Current plans are that the surplus will be dedicated to other projects within the category, including water quality upgrades at selected parks.

Most of the natural area restoration funds are to be used for removal of various invasive non-native weeds and replanting with native plants. Results of this work generally take multiple applications and may be scheduled over 5 years. Because some of the projects will be associated with new natural areas not yet procured, this area of expenditure will likely take longer than others in the Bond program.

Work proceeded on 17 restoration projects in 2014-2015, 10 of which included significant installation of native plants during the year. Funds during 2014-2015 were expended on the Interpretive Signage project which encompassed constructing and installing art work designed to show "changes over time" which is being used to encourage people to come back repeatedly to see what is new. Invasive plant removal, replanting native trees and shrubs, and enhancing trails at Koll Center Wetlands, Lowami Hart Woods and other sites was also accomplished.

Projects will continue in 2015-2016 to replace non-native with native plants, complete the Interpretive Signage/Art work projects, and plan and begin work for new natural area restoration.

New Linear Park and Trail Development

The New Linear Park and Trail Development project category is substantially complete. Progress is shown in the following table.

Linear Park and Trail Status:

| Trail/Park Name | Construction Status | Comment | | |
|-----------------------------------|-------------------------------|---------------------------------|--|--|
| Westside Trail Segments 1, 4, & 7 | Completed Fall 2013 | None | | |
| Jordan/Husen Park Trail | Completed Winter 2013 | None | | |
| Waterhouse Trail Segments 1, 5 | Completed Fall 2014 | None | | |
| and West Spur | | | | |
| Rock Creek Trail Segments 2 & 5, | Rock Creek Trail Segments 2 & | Work on North Bethany | | |
| North Bethany Segment 2 | 5 Completed Winter 2013 | Segment 2 is currently | | |
| , - | · | suspended pending further | | |
| | | design and funding options. | | |
| Miscellaneous Natural Trails | Whispering Woods, Hyland | No other projects are currently | | |
| | Woods Park, Bauman Woods | contemplated. | | |
| | and Jenkins Estate Trails | | | |
| | Completed. Mt. Williams Trail | | | |

| | | | | |
| Nature Park – Old Wagon Trail | Completed Fall 2010 | None | | |
| NE Quadrant Trail – Bluffs Park | Completed Winter 2013 | None | | |
| (Phase 2) | | | | |
| Lowami Hart Woods | Completed Winter 2014 | None | | |
| Westside/WaterhouseTrail | Scheduled for Completion Fall | Project schedule delayed due to | | |
| Connection | 2016 | right-of-way acquisition and | | |
| | | jurisdictional design | | |
| | | requirements. | | |

The current budget for the Linear Parks and Trails Bond Program improvement category is \$15,459,311. Funds expended in this category as of June 30, 2015 total \$14,071,345 with an estimated \$1,494,670 needed to complete identified projects that have not been suspended, leaving a small projected bond category deficit of \$106,704. Factors contributing to greater than expected costs include contractual and jurisdictional requirements, permit issues, and unanticipated neighborhood requests. There remains a possibility that the remaining work may be completed with some savings that may mitigate the existing projected deficit in this category.

Deferred Maintenance and Replacements

The 18 projects in this category included replacements of play structures, irrigation systems, pedestrian paths, bridges and boardwalks at the Waterhouse Linear Park, Pioneer and Tualatin Hills Nature Parks, Willow Creek and the Jenkins Estate. Permeable parking lots were also completed at Sunset and Aloha

Swim Centers. All of the \$1,832,000 budgeted for this work has been spent, and all scheduled projects have been completed.

Facility Rehabilitation, Expansions and Replacements

Facility Rehabilitation

Sixteen projects addressing safety and seismic protection, problems with air circulation tunnels at swim centers and general rehabilitation needs were selected using an engineering analysis. Work was completed at Sunset, Aloha and Beaverton Swim Centers, Howard M. Terpenning (HMT) Athletic Center and Cedar Hills Recreation Center. \$6,333,000 was budgeted for this work and \$3,427,200 was expended through June 30, 2015. Three projects remain with an estimated cost of \$1,274,200 leaving a projected balance of \$1,642,600 in this category.

Facility Expansion and Improvements

Expansions of the Elsie Stuhr Center, Howard M. Terpenning Athletic Center and Conestoga Recreation and Aquatic Center (which included a splash pond) were completed as were dressing rooms at the Aloha Swim and HMT Aquatic Centers. The adjusted budget of \$8,157,000 for this category was spent.

ADA Access Improvements

Access and opportunity for disabled people has been facilitated throughout the THPRD. Family-accessible dressing rooms and accessible parking and drop-off zones were constructed and/or modified in 13 projects. This work was completed at Bethany Lake, Lawndale, Lost and Waterhouse Linear Parks, Aloha Swim Center, and the Howard M. Terpenning Recreation Complex.

Financial and project progress data for this section is shown in Table 2. There is a surplus of approximately \$1,643,000 in this category. The THPRD Board is considering applying this surplus to a projected shortfall in the Parks and Youth Athletic Fields category, as discussed in the Looking Forward section.

Project Management, Bond Issuance Costs, Accounting

THPRD's goal for this category is 3 percent of the \$100,000,000 Bond Measure. As of June 30, 2015 actual expenditures were \$2,348,549 or 2.27 per cent of the Total Program Allocation. Of this amount, \$1,894,622 were Project Management costs and \$453,927 were related to Bond Issuance and Accounting costs.

Project Management costs are composed of Planning and Natural Resources staff time spent on each project (other than Land Purchases) as well as temporary personnel hired for the duration of bond funding.

These costs have been allocated by the District to each individual project budget based on the proportion of each project's cost to the overall budget.

Funding Category Transfers

Transferring funds between categories as needed ensures that all objectives of the bond measure are met. This policy was discussed in the Committee's 2013 report. In general, funds are only transferred from a category when it has been determined that all objectives and projects have been or are going to be met. Such transfers must be approved by THPRD's Board.

Thru June 30, 2015 the following have been approved:

- \$224,636 to New Neighborhood Park Development from Bond Issuance & Project Mgmt.
- \$1,655,521 to New Neighborhood Park Land Acquisition from New Community Park Land Acquisition.
- \$798,654 to New Neighborhood Park Land Acquisition from Community Park Land Acquisition.
- \$384,251 to New Community Park Development from Community Center Land Acquisition.
- \$177,920 to Deferred Park Maintenance Replacements from Facility Expansion and Improvements.
- \$192,412 to Deferred Park Maintenance Replacements from Bond Issuance and Project Management.
- \$204,210 to ADA/Access Improvements from Bond Issuance and Project Management.

Looking Ahead

THPRD has met many of the goals of the 2008 Bond Program. Many categories are nearing full completion. The Committee's charge is to make sure programs and projects are completed as intended, consequently the Committee's primary focus continues to be on projects not yet completed and on areas the Committee feels need additional work.

The Committee is currently concerned about three particular areas.

First, the natural area acquisition progress seems slow with only 52 percent of the budgeted dollars expended through June 30, 2015. THPRD initially emphasized acquisitions for other categories, but this category maintains the largest ratio of unspent funds. THPRD is committed to full completion in this area, but there is substantial funding yet to be spent in this important category. The Committee recommends the Board consider hiring a dedicated person to accelerate the acquisition of natural areas.

Second, Natural area restoration can take up to 5 years to remove invasive plants, and plant and replant native plants. This cannot begin on newly acquired properties until they are purchased, placing completion of restoration many years out. The Committee recommends setting up a dedicated fund to assure adequate completion of this area of work after the Bond Program has ended.

Third, the committee was concerned in early 2015 when it received the December 31, 2014 financial reports which reflected a Bond Program deficit of \$2,960,000, the amount needed to complete the Program using current cost estimates. Accelerating construction costs are partially to blame with a 20-25% increase over previous levels. The remaining projects affected by these cost increases are Somerset West Park which added scope because of public input; Cedar Hills Community Park which has design, traffic, and partner coordination issues still to be worked out; and, South West Quadrant Community Park which went from a 10 acre park to a 21 acre park, significantly increasing its scope and cost. The Committee accepts that THPRD has made sensible planning decisions regarding the development of these three parks, as well as other complex projects during the duration of the Bond Program. However, the work over the last year has resulted in estimated cost increases and the Bond Oversight Committee is concerned about the effect of these increases on the District's ability to meet the Bond Program's original goals. While the large change in the new Southwest Community Park was not identified until the February 2015 meeting, significant changes to the other two were identified in the June 2014 financials and at the October 2015 meeting.

The Committee believes that its role is to support all original bond promised improvements and objectives being completed as promised. Some Bond Program funding categories have generated surpluses, while funding deficits appear in other categories, as shown in the financial and project summary tables contained in this report. The District, after staff discussions with the Committee and subsequent Board action, has begun to re-allocate the surpluses to address deficits. The intent is to adjust funding in order to remain consistent with the commitments made by THPRD to the voters in the

original 2008 bond measure. The Committee will continue to monitor this aspect of the Bond Program and report results.

It is likely that costs will not decrease as the economy continues to improve. Since the District cannot overspend its Bond Funds it will be faced with significant challenges in meeting the scope of the remaining projects without eliminating some bid items or obtaining additional funds from the System Development Charge Fund, the City of Beaverton, partner agencies, grants or donations. At this stage in the Bond Program, the Committee may have to meet more frequently to review the final funding allocations for the remaining projects and/or request the staff provide to the Committee revised phasing, design, cost, and funding sources for the three remaining projects. It is the intent of the Committee to closely monitor costs as the Bond Program comes to a close. The Committee looks forward to working with the District over the next two or three years to assure that the Bond Program promises are met.

MEMO

DATE: November 25, 2015

TO: Doug Menke, General Manager

FROM: Keith Hobson, Director of Business & Facilities

RE: Approve Findings Supporting Brand Name Exemption for the HMT Aquatic

Center Roof Project

Introduction

Staff request board of directors' approval of a brand name exemption for the HMT Aquatic Center project's roofing material, in accordance with the State of Oregon exemption process pursuant to ORS 279C.345.

Background

The board of directors approved a competitive procurement process to determine a brand name exemption for the HMT Aquatic Center project's roof material at the October 7 board meeting. Staff advertised a Request for Quotes (RFQ) on November 2 which was due November 17. Five submittals were received and three were determined to be responsive to the RFQ criteria. Staff reviewed the proposals for submittal protocol and the architect of record reviewed the proposals for roofing content. The Garland Company's R-mer Span structural panel was determined to be the optimal product for this project. The following are assessments based on criteria that support the selection of this product. Many of these assessments were completed by Opsis Architecture and are documented in their memo dated November 24, 2015 (attached).

- 1. Roof Panel: Garland provides the only vented standing seam system with vents at the ridge and eave which is very important on a high moisture building such as the Aquatic Center. The panels are symmetrical so single panels can be removed without damaging adjacent panels. The roofing system meets all weather testing requirements.
- 2. Service: Garland provides project specific engineering, detailing, weekly inspections, progress reporting, coordination with contractor and project close out as a basic service.
- 3. Warranty: Garland will issue a 30-year no dollar limit warranty.
- 4. Manufacturer's History and Financial Stability: Garland has a historical track record of successful large scale standing seam roof installations.
- 5. Cost: Garland provided the best life-cycle cost analysis out the three submittals received.

Proposal Request

Staff are requesting that the board of directors approve the selected manufacturer. Per ORS 279C.345 the selection has to meet one of four criteria. Staff believe it meets ORS 279C.345(2)(a), which states: "It is unlikely that the exemption will encourage favoritism in the awarding of the public improvement contracts or substantially diminish competition for public improvement contracts."

Findings in support of granting an exemption pursuant to ORS 279C.345(2)(a) include:

- 1. Staff advertised the public notice of the brand name exemption process September 30.
- 2. Staff advertised an RFQ for roofing materials on November 2.
- 3. Architects recommended selection was based solely on selecting the best roof for THPRD needs considering quality, warranty, life cycle cost and service, as described above.
- 4. Multiple general contractors will bid on the project through an invitation to bid and staff have confirmed that multiple subcontractors are approved by the roofing manufacturer for installation as required to meet warranty needs.

Benefits of Proposal

A brand name exemption will allow the district to select a roofing material based on a competitive and qualitative solicitation. It will also provide a clear direction for the design team when putting the construction documents and specification together. While staff could have accomplished this by using a specification that named a brand but allowed an "or approved equal" submittal, the process used ensured an open competitive process to determine the brand to be specified.

Potential Downside of Proposal

There appears to be no downside to this proposal.

Action Requested

Board of directors' approval of the selected roofing manufacturer to be the only specified roofing for the HMT Aquatic Center project's roof material.

MEMORANDUM

Date: December 2, 2015

To: Peter Foster, Tualatin Hills Park & Recreation District

From: Chris Roberts

Project: THPRD HMT Aquatic Center

Project Number: 4637-01

Brand Name specification for Metal Roofing RFQ Review

Opsis has reviewed the submitted brand name specifications for metal roofing request for qualifications (RFQ). The submittals received by the qualification deadline were provided by AEP Span, The Garland Company and Taylor Metal Products. Opsis architecture recommends the use of the Garland Company R-mer Span structural panel for this project. From the information provided we believe that Garland's products, services and warranty best fits the needs of the THPRD HMT Aquatic Center re-roofing project.

Garland provides the only vented standing seam system that incorporates a vented ridge and eave. Installation includes 3/8" clearance between the panels and substrate which provides ventilation and reduces potential for condensation. Ventilation is a valuable component particularly above a natatorium where vapor drive plays a significant role in performance of the building envelope.

The R-mer Span panels are symmetrical so single panels can be removed without damaging adjacent panels. The standing seam panel has a taller vertical seam for long term leak protection and the system utilizes a continuous cleat with one piece 16 gauge clips that allow for thermal expansion and contraction. The 16 gauge clips are eth most robust of the products submitted. The panels are joined through the use of a seam cap with a double bead of factory applied hot melt sealant. It is the only panel that can be unseamed without disturbing the actual panel.

Garlands roofing system meets all weather testing requirements. The manufacturer provides project specific engineering with engineers on staff and in Oregon. They provide detailing specific to the project, preform weekly inspections and progress reporting and assist with contractor recommendations, assistance, bid qualifications and project close out as a basic service.

Garland has a historical track record of successful large scale standing seam roof installations. Garland will also issue a 30 year no door limit warranty.

Garland's R-mer Span assembly, service oriented delivery, market history and warranty set it apart from the other submittals.

Tualatin Hills Park & Recreation District Minutes of a Regular Meeting of the Board of Directors

A regular meeting of the Tualatin Hills Park & Recreation District Board of Directors was held on Monday, November 2, 2015, at the HMT Recreation Complex, Dryland Training Center, 15707 SW Walker Road, Beaverton. Executive Session 6 pm; Regular Meeting 7 pm.

Present:

Larry Pelatt President/Director
Jerry Jones Jr. Secretary/Director

John Griffiths Secretary Pro-Tempore/Director

Ali Kavianian Director
Bob Scott Director

Doug Menke General Manager

Agenda Item #1 - Executive Session (A) Legal (B) Land

Secretary Jones called executive session to order for the following purposes:

- To consult with counsel concerning the legal rights and duties of a public body with regard to current litigation or litigation likely to be filed, and
- To conduct deliberations with persons designated by the governing body to negotiate real property transactions.

Executive session is held pursuant to ORS 192.660(2)(e) & (h), which allows the board to meet in executive session to discuss the aforementioned issues.

Secretary Jones noted that representatives of the news media and designated staff may attend the executive session. All other members of the audience were asked to leave the room. Representatives of the news media were specifically directed not to disclose information discussed during executive session. No final action or final decision may be made in executive session. At the end of executive session, the board will return to open session and welcome the audience back into the room.

Agenda Item #2 – Call Regular Meeting to Order

President Pelatt called the regular meeting to order at 7:05 pm.

Agenda Item #3 – Action Resulting from Executive Session

Bob Scott moved that the board of directors authorize staff to acquire a property in the northwest quadrant of the district for \$438,900.81, using system development charge funds, subject to standard due diligence review and approval by the general manager. All Kavianian seconded the motion.

Jerry Jones Jr. declared a potential conflict of interest for this motion due to his construction firm having completed work under contract for the property owner.

Roll call proceeded as follows:

Jerry Jones Jr. Yes
Ali Kavianian Yes
Bob Scott Yes
Larry Pelatt Yes

The motion was UNANIMOUSLY APPROVED.

Bob Scott moved that the board of directors authorize staff to grant a new permanent access easement in the southeast quadrant of the district, subject to appropriate due diligence review and approval by the general manager. Jerry Jones Jr. seconded the motion. Roll call proceeded as follows:

Ali Kavianian Yes
Jerry Jones Jr. Yes
Bob Scott Yes
Larry Pelatt Yes

The motion was UNANIMOUSLY APPROVED.

Jerry Jones Jr. moved that the board of directors authorize staff to acquire a property in the northwest quadrant of the district, using system development charge funds, subject to standard due diligence review, including inspections, appraisal review and survey, and approval by the general manager. Bob Scott seconded the motion. Roll call proceeded as follows:

Ali Kavianian Yes
Bob Scott Yes
Jerry Jones Jr. Yes
Larry Pelatt Yes

The motion was UNANIMOUSLY APPROVED.

Jerry Jones Jr. moved that, pursuant to the Request for Proposals for the Sale of North Bethany Development Parcels dated October 5, 2015, the board of directors authorize staff to award the sale of the subject properties to Polygon Northwest Company and authorize the general manager to enter into a purchase and sale agreement consistent with the terms of the proposal dated October 22, 2015. Ali Kavianian seconded the motion. Roll call proceeded as follows:

Bob Scott Yes
Ali Kavianian Yes
Jerry Jones Jr. Yes
Larry Pelatt Yes

The motion was UNANIMOUSLY APPROVED.

Agenda Item #4 – Audience Time

There was no public testimony during audience time.

Agenda Item #5 – Board Time

President Pelatt recalled the recent rainstorm's impact on the Fanno Creek Trail tunnel under Scholls Ferry Road, which experienced significant flooding.

Agenda Item #6 - Consent Agenda

Bob Scott moved that the board of directors approve consent agenda items (A) Minutes of October 5, 2015 Regular Board Meeting, (B) Monthly Bills, (C) Monthly Financial Statement, and (D) HMT Aquatic Center Renovation Consultant Contract. Jerry Jones Jr. seconded the motion. Roll call proceeded as follows:

Ali Kavianian Yes Jerry Jones Jr. Yes Bob Scott Yes Larry Pelatt Yes

The motion was UNANIMOUSLY APPROVED.

Agenda Item #7 – Unfinished Business

A. Synthetic Turf Infill

General Manager Doug Menke introduced Gery Keck, facilities & project manager, to present research compiled on the different types of infill available for use with synthetic turf fields. Doug noted that district staff would need a decision from the board by January in regard to which infill material is preferable in order to inform the specifications for the construction of the district's next synthetic turf fields.

Gery provided a detailed overview of the memo included within the board of directors' information packet focusing on the following three topic areas: the different types of infill material available for use with synthetic turf fields, including cost, composition and compatibility; reported health concerns stemming from the use of crumb rubber infill; and reported environmental concerns stemming from the use of crumb rubber infill. In the studies reviewed by staff, there was no conclusive evidence identified that crumb rubber has any elevated health concern for participants playing on a synthetic turf field. However, staff did find evidence stating that crumb rubber has the potential to leachate zinc into local stormwater runoff, but it can be reduced with the use of stormwater treatment measures. Clean Water Services already requires all newly developed synthetic turf fields to include a stormwater treatment facility. Gery concluded his presentation by noting that although no formal board action is requested this evening, two projects that include synthetic turf installation will go to bid this spring and staff requests board guidance on whether to continue to specify crumb rubber as a component of the infill material. Gery offered to answer any questions the board may have.

Jerry Jones Jr. referenced research he conducted on this topic, copies of which would be distributed to the board, noting that much of it relates to the use of recycled tires and the chemicals that get onto the tires throughout their useful lives being on vehicles. He called out speculation that there is an increased cancer risk to those who use fields that have crumb rubber infill, noting that although the research may be somewhat inconclusive, he would rather the district choose the cleaner product if one is available. He described how the infill material gets inhaled by players, as well as into clothing, maintaining contact with a person's skin much longer than just during play. However, there is a cleaner product available and it is only about a 3% cost difference. He noted that this would not be the first time the district has chosen to provide a cleaner product, and provided examples of sustainability practices. He encouraged the board members to review the research he has compiled.

Ali Kavianian commented that if it is only an incremental cost increase to provide a cleaner product, he would support it.

Bob Scott expressed agreement with Jerry and Ali's comments. He asked what type of water treatment facility is required in order to reduce the zinc contamination.

✓ Gery replied it is a retention pond or bioswale, such as what the district is required to provide anyway.

President Pelatt questioned the total carbon footprint in switching from crumb rubber infill, which is made of recycled used automobile tires, to a different material that may require more resources to be produced and may have a greater environmental impact.

- ✓ Jerry replied that Nike Grind is made from recycled shoe materials, the trimmings that are unused when a shoe is produced, so it is not a product that requires new resources, although the district is not limited to that specific brand.
- ✓ Gery noted that some of the other infill materials profiled are made with new resources, but that there are other options.
- ✓ Bob noted that he views the issue from a standpoint of health of the users versus potential environmental issues. He would rather err on the side of safety of the users, even if that meant using a product that requires new resources. He wants to ensure that there are no health consequences for whichever infill material is designated.

Larry explained that he is suggesting that any change in infill material be evaluated thoroughly from all angles. Nothing the district will do is without risk; it is a matter of finding what has the least risk overall.

✓ Jerry expressed agreement. He explained that different infill manufacturers will provide different methods of testing and that the district may wish to choose particular compounds that it does not want in the infill product it purchases.

Larry agreed that the infill material does tend to come home with the players based on his own experience.

✓ Jerry agreed and questioned the impact of crumb rubber against skin for extended amounts of time.

General Manager Doug Menke requested that board members contact him with any other questions that they might have within the next few weeks until this item can come back to the board for additional discussion and a decision.

B. General Manager's Report

General Manager Doug Menke provided an overview of his General Manager's Report included within the board of directors' information packet, including the following:

- Tennis Center & Aquatic Center Roof Projects Update & Timeline
 - Gery Keck, facilities & project manager, provided a PowerPoint presentation, a copy of which was entered into the record, regarding the recently completed Tennis Center Roof Project and upcoming Aquatic Center Roof Project.
- Southwest Quadrant Community Park Fundraising Campaign Update
 - Geoff Roach, director of Community Partnerships, provided a PowerPoint presentation, a copy of which was entered into the record, on the campaign to fund accessibility features at Southwest Quadrant Community Park.
- McMillan Park Local Government Grant Program Application
 - Aisha Panas, director of Park & Recreation Services, provided a PowerPoint presentation, a copy of which was entered into the record, regarding a grant recently received from Oregon Parks & Recreation Department's Local Government Grant Program in the amount of \$50,000 for relocation and replacement of play equipment at McMillan Park.
- Willow Creek Greenway Nature in Neighborhoods Grant Application
 - Aisha Panas, director of Park & Recreation Services, provided a PowerPoint presentation, a copy of which was entered into the record, regarding a grant recently received from Metro's Nature in Neighborhoods program in the amount of \$25,000 for improvements to the Willow Creek Greenway.
- Board of Directors Meeting Schedule
- System Development Charge Methodology Review Open House

Doug offered to answer any questions the board may have.

John Griffiths arrived at the meeting.

Jerry Jones Jr. commended Geoff and district staff for their efforts on the fundraising campaign for Southwest Quadrant Community Park. He noted that raising nearly \$1 million is an extraordinary accomplishment.

Agenda Item #8 - New Business

A. North Bethany Abbey Meadows Phase 1 Site Master Plan

Jeannine Rustad, superintendent of Planning, and Nicole Paulsen, Design & Development coordinator, provided an overview of the memo included within the board of directors' information packet regarding the first phase site master plan for North Bethany Abbey Meadows that is needed in order to move forward with entering into a System Development Charge (SDC) credit agreement with the site's developer, DR Horton. Jeannine provided an overview of the master plan, which included improvements such as play equipment, an asphalt pathway, and site furnishings via a PowerPoint presentation, a copy of which was entered into the record. Jeannine noted that the action requested this evening is board approval of the Abbey Meadows first phase site master plan and offered to answer any questions the board may have.

President Pelatt asked how much the developer is expected to pay in SDCs for their development.

- ✓ Jeannine replied \$2.6 million at today's SDC rates.
- ✓ Nicole noted that the estimated cost for the phase one project is \$120,000 which includes the play equipment and trail.

Larry asked for the approximate length of trail that would be constructed.

✓ Nicole replied approximately 100 feet.

Ali Kavianian moved that the board of directors approve the Abbey Meadows Phase 1 Site Master Plan as presented. Jerry Jones Jr. seconded the motion. Roll call proceeded as follows:

| John Griffiths | Yes |
|-----------------|-----|
| Bob Scott | Yes |
| Jerry Jones Jr. | Yes |
| Ali Kavianian | Yes |
| Larry Pelatt | Yes |

Jessica Collins

The motion was UNANIMOUSLY APPROVED.

| Agenda Item #9 – Adjourn There being no further business, the mee | eting was adjourned at 8 pm. |

RE: <u>Harman Swim Center Renovation Construction Contract</u>

Introduction

Staff request board of directors' approval of the lowest responsible bid for the Harman Swim Center Renovation Construction Contract and authorization for staff to execute a contract with Cedar Mill Construction for the amount of \$281,700.

Background

The board of directors approved funding for the Harman Swim Center restoration project in the FY 2015/16 budget in the amount of \$345,000. The total project budget consists of an available construction budget of \$306,000, contingency in the amount of \$19,000 and soft costs in the amount of \$20,000. Staff have worked with our consultant team, led by Peterson Structural Engineering, to complete the construction documentation and bidding process. This project may require a plumbing permit through the city and will be obtained by the contractor.

On November 9, 2015, the project bid was advertised and the bid opening occurred on November 24, 2015. A total of two bids were received and the lowest responsible bidder was Cedar Mill Construction who submitted a bid for the base bid and all three alternates of \$281,700.

Proposal Request

Staff recommend moving forward with the base bid as well as alternates #1, #2 and #3 for a total contract amount of \$281,700 to Cedar Mill Construction. The base bid, three alternates and project soft costs combined are within the project budget. Based on the bid results, the project is \$24,300 below budget with potential additional savings from the contingency.

Construction is scheduled to begin December 14, 2015 with completion being no later than February 5, 2016.

The project will include resurfacing of the pool tank with an epoxy quartz coating that is estimated to last 10 years. In addition, the pool gutter trough will be cut off, rebuilt and retiled. The pool deck and all dressing room floors will be recoated with a colored non-skid epoxy based product. With the competitive base bid, staff are also recommending including alternates #1, #2 and #3 in the construction contract.

• Alternate #1 includes adding three floor drains in the hallway adjacent to the family restrooms and staff changing rooms, demo the tile floor in those same rooms and resurface with the same non-skid epoxy coating as the pool deck and dressing rooms. The bid cost for this alternate is \$18,700.

- Alternate #2 includes resurfacing the lobby spectator restroom floors with the same nonskid epoxy coating as the pool deck and dressing rooms. The bid cost for this alternate is \$2,600.
- Alternate #3 includes removing the plastic kemlite panels, as well as the original tile, on each of the dressing room shower wall areas and retiling. The bid cost for this alternate is \$23,800.

By performing these alternates within this contract, we take advantage of the center's closure period and eliminate the need to close the facility down in the future to complete these items. The alternates will give the floors a fresh, seamless look as well as a safer surface for patrons and staff. In addition, we give our patrons a more inviting space to shower that is updated and consistent with the highest district standards. These alternates will not add any length of time to the closure.

Staff are seeking board of directors' approval to award the contract for the base bid plus all three alternates based on the lowest responsible bid for the project.

Benefits of Proposal

Approval of this contract will provide the renovation of key elements within the Harman Swim Center that have met their life expectancy and allow the work to occur during the planned facility closure period. Awarding the contract will also bring the project in below the budgeted amount.

Potential Downside of Proposal

There are no apparent downsides to this proposal.

Action Requested

Board of directors' approval to award a contract to Cedar Mill Construction and authorization for the general manager or his designee to execute the contract for the Harman Swim Center Renovation Construction.

RE: Resolution Appointing Audit Committee Member

Introduction

Staff requests board of directors' appointment of one audit committee member and approval of the attached resolution making the appointment.

Background

The district audit committee was authorized by Resolution No. 2008-04 at the April 7, 2008 board of directors meeting and consists of three members of the public. The primary responsibilities of the audit committee include periodically forming a recommendation regarding the selection of the park district's independent auditors, review of the annual audit plan, monitoring progress and compliance, participating in an audit exit conference, presentation of the audit report to the board of directors, and post audit follow-up. Membership for the committee is drawn from the board of directors (1), the district's budget committee (1), and the general public (1).

Board member Bob Scott currently fulfills the board position and Shannon Kennedy fulfills the budget committee position. Kathleen Leader currently fulfills the public position on the committee, but her term expires on December 31, 2015. She has agreed to continue fulfilling the public position on this committee and requests reappointment for a period of two years. Please find her application attached, as well as the current committee roster.

Proposal Request

Staff requests board of directors' reappointment of Kathleen Leader to the district's audit committee, per the attached resolution, for a term of two years.

Action Requested

Board of directors' approval of Resolution No. 2015-17, Appointing Audit Committee Member.

RESOLUTION 2015-17

TUALATIN HILLS PARK & RECREATION DISTRICT, OREGON

A RESOLUTION APPOINTING AUDIT COMMITTEE MEMBER

WHEREAS, the Tualatin Hills Park & Recreation District Board of Directors must appoint committee members by resolution; and

WHEREAS, each committee member shall be appointed by the Board for a term expiring on December 31, 2017; and

WHEREAS, the selected committee member has demonstrated their interest and knowledge in the Committee's area of responsibility. Now, therefore

THE TUALATIN HILLS PARK & RECREATION DISTRICT RESOLVES AS FOLLOWS:

The Board of Directors approves the appointment of Kathleen Leader to the Audit Committee.

Duly passed by the Board of Directors of the Tualatin Hills Park & Recreation District this 7th day of December 2015.

| | Larry Pelatt, Board President | | | |
|---------------------|----------------------------------|--|--|--|
| | | | | |
| | | | | |
| | Jerry Jones Jr., Board Secretary | | | |
| ATTEST: | | | | |
| | | | | |
| Jassian Collins | | | | |
| Jessica Collins | | | | |
| Recording Secretary | | | | |

TUALATIN HILLS PARK & RECREATION DISTRICT ADVISORY COMMITTEE APPLICATION

| Name: Kathleen Leader | | | | Date: 11/16/15 | |
|-----------------------|--|-------|------|----------------|--|
| Address: | | City: | | Zip: | |
| Home Phone: Cell: | | | Work | Phone: | |
| Email: | | | | | |

Please note you must reside within the Park District's boundaries and complete a background check in order to serve on the Audit Committee.

Please explain your interest in serving on the Audit Committee:
 I believe that my career in financial management provides me with skills, knowledge and experience that would benefit the District.

I value the mission, services and recreation facilities provided by Tualatin Hills Park & Recreation District, and believe that my knowledge and experience will foster the continuation and growth of District services in the community.

- 2. How long have you lived in the community? I have lived in Cedar Hills over 12 years.
- 3. Have you served on other volunteer committees?

 ✓ Yes

 ✓ No

 If yes, please explain where, when, and what your responsibilities were:

 I currently serve as a Board Member for Oregon Municipal Finance Officers Association (OMFOA), guiding the mission and planning conferences and events for the organization.

I am currently the Treasurer for Forest Hills Village Homeowners Association. I have held this position for over 11 years. I am responsible for billing and collection of annual assessments, payment of bills monthly, preparation of the annual budget and monthly/annual financial statements, preparation of annual tax statements, banking and investment functions. I participate as a member of the Board developing and enforcing bylaws, covenants and restrictions, and guidelines, responding to homeowner concerns, and addressing the needs of the Association.

I was a Board Member for Neighbor Health Clinics, a non-profit organization providing medical and dental services to indigent and uninsured individuals in North and South East Portland, from 1999 through 2002. I provided governance and direction for the operations and policies of the non-profit organization and assisted in fund raising opportunities

4. Have you or your family participated in any Center or other Recreation District activities?

What: Pilates Class When: Eight years ago

Where: Cedar Hills Recreation Center

I also jog at least twice a week through the Commonwealth Park and enjoy the lake, scenery and people. In early 1990 I volunteered as a swimming coach for the Special Olympics, and practices and events were held at the District's pool facility on Walker Road.

5. If employed, what is your occupation? Finance Manager with Clean Water Services

TUALATIN HILLS PARK & RECREATION DISTRICT ADVISORY COMMITTEE APPLICATION

6. Please describe any work experience or areas of expertise that you feel would benefit the Audit Committee:

I have over 17 years in financial management and reporting experience, including 12 years in the local government sector.

My work experience as the Finance Manager with Clean Water Services and Finance Director for the City of Troutdale, City of Wood Village and Holgate Center includes:

- Develop and administer policies and procedures for accounting, financial management, financial information system administration, banking and investment services, purchasing, auditing, budget, utility billing, debt administration, financial reporting, internal controls and property/liability risk management.
- Ensure compliance with generally accepted accounting standards and federal, state and local laws and regulations affecting fiscal activities and related operations.
- Prepare and oversee preparation of the Comprehensive Annual Financial Report.
- Serve as primary liaison with the independent auditors in developing the audit scope and responding to auditor's findings and recommendations.
- Direct the development of strategic plans for financial activities and prepare financial forecasts and models for resource and expenditure issues to ensure that long term financial management objectives are met.
- Acting Budget Officer, direct development of the annual budget, establish and monitor budgetary controls, and ensure compliance with Local Budget Law.

FROM: Keith Hobson, Director of Business & Facilities

RE: Resolution Authorizing Application for the 2016 Veterans and War

Memorials Grant Program for Relocation of Vietnam War Memorial

Introduction

The Oregon Parks and Recreation Department (OPRD) is accepting applications for the 2016 Veterans and War Memorials (VWM) grant program. Applications are due by December 15. Staff recommends that the district submit an application on behalf of the American Legion Post #124 (Post) to relocate a Vietnam War Memorial at Veterans Memorial Park. Staff requests board of directors' approval of Resolution No. 2015-18, authorizing staff to apply for this grant assistance.

Background

The VWM program provides funding for construction of new or restoration of existing veterans and war memorials. Relocation of memorials is also eligible for funding consideration. VWM grants require a 20% match in funding from the project sponsoring agency. For this project, the Post is providing the funds necessary to meet match requirements and the district will not need to provide financial support to complete the project.

In summer 2015, the Post contacted district staff about the restoration and relocation of a Vietnam War memorial from the Elks Lodge located at 3500 SW 104th Avenue to Veterans Memorial Park. The relocation of this memorial is consistent with the site master plan for Veterans Memorial Park approved by the board of directors in May 2013 (attached). The Post identified the VWM grant and requested THPRD submit an application on its behalf because only governmental agencies and special districts are eligible to apply. The Post will prepare the application and provide all necessary supporting documents. Staff will complete the application process by providing technical support in the creation of maps/exhibits needed with the application, reviewing the application and uploading information to the online application website. Staff has identified this project as a strong candidate for VWM grant assistance with minimal effort from staff.

Proposal Request

Grant assistance is being sought to help pay the costs associated with the restoration and relocation of a Vietnam War memorial to Veterans Memorial Park. Grant funds would be used to assist the Post in its efforts, including design/engineering, permitting and installation. The estimated budget for this project includes both estimated restoration and relocation costs and a 10% contingency. This project will be completed by summer 2017.

Total estimated cost for this project is \$123,500. Staff intends to submit a grant application on behalf of the Post for \$35,000, which is 28% of the total estimated project cost. The Post will provide the remaining estimated project funds, which it has secured through an aggressive fundraising effort. The district will have no financial responsibility for the project.

Benefits of Proposal

With a successful grant application, the district will be the benefactor of new memorial in Veterans Memorial Park and will have strengthened its partnership with the Post.

Potential Downside of Proposal

There is no potential downside to this proposal.

Maintenance Impact

There is no added maintenance impact resulting from this proposal because the park is already served and included in annual maintenance costs. The Post will be responsible for maintaining the new war memorial per an approved agreement with the district.

Action Requested

Board of directors' approval and signature of Resolution No. 2015-18 to apply for a 2016 Veterans and War Memorial (VWM) grant on behalf of the American Legion Post #124 for the relocation of a Vietnam War memorial at Veterans Memorial Park.

RESOLUTION NO. 2015-18

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE TUALATIN HILLS PARK & RECREATION DISTRICT AUTHORIZING APPLICATION TO THE OREGON PARKS AND RECREATION DEPARTMENT FOR THE 2016 VETERANS AND WAR MEMORIALS GRANT PROGRAM FOR RELOCATION OF A VIETNAM WAR MEMORIAL AT VETERANS MEMORIAL PARK

WHEREAS, state funds are available through the Oregon Parks and Recreation Department (OPRD) for the Veterans and War Memorial (VWM) Grant Program for war memorial projects; and

WHEREAS, the Tualatin Hills Park & Recreation District (THPRD) is a special service district that is eligible to receive said state grant funds; and

WHEREAS, THPRD, in partnership with the American Legion Post #124, has identified the relocation of a Vietnam War memorial to Veterans Memorial Park as high priority for the district; and

WHEREAS, THPRD has agreed to submit the grant application on behalf of the American Legion Post #124; and

WHEREAS, THPRD will provide adequate funding for ongoing operations and maintenance of this park and recreation facility should the grant funds be awarded; and

LET IT HEREBY BE RESOLVED BY THE BOARD OF DIRECTORS OF THE TUALATIN HILLS PARK & RECREATION DISTRICT IN BEAVERTON, OREGON, that:

Section 1: The board of directors demonstrates its support for and authorizes

staff to submit a grant application to OPRD for a Vietnam War

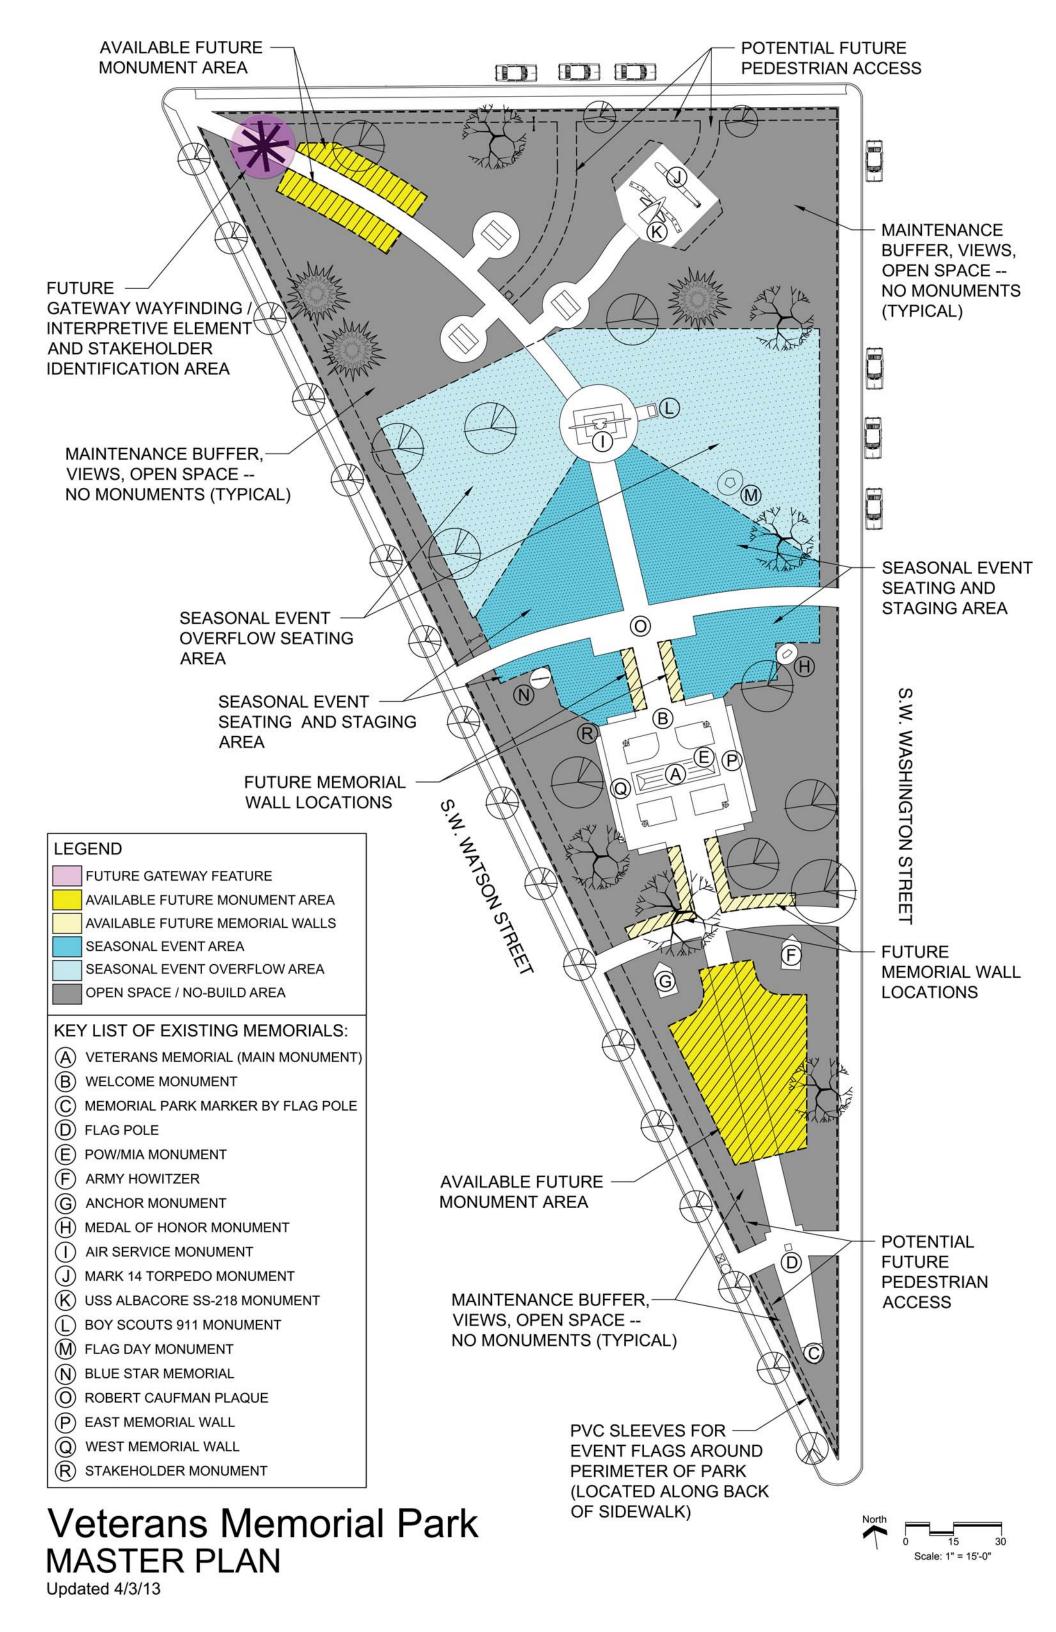

memorial at Veterans Memorial Park.

Section 2: This resolution shall be effective following its adoption by the

board of directors.

Approved by the Tualatin Hills Park & Recreation District Board of Directors on the 7th day of December 2015.

FROM: Keith Hobson, Director of Business & Facilities

RE: <u>Trails Functional Plan</u>

Introduction

At the August 10, 2015 regular board meeting, staff made a presentation on the draft Trails Functional Plan (TFP) and requested board feedback on the plan. The plan has been updated based on comments and discussion at the meeting. Staff is requesting board approval of the document at the December 7, 2015 meeting.

Background

The district's first Trails Master Plan was adopted in 1998. This plan provided a guide for future decisions and activities regarding how the district would acquire, develop, operate and maintain a district wide trail system over a 20-year period. An update to this plan was completed in 2006 which recognized the accomplishments on completing projects and to identify future needs based on providing a district wide trail system. The 2013 Comprehensive Plan Update called for the completion of five functional plans throughout the district, one of which being trails.

The TFP is a guide to help achieve a district wide trail system. It establishes guidance for land acquisition, prioritization criteria for trail development and enhancement, expectations for trail design and maintenance and metrics for monitoring progress in the implementation of the trails system. The plan also serves as a tool to guide stakeholders, including district staff, in making trail planning, development and maintenance decisions. The plan received review from various district advisory committees, a community open house, an online survey, and through fellow agency peer review. The plan was also available online at the district's website for public review and comment.

During this time period, there was a concern raised about the proposed classification for one of the trails in the draft TFP. Staff met with several former members of the Trails Advisory Committee (TAC) to discuss the concern that was raised. The former TAC members reaffirmed their support for the proposed classification as it is presented in the draft TFP.

Changes to the draft TFP presented in August include the following:

1. <u>Updated Section 6.2 (pg. 62)</u> – Added language to reflect how the district will communicate outcomes of the various monitoring processes outlined in Table 6A. This will include periodic updates, reports and maps to the public, district staff, management team and the board. Also added language regarding public communication on successes in enhancing the trail system.

- 2. <u>Updated Trail System Map</u> Revised map to reflect the crossing of Sunset Highway at the Sunset Transit Center as a completed segment in the overall trail system administered by other jurisdictions (the Oregon Department of Transportation). Also revised map to better reflect Washington County's 2035 Transportation System Plan Update from 2014 for the South Cooper Mountain area, which shows a connection from the future McKernan Trail/South Cooper Loop Trail intersection westward to the future Reedville Trail. Added a new community trail in the North Cooper Mountain area to acknowledge a future trail need identified in the City of Beaverton's South Cooper Mountain Community Plan.
- 3. <u>Appendix Information Included (pgs. 64-80)</u> Added information to the appendix including a) larger format 2015 Trail System Map; b) trail design details for typical elements found along district trails (e.g., site furnishings, signage); and c) 2010-2015 trail count information along regional trails having trail counters.

4. Minor Text Amendments

- a. Added language noting need to coordinate trail planning with local and regional transportation system plans, including Metro's Active Transportation Plan (Section 3.1.4, pgs. 10-11).
- b. Added language to reinforce that trails, especially regional trails, serve a transportation function especially for bicycle commuters in addition to providing a recreation function. (Added to multiple locations throughout the document.)
- c. Added language noting that design exceptions may be granted based on regional or local jurisdictional guidelines. Such as Metro's Active Transportation Plan (Section 4.3, pg. 31).
- d. Added clarification language noting that completed trail segments identified in Tables 3B through 3E may be substandard. Further clarifying language is included noting that the intent of these tables is to illustrate trail system connectivity, not trail system condition (Section 3.2.1.a, pg. 13).
- e. Added language clarifying that the mid-block crossing treatments identified in the plan are guidelines only and that specific crossing treatments are subject to review and approval by the respective jurisdictional agency either the City of Beaverton or Washington County. (Section 4.9, pg. 47)
- f. Added a new community trail designation to Section 3.2.2.b (pg. 19) to reflect the addition of the North Cooper Mountain Trail to the 2015 Trail System Map.
- g. Added a footnote related to use of SDC funds for improvements to existing substandard trails (Section 5.1.2, pg. 57 and Section 5.3.1.b, pg. 59).

Benefits of Proposal

The proposal will provide guidance for staff, clarify trail planning and development decisions and priorities for stakeholders, and will provide supporting information to be used when writing grant proposals.

Potential Downside of Proposal

There are no potential downsides to the proposal.

Action Requested

Board of directors' approval of the Trails Functional Plan.

| 5. Implementation & Development / How We Get There | 53 |
| 6. Success Monitoring / How Are We Doing | 61 |
| 7. Appendix | 64 |

1. Executive Summary

The purpose of the Trails Functional Plan (TFP) is to support implementation of the Tualatin Hills Park & Recreation District's (THPRD) 2013 Comprehensive Plan Update. This plan sets forth THPRD's approach to providing, developing and maintaining trails for its patrons. This TFP outlines how the district acquires land for trails and prioritizes new trail development and existing substandard trail enhancement.

This plan replaces the 2006 Trails Master Plan. It updates the district's existing trails inventory and makes new recommendations for the trail framework. The TFP will help THPRD maintain overall level of service (LOS), improve walkable access to trails, establish criteria for how land is acquired for trails and establish prioritization criteria for trail development and enhancement.

This plan consists of four primary sections:

- Existing Conditions
- Achieving Success
- Implementation & Development
- Success Monitoring

1.1 Existing Conditions / Where We Are

This section of the TFP includes refinement to the district's trail classification system that further clarifies the intent of regional, community and neighborhood trails as well as other types of facilities (e.g., shared use pathways, sidewalks, etc.). It also establishes new design standards for regional (12 feet wide), community (10 feet wide) and neighborhood (6-8 feet wide) trails. Guidance is also provided on administering trail counts and provides locational criteria for counter placement as well as describing the types of mid-block crossing options available, and their design elements.

The TFP identifies a number of trail planning partners the district should actively engage with to further its trail system. This includes agencies such as the Oregon Parks & Recreation Department, the Oregon Department of Transportation, Metro, Washington County, the City of Beaverton and those cities neighboring the district's service area. The plan also identifies utility agencies, such as the Bonneville Power Administration, Portland General Electric and Clean Water Services, as being partners in trail design and development.

A major component of this section of the plan is the identification of the district's trail system and the individual segments that make up each individual trail. A number of tables highlight those segments completed and those segments remaining to be constructed. Additional tables

highlight new trails that need to be planned for, especially in new urbanizing areas of the district like South Cooper Mountain and Bonny Slope West.

1.2 Achieving Success / What We Want To Be

The TFP establishes trail standards for the district's trail classifications (regional, community, neighborhood) as well as standards for trails occurring in unique situations (trails adjacent to roadways, trails combined with sidewalks, trails in greenways). This plan also includes a number of design standards and guidelines covering a variety of topics such as accessibility, utilities, surfacing, amenities (site furnishings, bollards, signage, etc.), bridges and boardwalks and safety and security. Additionally, guidance is provided for maintenance and operation of trail facilities.

1.3 Implementation & Development / How We Get There

The TFP identifies criteria that will be used to prioritize trail enhancement and development. These include, but are not limited to: level of community support, project location in an underserved area and whether or not it overcomes barriers. As projects arise, they will be scored and placed in Tier I (high) or Tier II (medium) priority categories. These criteria will also be used for determining site suitability for land acquisition of new trail corridors.

In addition to the criteria identified in this plan, future trails to be located along creek corridors or other natural areas, such as the Beaverton Creek, Bronson Creek and Willow Creek Trails, will also be evaluated using site development suitability criteria identified in the district's Natural Resources Functional Plan (NRFP). These trails are identified as future study areas on the updated trail system map, incorporated within this TFP.

A number of funding sources are identified for trail development and enhancement projects, such as capital funds, system development charges (SDCs), grants, partnerships and general obligation bonds. Not all funding sources can be used for all types of trail improvements.

1.4 Success Monitoring / How Are We Doing?

The TFP identifies a number of performance measures for trails, which are typically monitored annually and include, but are not limited to: miles of new trails completed, miles of existing trails enhanced and number of trail users counted. Trail user profiles, and access to target populations will be monitored to help ensure equitable access to trails throughout the district's service area.

2. Introduction

The district's 1998 Trails Master Plan, updated in 2006, recommended improvements to the existing trail system; completion of missing gaps; and connections to significant environmental features, schools, parks and recreation, public facilities, transit, local neighborhoods and business centers throughout the region. The Trails Master Plan also listed eight goals:

- Providing recreation opportunities
- Trail development and regional connections
- Access
- Community linkages
- Amenities
- · Maintenance and emergency access
- Preservation
- Funding

This TFP replaces the 2006 Trails Master Plan. It updates the district's trails inventory and incorporates the eight goals. This TFP also identifies new recommendations for the district's trail framework. While this TFP replaces the 2006 Trails Master Plan, which replaced the 1998 Trails Master Plan, it builds upon the progress made since these previous plans were adopted and sets a vision for future success.

The purpose of the TFP is to outlines how THPRD:

- Acquires land for trails
- Prioritizes new trail development
- Upgrades existing substandard trails

The following goal identified in the 2013 Comprehensive Plan Update relates to providing, developing and maintaining trails for its patrons:

 Goal 5 – "Develop and maintain a core system of regional trails, complemented by an interconnected system of community and neighborhood trails, to provide a variety of recreational opportunities such as walking, biking and jogging."

In additional to providing recreational opportunities for district residents, it is recognized that trails also provide transportation opportunites to transit – both bus and light rail – for bicycle commuters.

An outcome of THPRD's Comprehensive Plan Update process and the 2013 Comprehensive Plan Update was a call for a review of the standards and guidelines used to ensure residents are provided with quality facilities, such as trails, parks and natural areas. This review included

THPRD Trails Functional Plan

land acquisition procedures for trails, development or enhancement of trails and maintenance and operation of trails.

This plan will help the district:

- Maintain overall level of service (LOS) to the residents it serves
- Improve walkable access to trails and other district facilities
- Establish update criteria for how land is acquired for trails
- Establish prioritization criteria for new trail development and enhancement of existing substandard trails

3. Existing Conditions / Where We Are

THPRD first adopted a trails master plan in 1998. In 2006, that plan was updated (as part of the comprehensive plan update) and identified a number of goals for trails; established a trail classification system; created standards for trails, land acquisition and maintenance; and provided strategies for achieving success. The 2006 Comprehensive Plan was updated in 2013, refining district goals and rethinking strategies on goal implementation, including the establishment of this TFP. This section of the TFP takes a look at where the district sits today and its progression since the 2006 update.

3.1 General Description / Overview

3.1.1 Bond Survey Results

As part of the district's 2008 bond initiative, a survey was conducted to determine what facilities are most important to residents. Development of new trails and completing gaps in the existing trail system were at the top of the list. Surveys completed in 2012, 2014 and 2015 as part of the 2013 Comprehensive Plan Update, Parks Functional Plan (PFP) and this TFP also confirmed that trails and access to trails rate high in importance to district residents for both recreational and commuting purposes.

3.1.2 Trail Descriptions and Classifications

The following trail descriptions are intended to provide a broader overview of the types of trails and linkages that can be found within THPRD's service area. Trails within the service area are varied and occur in many different types of environments and situations. This includes trails that are more urban, occupying roadways, sidewalks, other rights of way and trails that may switch from a designated paved, multiuse trail onto a shared sidewalk/trail, to weave through the surrounding urban infrastructure. Some trails may be more natural or remote or follow utility corridors or greenways.

3.1.2.a Regional Trail

A regional trail is defined by its length, multi-jurisdictional alignment and connection to regionally significant features. Regional trails connect residents within the district to adjacent communities like Hillsboro, Tigard, Portland, unincorporated Washington County and the greater Portland metropolitan region. These trails also connect to regionally significant features such as the Tualatin Hills Nature Park, the Jenkins Estate and the Howard M. Terpenning Recreation Complex. In addition to providing recreational opportunities, regional trails often serve as transportation corridors because of the regional connections they make to transit, civic places, employment and commercial centers, and residential neighborhoods. Typical characteristics of regional trails include:

- Accommodating two-way non-motorized bicycle and pedestrian traffic, typically being 12 feet wide
- Being located in its own right of way separated from roads and streets
- Being paved with gravel shoulders
- Accommodating smaller maintenance and emergency vehicles when possible

3.1.2.b Community Trail

Community trails link important destinations between neighborhoods and across the district to parks, natural areas, schools, trails, transit and shopping centers. They function as both recreation and transportation corridors for a variety of users. Typical characteristics of community trails include:

- Accommodating two-way non-motorized bicycle and pedestrian traffic, typically being 10 feet wide
- · Being located in its own right of way separated from roads and streets
- Being paved with gravel shoulders
- Potentially being designed to function as a regional trail when high trail use is anticipated
- Accommodating smaller maintenance and emergency/security vehicles when possible

3.1.2.c Neighborhood Trail

Please note that the 2006 Trails Master Plan identified both urban and neighborhood natural trails in its trail classifications. With this TFP, natural neighborhood trails have been reclassified as soft "surface pathways." These types of trails are primarily site specific to parks or natural areas and do not extend beyond these areas. Information on design considerations for these types of pathways can be found in the district's PFP and the NRFP. With this TFP, urban neighborhood trails have been re-classified as neighborhood trails and are described below.

Neighborhood trails provide short distance connections to local features such as parks, natural areas, community centers, schools and other neighborhood attractions. Where they provide a direct connection, neighborhood trails will generally have their own right of way, separated from the street system. In other cases, they may consist of on-street segments with patrons using existing sidewalks for pedestrians and bike lanes or residential streets for bicyclists. These trails are often walking and hiking trails from regional or community trails and public right of ways, but many may also be located within parks or natural areas. Typical characteristics of neighborhood trails include:

- Not always accommodating two-way non-motorized bicycle and pedestrian traffic, typically being 6-8 feet wide
- Being located on- or off-street, with or without its own right of way and separated from roads or streets
- Being paved or unpaved, usually without gravel shoulders

 Not always being fully accessible because neighborhood trails can include staircases or be located on steep slopes due to site topography

3.1.2.d Additional Definitions

- *Trail*: a designated land corridor that provides a marked route with little interruption in travel
- Shared Use: shared by pedestrians (including dog walkers), bicyclists, skaters, joggers and other non-motorized users.
- *Unpaved/Natural Surface*: a surface consisting of gravel, crushed rock, soil, or other semi-pervious material
- Sidewalk: a paved walkway along the side of a roadway separated from the roadway by a raised curb and/or planter strip; located within the public right of way
- Bike lane: a portion of the roadway, usually an arterial or collector, that has been
 designated by striping, signing and pavement markings for the preferential or exclusive
 use of bicyclists; located within the public right of way

3.1.3 Trail Counters

THPRD manages a trail user count program that relies on passive infrared counters at fixed locations, collecting hourly usage. The information is collected monthly for analysis in daily, weekly, monthly and annual reports. Based on district staff calibration, the trail counters are highly accurate. Several counters can be found along the same trail to determine heavier use areas. Also, multiple counters along the same trail can help to track changes over time, such as a before and after the addition of a new trail segment, installation of a mid-block crossing, or providing new directional signage. It should be noted that increases or decreases in trail use can vary depending on a whole host of variables, including weather and time of year.

3.1.3.a Trail Counts

The district uses a number of trail counters along many if its regional and community trails. Trail counters are also used along pathways or nature trails internal to park sites and natural areas. As described previously, the purpose of using trail counters is to gauge trail usage and track trail user trends. At the time of this TFP adoption, trail counters are located at the following regional and community trail locations (see Appendix 7.3 for counts collected from 2010-2015). Information collected does show a trend for increasing trail use each year, especially on those trails where gaps have been completed, such as on the Fanno Creek Trail and Westside Trail.

- Fanno Creek Regional Trail at Scholls Ferry Road
- Fanno Creek Regional Trail at Hall Boulevard
- Fanno Creek Regional Trail at 92nd Avenue
- Rock Creek Regional Trail
- Waterhouse Trail (North) at Walker Road
- · Waterhouse Trail (South) at Walker Road

THPRD Trails Functional Plan

- Westside Regional Trail at Murrayhill
- Westside Regional Trail at Village Lane

3.1.3.b Trail Counter Location Criteria

As new trails are planned and completed, the location of trail counters is important to ensure appropriate trail usage data is collected. Locations selected for long- and short-duration data collection should focus primarily on those trail sections most representative of prevailing user patterns (not necessarily at landmarks or other areas that might skew data collection).

For fixed counters, which are what the district uses, the following considerations should be kept in mind:

- Locate on straight, level sections of trail, not on curves or on/near a steep grade
- Locate on smooth pavement or other compacted surface
- Locate at potential improvement areas, such as mid-block crossings, gaps, pinch points and locations that are operationally difficult for bicyclists and pedestrians to navigate, to gauge impacts of future improvements
- Avoid locating near water or in direct sunlight
- · Avoid placement that directly faces roadways unless a vertical barrier exists
- Avoid locating near high-power utility lines that could disrupt or distort the detection capability

The Natural Resources & Trail Management department is responsible for locating trail counters and collecting trail count data. Prior to installation, coordination with the appropriate district staff is needed to determine a precise trail counter location.

3.1.4 Trail Planning Partners

The district is primarily concerned with the off-street trails network. On-street connections between trails, parks, natural areas, schools, transit and other community destinations are the primary responsibility of the City of Beaverton and Washington County. However, partnership and cooperation between the district, city and county is essential when providing or enhancing existing on-street connections to adequately serve users. This includes coordination between this plan and the transportation plans of each respective agency.

Within THPRD's service area, other jurisdictions are responsible for permitting development through the land use and development approval process. The land use ordinances of Beaverton and Washington County provide both jurisdictions the ability to require land dedication and on-site development of trails during the development review process. Trails included in each jurisdiction's Transportation System Plan (TSP) may be incorporated through the site planning and land division application review process.

In addition to working with the city and county, other agencies can offer guidance for trail planning and development. Table 3A provides an overview of these partner agencies.

Table 3A – Trail Planning Partners

| Trail Partner | Description |
|---|---|
| Oregon Parks & Recreation Department (OPRD) | Statewide recreational trails planning and development agency Provides technical assistance for trail design and development Provides funding for trail development and construction through state and federal grant programs Supports bicycle and pedestrian tourism Coordinates with ODOT to ensure compatibility between trails and transportation |
| Oregon Department of Transportation (ODOT) | Statewide transportation planning and development agency Provides technical assistance for trail design and development whenever located within a state right of way or on federally funded trail projects Provides funding for trail design and development through state and federal grants and funding programs Coordinates with OPRD to ensure compatibility between trails and transportation |
| Metro | Regional trails and transportation planning agency, including the regional trails and greenspaces the plan, regional transportation plan and the regional active transportation plan Provides technical assistance for trail design and development Provides funding for trail planning, design and development through regional and federal grants and funding programs Coordinates with state and local agencies to ensure compatibility between trails and transportation Administers a number of data collection, analysis and distribution programs on the regional trail system, including land acquisition, planning, implementation, monitoring and maintenance |
| Washington County | THPRD's ultimate service area includes portions of urbanized, unincorporated Washington County, such as Aloha, Bethany, Bonny Slope, Cedar Hills and Cedar Mill Local transportation planning agency, including bicycle and pedestrian systems (identified in the county's transportation plan) |

| Trail Partner | Description |
|----------------------------|--|
| Washington County (cont'd) | Provides regulatory guidance/standards for trail design and development when located in the public right of way and as part of the development review process |
| | Provides funding and/or other assistance for trail design and development through county funding programs and/or capital improvement projects, such as bike lanes or widened sidewalks |
| | Coordinates with THPRD and other local agencies to ensure compatibility between trails and transportation |
| Clean Water Services (CWS) | Local environmental agency for water quality protection and enhancement |
| | Provides regulatory guidance/standards for trail design and development located within vegetated corridors adjacent to creeks, stream and wetlands |
| | Provides mitigation/enhancement requirements for impacts to vegetated corridors as a result of trail development. |
| City of Beaverton | Located entirely within THPRD's ultimate service area |
| | Local transportation planning agency, including bicycle and pedestrian systems (identified in the city's transportation plan) |
| | Provides regulatory guidance/standards for trail design and development when located in the public right of way and as part of the development review process |
| | Provides funding and/or other assistance for trail design and development through local funding programs and/or capital improvement projects, such as bike lanes or widened sidewalks |
| | Coordinates with THPRD to ensure compatibility between trails and transportation |
| City of Hillsboro | Located on the west side of THPRD's ultimate service area |
| | Local trails and transportation planning agency |
| | Coordinates with THPRD to ensure compatibility with regional and community trail connections between service areas |
| City of Portland Parks | Located on the east side of THPRD's ultimate service area |
| & Recreation Bureau | Local trails planning agency |
| | Coordinates with THPRD to ensure compatibility with regional and community trail connections between service areas |

| Trail Partner | Description | | |
|----------------|--|--|--|
| City of Tigard | Located on the south side of THPRD's ultimate service area | | |
| | Local trails and transportation planning agency | | |
| | Coordinates with THPRD to ensure compatibility with regional and community trail connections between service areas | | |

3.2 Trail Segments

The district's trails system, illustrated in Figure 3C, includes nine regional trails and 16 community trails encompassing over 60 miles. Of the nine regional trails, six are previously identified in the 2006 Trails Master Plan and three are new, based on the development of this TFP. Eleven of the community trails come from the 2006 Trails Master Plan and five are new additions. Also illustrated on the 2015 Trail System Map are key neighborhood trails that provide connections from regional or community trails to significant points of interest, such as parks, natural areas, transit, schools or other areas of interest. Please note that while neighborhood trails are illustrated on the map, they are not designated by name in the same manner as regional and community trails are designated.

3.2.1 Current Trails

3.2.1.a Current Regional Trails

The district has six regional trails identified within its service area (based on the 2006 Trails Master Plan), traversing over 36 miles. Of these, two are nearly complete with only small segments remaining (Fanno Creek and Rock Creek Trails) and one is halfway complete (Westside Trail). The three remaining trails (Beaverton Creek, McKernan Creek (formerly named Cooper Mountain) and Tualatin Valley) have minimal, if any, segments completed. The following table illustrates the district's regional trail network. These trails are illustrated in Figure 3C.

Trail segments that are constructed are considered "complete" in the status column in the following tables. Segments not constructed are deemed "incomplete" and segments that have portions constructed are considered "partial," These status classifications apply to both regional and community trails. Please note, that although some trail segments are complete, they may be considered substandard. The following tables (3B-3E) are intended to highlight trail system connectivity throughout the district.

Table 3B – Current Regional Trail Descriptions.

| R1 – Rock Creek Trail | | | | |
|-----------------------|--|------------|----------------|--|
| Segment | Description | Status | Length (miles) | |
| 1 | Sunset Highway – Crescent Park Trail | Incomplete | 0.69 | |
| 2 | Crescent Park Trail – 185 th Avenue | Complete | 0.32 | |

| R1 – Rock Creek Trail | | | |
|-----------------------|--|----------|----------------|
| Segment | Description | Status | Length (miles) |
| 3 | 185 th Avenue – West Union Road | Complete | 0.26 |
| 4 | West Union Road – Waterhouse Trail | Complete | 1.00 |
| 5 | Waterhouse Trail – Kaiser Road | Complete | 0.77 |
| 6 | Kaiser Road – Westside Trail | Complete | 0.88 |

| 6 | 92 nd Avenue – Oleson Road | Complete | 1.15 | |

| R8 – McKernan Creek Trail (formerly the Cooper Mountain Trail) | | | |
|--|--|------------|----------------|
| Segment | Description | Status | Length (miles) |
| 1 | South Cooper Loop Trail – 175 th Avenue | Incomplete | 2.14 |
| 2 | 175th Avenue – Summercrest Park | Incomplete | 0.79 |
| 3 | Summercrest Park – Westside Trail | Complete | 0.47 |

3.2.1.b Current Community Trails

The district has 11 community trails identified within its service area (based on the 2006 Trails Master Plan), traversing over 30 miles. Of these trails, only the Waterhouse Trail has been nearly completed (only a fifth mile gap remains unconstructed of the 5 mile trail). The remainder of the district's community trails has only partially completed segments or has not yet been constructed. The following table outlines the district's community trail network. These trails are illustrated in Figure 3C.

Table 3C – Current Community Trail Descriptions.

| C1.1 - North Bethany Trail | | | |

| 8 | Beard Road – Murray Boulevard | Incomplete | 0.73 | | |
| 9 | Murray Boulevard – Scholls Ferry Road | Incomplete | 0.59 | | |

3.2.2 New Trails

As the district's service area continues to urbanize within its outer fringe, new trails will be needed to serve residents and further expand the district's existing and planned trail system. This includes the areas of Aloha-Reedville in the west, Bonny Slope West in the northeast and South Cooper Mountain in the southwest. The trails identified in the tables below are a result of planning efforts undertaken by Washington County (Aloha-Reedville, Bonny Slope West) and Beaverton (South Cooper Mountain). Although already urbanized and developed, the area

east of Highway 217 is also in need of trails that would connect residents north towards US-26 and west towards the Beaverton Creek and Tualatin Valley Trails.

3.2.2.a New Regional Trails

The following table highlights three new regional trails the district needs to plan for as the areas described above begin to urbanize and develop. This includes the north-south Reedville Trail, which will connect the South Cooper Loop Trail to the Tualatin Valley and Beaverton Creek trails; and the South Cooper Loop Trail, which runs east-west connecting the Westside Trail to the Reedville Trail in the district's southwest quadrant. The Crescent Park Trail also runs east-west and will connect to the Rock Creek Trail from the City of Hillsboro (based on Hillsboro's updated 2015 trails master plan) in the district's northwest quadrant. These trails are illustrated in Figure 3C.

Table 3D – New Regional Trails.

| R2 – Crescent Park Trail | | | | | |
|--------------------------|--|------------|----------------|--|--|
| Segment | Description | Status | Length (miles) | | |
| 1 | THPRD Boundary – Rock Creek West Soccer Fields | Incomplete | 0.28 | | |
| 2 | Rock Creek West Soccer Fields – Rock Creek Trail | Complete | 1.32 | | |

3.2.2.b New Community Trails

The following table highlights the five new community trails the district needs to plan for as the areas described above begin to urbanize and develop. This includes the Bonny Slope Area in the northeast and the Cooper Mountain area in the southwest. These trails are illustrated in Figure 3C.

Table 3E – New Community Trails.

3.2.3 Trail Corridor Study Areas

It should be noted that much of the district's remaining (to be constructed) regional and community trail systems are located within creek corridors and other environmentally sensitive areas. These trail corridors have been identified on the 2015 Trail System Map (Figure 3C) as study areas, which mean these areas do not have a defined trail alignment at this time.

These study areas will undergo a feasibility analysis incorporating both this TFPs Trail Prioritization Criteria Matrix (Table 4A) and the district's Natural Resource Functional Plan's (NRFP) Site Development Suitability Criteria (Table 5A in the NRFP) to determine an appropriate trail alignment. Although this analysis could result in the recommendation that a trail, or portion of a trail, be located outside of the resource area (possibly as an on-street connection), require additional natural area mitigation along the trail corridor or not be constructed at all, it is the desire of the district to provide off-street trails and connectivity

THPRD Trails Functional Plan

whenever reasonable. Where the TFP trail prioritization criteria indicates a high priority for trail development and the NRFP site suitability criteria indicates a high priority for natural resource function, it shall be up to the district's management team and/or board of directors to determine which priority takes precedence.

For those trail corridors located within creek corridors or other environmentally sensitive areas but not identified on the trail system map in a study area, this same feasibility analysis will take place in order to determine the most appropriate trail alignment.

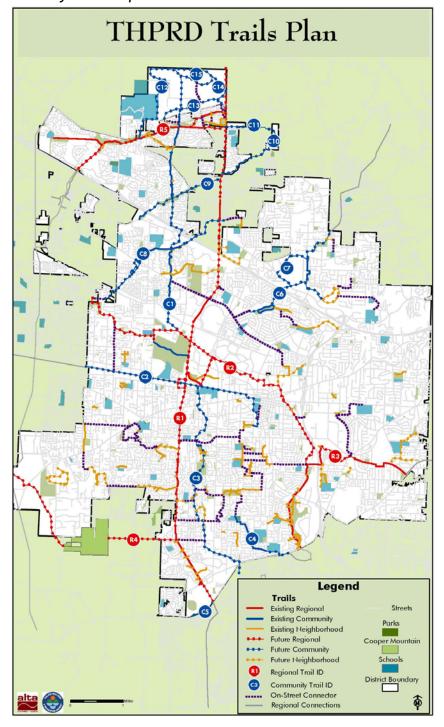

Administrative Draft Page 20 of 80 December 7, 2015

3.2.4 Maps

3.2.4.a 2006 Trail System

Figure 3A illustrates the district's trail system at the time of the 2006 Trails Master Plan. This map provides a historical look at the trail system prior to the passage of the 2008 bond measure and the completion of a number of trail segments throughout the district.

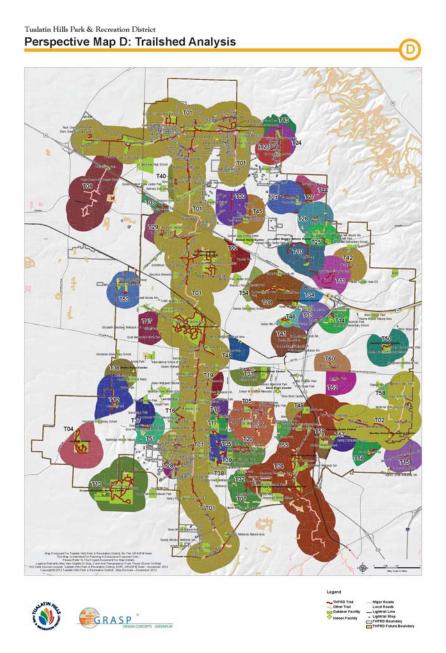

Figure 3A - 2006 Trail System Map.

3.2.4.b Trailshed Analysis

Figure 3B illustrates walkable access for district residents to district facilities from constructed district trails. This analysis was completed as part of the 2013 Comprehensive Plan Update, which calls for an emphasis on walkable access to district facilities such as trails, parks, natural areas and recreation/aquatic centers. This map also illustrates walkable access to the district's trail system; represented by the shaded areas (each color represents one trailshed). This map is for reference only (more detailed information can be found in the 2013 Comprehensive Plan Update).

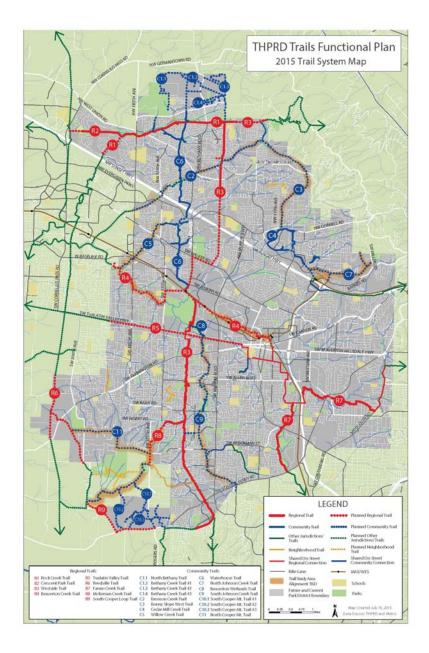

Figure 3B – 2013 Trailshed Analysis.

3.2.4.c 2015 Trail System

Figure 3C illustrates the existing and planned trail system in THPRD's service area. It also shows the context of existing and planned trails of other jurisdictions. It should be noted that some of the future trails are depicted as study areas, indicating these trail corridors are located in natural areas and require an additional level of analysis with site suitability criteria identified in the district's NRFP to ensure trail and resource area compatibility. A large scale map can be found in the appendix for better legibility.

Figure 3C – 2015 Trail System Map.

4. Achieving Success / What We Want To Be

To facilitate the district's desire to provide, maintain and operate a quality trail system, a number of guidelines have been established. A number of elements need to be considered, including, but not limited to, trail classifications, accessibility, amenities, surfacing, bridges and boardwalks and mid-block crossings. This section of the TFP provides the guidance necessary to ensure district trails meet user expectations.

4.1 Trail Design Standards by Classification

A complete trail network provides a variety of experiences within a range of settings. THPRD's system includes routes that provide recreational opportunities as well as alignments that present viable transportation alternatives for bicycle commuters. The system includes three main functional classes of trails:

- Regional Trail
- Community Trail
- Neighborhood Trail

See Section 3.1.2 above for definitions of the trail classifications. Table 4A below provides guidance on trail design based on classification and Figures 4A through 4C illustrate a typical trail cross-section for each trail classification.

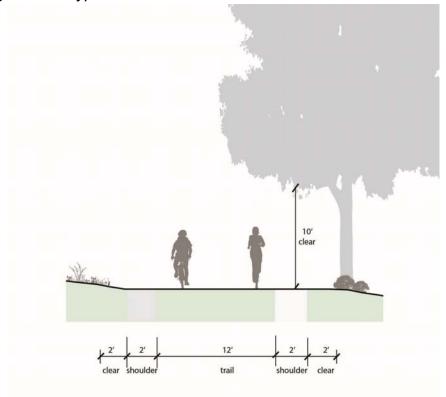

Table 4A – Trail Classification Design Matrix.

| Classification | Function | Materials | Width | Vertical Clearance* | Horizontal Clearance** |
|-------------------------|---|--|--|-----------------------------|--|
| Regional | Provides transportation and recreational connectivity at a regional scale | Paved (asphalt or concrete); may be pervious | 12 feet with 2 foot gravel shoulder | 10 feet (from top of trail) | 2 feet (from edge of shoulder) |
| Community | Provides recreational and transportation connectivity at a community scale | Paved (asphalt or concrete; may be pervious) | 10 feet with 1-2 foot gravel shoulder | 10 feet (from top of trail) | 2 feet (from edge of shoulder) |
| Neighborhood (Urban) | Provides access or a parallel route to higher level trail facilities. | Paved | 6-8 feet, with or without gravel shoulder | 10 feet (from top of trail) | 2 feet (from edge of shoulder or trail w/o shoulder) |

| Classification | Function | Materials | Width | Vertical Clearance* | Horizontal Clearance** |
|---------------------------|---|--|------------------------------------|-----------------------------|-----------------------------|
| Neighborhood (Natural) | Linear natural spaces typically following riparian corridors. | Varies depending on site conditions | 6-8 feet, no gravel shoulder | 10 feet (from top of trail) | 2 feet (from edge of trail) |

^{*}area above the trail free from obstructions such as tree limbs or branches

Figure 4A – Regional trail typical section.

^{**}area on both sides of trail free from obstructions such as shrubs and trees

Figure 4B – Community trail typical section.

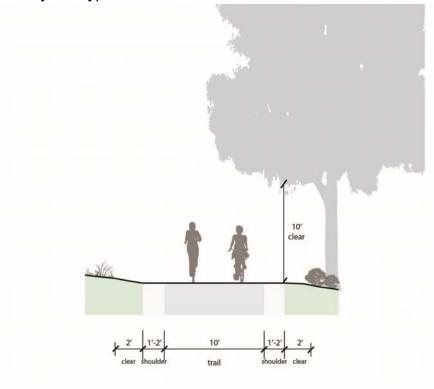

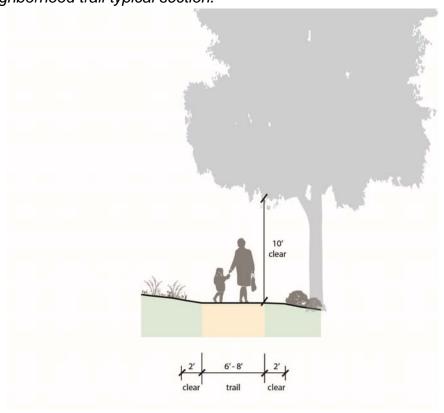

Figure 4C – Neighborhood trail typical section.

Administrative Draft Page 26 of 80 December 7, 2015

4.2 Additional Trail Type Design Standards

Trails of each classification traverse many types of environments and contexts. The standards below in Table 4B provide guidance for some common trail types, based on site context.

Table 4B – Additional Trail Type Design Matrix.

| Туре | Function | Materials | Width | Vertical Clearance* | Horizontal Clearance** |
|--|---|-----------------------------------|--|--|--|
| Combined Trail and Sidewalk | Provides route options for both bicyclists and pedestrians outside of existing roadway corridors | Paved (asphalt or concrete) | 12 feet (sidewalk and trail) | 10 feet (from top of trail) | 2 feet (from edge of trail) |
| Trail Adjacent to a Road or Sidewalk | Separated route within a transportation corridor | Paved | Regional Trail: 12 feet, Community: 10 feet | Vertical curb between trail and roadway; 10 feet (from top of trail) | 4 feet landscape buffer between trail and roadway/ sidewalk; 4 feet (from edge of trail) - non- landscape buffer side) |
| Trail in a Greenway | Provides route for both pedestrians and bicyclists using riparian corridors and/or wetland areas | Paved or unpaved | 6-8 feet; should include a vegetated buffer zone from adjacent water bodies. | 10 feet (from top of trail) | 2 feet (from edge of trail) |

^{*}area above the trail free from obstructions such as tree limbs or branches

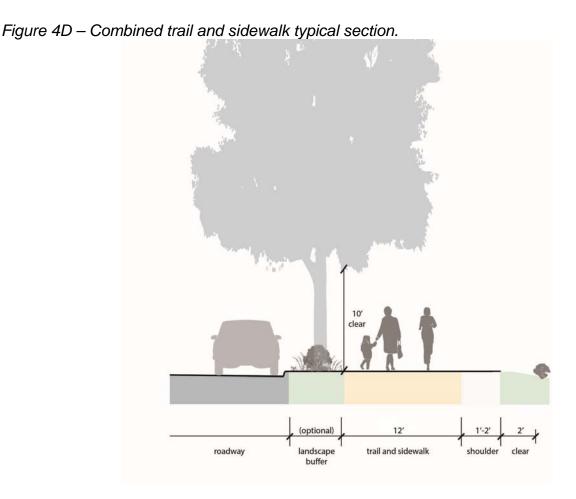

Any new or improved sidewalks should adhere to the requirements of the City of Beaverton or Washington County, as appropriate. The district should partner with both agencies as road improvements are being planned along trail corridors to help ensure bicycle and pedestrian needs are adequately met.

^{**}area on both sides of trail free from obstructions such as shrubs and trees

4.2.1 Combined Trail and Sidewalk

Shared use paths are completely separated from motorized vehicular traffic and are constructed in the public right of way, within a green space area, public utility corridor or other public access area. Combined sidewalks and trails are generally located adjacent to roadways within the public right of way. They may be separated from the curb by a landscape buffer or they may be "curb-tight," connected to the curb.

Trail design standards for these types of facilities are described in the table above. Additional consideration should also be given to enhancing the user experience and safety for both bicycles and pedestrians, including the use of striping, landscaping, clear sight lines and other design considerations described later in this section. Figures 4D and 4E illustrate typical cross-sections for these two trail types.

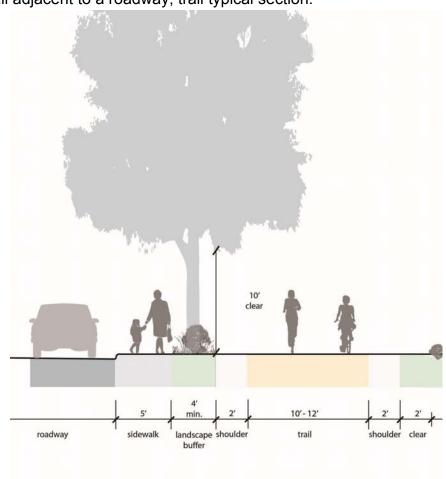

Figure 4E – Trail adjacent to a roadway, trail typical section.

4.2.2 Trails within Greenways

Due to much of the district's service area being urbanized, limited opportunities are available to develop new off-street trails. Much of the district's remaining (to be constructed) regional and community trail system is located within environmentally sensitive areas, such as creek corridors and greenways. Greenways are defined as follows:

Greenways are linear natural spaces that follow creeks and streams. Some greenways provide public access with environmentally compatible trails, viewpoints, or watercraft launch sites. Other greenways prioritize wildlife habitat protection and do not allow any public access. (Metro, Regional Trails and Greenways Plan)

Greenways offer substantial recreational and green space preservation opportunities. When planning for a trail along or in a greenway, a balance must be provided between the protection of natural resources and the public's desire for access to natural resource areas. Trails within greenways should be studied to identify impacts to natural resource areas, stormwater, flora and fauna, and flood levels as well as recreational and transportation benefits for district residents.

As mentioned previously in this TFP, the trail system map (Figure 3C) highlights study areas where trails are planned to be located along or within creek corridors. This includes trails such as Beaverton Creek, Bronson Creek, Willow Creek and others. Section 3.2.3 outlines the process of how these study areas will be evaluated using both trail prioritization criteria outlined in this plan and the site development suitability criteria outlined in the district's NRFP.

The following principles provide some general environmental considerations for trail development within greenways:

Consider

- Alignments to minimize the number of stream crossings
- Circulation and/or migration of local fauna
- Impact of on-site vs. off-site mitigation
- Opportunities for the restoration of poor water quality, habitat areas and/or stream edges
- o Interpretive or educational elements to highlight local features, flora and fauna
- Use of concrete as a surface treatment option for trails in greenway due to its durability and lower maintenance requirements
- Natural dispersed infiltration systems such as vegetated swales or infiltration strips to manage stormwater
- Construction materials with little to no toxicity (see http://www.pharosproject.net)

Avoid

- Fragmentation of small habitats
- o Wetlands whenever possible, but if necessary span at the narrowest point
- Constructing trails that may be more prone to erosion and maintenance upkeep over time
- Use of pervious paving in floodplain areas or areas without proper drainage due to sedimentation and higher maintenance requirements
- Maintain buffer zones (vegetated corridors) from creeks, streams and sensitive bodies of water per Clean Water Services standards

4.3 Design Exceptions

The design standards and guidelines outlined in this section are the district's best practices and basis for design of all planned trails. However, trail development requires consideration of the local context, project site conditions, the environment and jurisdictional requirements.

During the master planning and design development process, the district will consider alternatives to the standard width dimensions, turning radii, surface treatments and other elements when justification is provided to address the following factors:

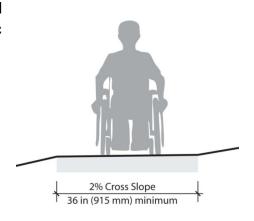

- User safety
- Avoidance of and/or minimizing environmental impact
- Consideration of topography
- Demand and anticipated level of use
- Cost
- Regional or local jurisdictional guidance, such as Metro's Active Transportation Plan

Generally, trail widths less than the standard are only to be used over short distances, such as around utility poles, bridge abutments, significant trees or in sensitive natural resource areas. Trail widths greater than the standard width may also be considered in high use areas, such as near commercial centers, transit, schools and recreation facilities. Design exceptions may require approval by the district's management team.

4.4 Accessibility

4.4.1 ADA

The Americans with Disabilities Act (ADA) was established to prohibit discrimination on the basis of disability by public accommodations and requires places of public accommodation and commercial facilities to be designed, constructed and altered in compliance with the accessibility standards established by the ADA. As new trails are developed and existing trails are enhanced, the district will work in meeting ADA requirements to ensure access for all.

4.4.2 ADAAG

The United States Access Board has approved the Americans with Disabilities Act Accessibility Guidelines (ADAAG) for trails and outdoor recreational access routes. However, some trails may have limitations that make meeting ADAAG guidelines difficult or prohibitive. Prohibitive impacts include harm to significant cultural or natural resources, requirements of construction methods that are against federal, state or local regulations, or terrain characteristics that prevent compliance.

Some key ADAAG guidance considerations include:

- Use of firm and stable surfaces, such as asphalt, concrete, wood, recycled plastic lumber or compacted gravel, wherever universal accessibility is a consideration
- Provide clear tread width a minimum of 3 feet

- Provide a 5 foot wide passing space at a minimum of every 1,000 feet when the trail width is less than 5 feet wide
- Avoid surface obstacles more than one-half inch high, or 2 inches high when the surface is other than asphalt, concrete wood or recycled plastic lumber
- Avoid a cross slope more than 2%, or 5% where the surface is not asphalt, concrete, wood or recycled plastic lumber when necessary for drainage
- Longitudinal slope must meet one or more of the following conditions shown in Table 4C
- Provide detectable surface changes at curb ramp approaches from roadways or parking areas
- Provide one accessible parking space per every 25 vehicle spaces at trailheads
- No more than 30% of the total trail length may exceed a running slope of 8.33%

Table 4C – Maximum Running Slope and Length.

| | Maximum Length of Segment | |
|----------------|---------------------------|----------|
| Steeper than | But no more steep than | |
| 1:0(0%) | 1 : 20 (5%) | No Limit |
| 1:20 (5%) | 1 : 12 (8.33%) | 200 feet |
| 1 : 12 (8.33%) | 1 : 10 (10%) | 30 feet |
| 1 : 10 (10%) | 1 : 8 (12%) | 10 feet |

ADA Accessibility Guidelines (ADAAG), ADA Standards, https://www.access-board.gov/guidelines-and-standards/buildings-and-sites/about-the-ada-standards/background/adaag

4.5 Regulatory

4.5.1 Oregon Department of Transportation (ODOT)

ODOT has adopted the American Association of State Highway and Transportation Officials (AASHTO) Guide for the Development of Bicycle Facilities for trail design standards. The AASHTO guide should be consulted for geometric design standards such as and horizontal and vertical curves, and sight-distance. This is especially important for those trails serving a transportation function, such as regional trails. Any trail projects receiving federal funding assistance will be required to meet ODOT standards in its design and development.

4.5.2 American Association of State Highway and Transportation Officials (AASHTO) The AASHTO Guide for the Development of Bicycle Facilities generally recommends against the development of trails along roadways. These facilities create a situation where a portion of the bicycle traffic rides against the normal flow of motor vehicle traffic and can result in wrongway riding when either entering or exiting the trail. As mentioned above, AASHTO provides guidance for the geometric design of trail design and construction. These standards should be considered for all trail projects and are required to be met for all federally funded trail projects.

4.5.3 Manual of Uniform Traffic Control Devices (MUTCD)

The MUTCD regulates the design and use of all traffic control devices including signs and pavement markings. A summary of the MUTCD guidance for trails and bicycles includes the following:

- Use of a solid yellow line when passing is discouraged
- Use of a dashed yellow line when passing is permitted due to adequate conditions
- Use of striping in areas of restricted sight-distance, substandard trail width, high traffic areas, intersection approaches and/or where night time riding is expected with limited lighting
- Avoid over-striping trails in order to maintain effectiveness for trail user safety purposes
- Any transportation related signage (regulatory, caution, directional, etc.) visible from roadways or other public right of way must meet MUTCD standards

Please note that the district's Trails Management Program contains more detailed information related to MUTCD guidance and how the district puts this guidance into practice along the trails system.

4.5.4 Utilities

Many types of utilities, such as water, gas, electric and others offer good opportunities for trail co-location. Recreational and utility co-use has some complications, including the unique needs of the utility company or public agency. However, with strategic maintenance and land agreements, utilities can have a minimal effect on trail users. Additionally, utility companies usually benefit by having an uninterrupted and easily accessible route to their utility service.

Each utility has specific requirements regarding trail routing, alignment, setbacks, loading, landscaping and other factors. For each project all utilities should be coordinated with to ensure current requirements are being used as well as to better understand utility maintenance schedules and servicing needs, including frequency and vehicle/equipment requirements. Limitations may be placed on trail surfacing materials and location of structures, such as bridges and boardwalks, depending on utility type and location.

The district works with the following utility providers on many of its trail projects:

- Bonneville Power Administration (BPA)
- Portland General Electric Company (PGE)
- Northwest Natural Gas (NWN)
- Tualatin Valley Water District (TVWD)
- Clean Water Services (CWS)
- City of Beaverton
- City of Portland

4.5.5 Railroad / TriMet

As with utilities, some of the district's trails are, or will be, located in right of way owned by Union Pacific Railroad and operated by Portland & Western Railroad or owned and operated by TriMet. As such, coordination with each of these agencies is needed to ensure their respective requirements are being met. Because most of these are live railroad right of ways, additional safe guards must be considered when design and constructing trails. This includes consideration of the following:

- Use of fencing and/or other separation techniques should be part of the trail design when adjacent to railroad tracks
- Maximize the setback between the trail and the railroad tracks to the greatest extent possible; subject to railroad, federal, state and regional guidelines

4.6 Surfacing

When determining surface type for THPRD trails, consider topography, landscape context, underlying soils, trail type and classification. Asphalt is the preferred standard for all regional and community trail surfacing, but alternative trail surfacing may be allowed with a design exception. All surfaces have advantages and disadvantages, and each must be analyzed to determine which surface is most appropriate in any given location.

4.6.1 Impervious

Traditionally, asphalt and concrete are the most commonly used materials for trails because they last the longest, meet ADA and ADAAG requirements and meet the needs of most users. Other possible trail surfacing options include:

- Commercial soil stabilizers
- Geotextile confinement systems
- Crusher fines
- Limestone treated surfaces
- Recycled plastic or wood decking

Surfacing options for bridges and boardwalks are identified in Section 3.3.8.

In arriving at a recommended trail surface, the following should be considered:

- Initial capital cost and funding
- Long-term maintenance costs
- Surfacing durability and longevity
- Existing soil and environmental conditions
- Availability of materials
- Anticipated trail use/functionality
- Aesthetics

ADA and ADAAG-compliant trails require paved surfaces, in most instances, for access and ease of use. In limited cases, packed gravel fines can be used, where there is little to no topography. However, packed surfaces require much more maintenance effort and cost over time, and may not be desirable in the long term.

Asphalt. Asphalt trails offer substantial durability for the cost of installation and maintenance. Asphalt is popular with users for its smooth, continuous surface and has the benefit of lower cost, but requires more upkeep in comparison to concrete. As a flexible pavement, asphalt can also be considered for installing as a paved trail in a greenway or with grades steeper than three percent. If constructed properly on suitable sub-grade, asphalt has a life span of ten to 15 years. The use of asphalt for trails is the district's preferred standard.

Figure 4F – Typical asphalt trail cross-section.

Note: Use of geotextile fabric is optional depending on site conditions.

Concrete. When cost allows, concrete is recommended because of its durability, longevity and lower maintenance requirements. Concrete is especially good in areas prone to frequent flooding, such as greenways. However, the hardness and jarring effect of this surface is not preferred by runners or cyclists. Concrete joints that are saw-cut rather than tooled tend to improve trail user experience. If constructed properly on suitable sub-grade, concrete has a life span of approximately 25 to 30 years.

4.6.2 Pervious / Permeable

The use of permeable paving when feasible supports the district's sustainability policy and has a number of positive environmental impacts, include lower storm water runoff and greater water infiltration rates. However, permeable paving is generally twice the cost of impervious materials to install and is recommended when site conditions are conducive to its use. As

permeable paving continues to evolve and improve, the district will continue to evaluate its potential use in the trail system. The following should be considered for its use:

- Conduct a feasibility study to determine site conditions and soil type
- Environmental factors, such as the proximity to tree canopies or soil debris
- Establishment of a regular and routine maintenance schedule to retain permeability, access for vacuuming debris and cleaning equipment, especially after storm events
- Areas with proper drainage (not suitable in floodplain or areas with ponding or sedimentation)

4.6.3 Soft Surface

For purposes of this plan, natural surface trails are limited to bare earth (soil), gravel or crushed rock. Additional information about soft surface trails can be found in the district's PFP. When using crushed rock or gravel, trails in greenways benefit from screenings that contain about 4% fines by weight to compact and stabilize the trail's surfacing over time. However, an alternative surface should be considered when designing in flood-prone areas or steep terrain. When using soft surface trails:

- Provide constant positive drainage to avoid ponding
- Bench cut trail into slope without extensive removal of existing vegetation; build grade reversals and out-sloped elevations to encourage sheet flow across the trail
- Design small-scale stormwater facilities along the trail to minimize erosion
- Provide a longitudinal slope of 5% and a cross slope of 2%
- Keep the trail available for year round use

4.7 Amenities

Amenities help distinguish district trails from others and help to enhance the trail user experience. This includes features such as site furnishings, bollards, signage, striping and fencing. It should be noted, however, that these amenities will not always be found along all district trails due to site constraints, trail classification, anticipated trail use and other factors. The following design guidelines for typical district trail amenities are intended as a tool for decision-making purposes related to new trail design or the enhancement of existing substandard trails.

4.7.1 Site Furnishings

Although district trails are regularly maintained and monitored, it is advisable to use vandal resistant construction and materials whenever possible. Site furnishings typical to district trails are highlighted as follows:

Seating

- May include benches, seat walls, boulders, logs or other built features
- Typically located at trailheads, mid-block crossings, wildlife or natural area viewing locations and other areas of interest
- Provide adequate space for strollers and wheelchairs in a manner that does not impede trail use
- Seat walls shall include skate deterrents as appropriate

Trash receptacles

- Preferably located at trailheads and mid-block crossings; may be considered near wildlife/natural area viewing locations if high use is anticipated
- Should not be located directly adjacent to benches and seating areas
- Should be located for ease of maintenance service and access

Bike racks

- Typically located at parks along trail corridors, trailheads and where restrooms are located
- Should be located in a manner that does not impede trail use

Drinking fountains and port-a-potties

- Preferably located at trailheads and parks along trail corridors; may also be considered near mid-block crossings if other locations are too far away
- New drinking foundations should include pet bowl and jug filler options
- Consider locations for ease of maintenance service and access

Doggie bag dispensers

- Typically located at trailheads, mid-block crossings and near trash receptacles
- Mount on post with rules sign or on other surface as appropriate

Kiosks

- Typically located at major trailheads or trail intersections
- Design adjacent to the trail near other site furnishings, such as a bench or trash receptacle

Administrative Draft Page 37 of 80 December 7, 2015

Artwork

- Should be considered in the overall design of a trail project, as appropriate, and can be incorporated as part of the site furnishings (benches, bike racks, kiosks, etc.); as trail elements (bridge, boardwalk, walls, etc.); as stand-alone features (sculpture, mural, etc.); or as educational features (interpretive elements, environmental features, etc.)
- Consider using local artists to provide works that make the trail network uniquely distinct and representative of the district's character

4.7.2 Bollards

The use of bollards along district trails is intended to discourage motorized modes from using them. They are also used to distinguish district trails from trails provided by other public agencies (like school districts or cities) and private groups (like homeowner associations or golf/athletic clubs). The types of bollards used by the district and their unique characteristics are highlighted as follows:

- May include permanent, removable, collapsible or other site elements, such as boulders or logs
- Typically located at trailheads, mid-block crossings, maintenance access points and any other access point where vehicles may access the trail
- Bollards are generally installed in groups of:
 - Two with removable or collapsible bollards
 - o Three with two permanent bollards and one removable or collapsible bollard
- Bollards are typically yellow in color and should consider the use of reflective tape

Permanent

- Typically used on regional and community trails
- Locate in the gravel shoulder; where no shoulder exists, should be located 1-2 feet from edge of trail
- Removable / Collapsible
 - Typically used on regional, community and neighborhood trails
 - Located at trail centerline when used with permanent bollards on regional and community trails
 - Locate at trail centerline when natural features create side barriers for neighborhood trails

Boulders / Logs

- Typically located along street frontages at mid-block crossings, trailheads with parking areas and other potential unauthorized vehicle access points
- Often used in combination with bollards, especially if boulders are available on site or from another project
- Space uniformly to discourage vehicle entry but still allow for mowing and smaller sized maintenance equipment

4.7.3 Signage

All signage proposed along trails shall adhere to the district's approved Signage Master Plan. All signs visible from the public right of way must conform to MUTCD standards and guidelines, especially those signs that are directional and regulatory in nature. The district is also a partner in Metros Intertwine Regional Trails Program, which provides guidance for identification and wayfinding signage for the interconnectedness of regionally significant trails, parks, natural areas and green spaces of the greater metropolitan area. The following list represents signage most commonly found throughout the district's trail system. Table 4D provides guidance for locating these typical sign types found along trails.

- Site Identification Type A Sign Family
- Trailhead Identification Type D Sign Family
- Regulatory Type R Sign Family
- Directional and Safety Type T Sign Family

Identification

Signs may include the Intertwine designation per Metros Intertwine Regional Trails
 Signage Guidelines

Regulatory

- Typically includes the R1 sign type at all trail sites, although other regulatory signs may be applicable
- R1 signs are typically located at all trailheads, mid-block crossings and all other trail
 entries and can be combined with A3 signs and doggie bag dispensers as
 appropriate
- Any other regulatory sign types are to be located at the appropriate location(s) within a trail corridor
- Follow AASHTO and MUTCD guidelines for signs at mid-block crossings and trail intersections

Directional and Safety

Follow Metros Intertwine Regional Trails Signage Guidelines

Table 4D – Trail Signage Locational Guidelines.

| Visi (Hig | Level of Visibility (High to Low) | | Sign Type | Type of Location | Site Placement | Comments |
|--------------|---|---|---|--|---|---|
| | | Large ID Oriented towards automobile driver | | Main entrance OR prominent road location | Arterial street | |
| | | | Standard ID Sign: A1 | Oriented towards automobile driver | Main entrance OR prominent road location | Minor collector OR neighborhood street |
| | | | Trail ID Sign w/ map: D2 | Major pedestrian entry point/trailhead/existing park (ex: light rail station, parking lot) | On right side of trail | Requires orientation map |
| | Sign: D1 entrance off arterial street | | On right side of trail at a minimum of 10 feet inside trail OR at the apex of the "T" intersection if appropriate | Include directional strips with distance to prominent feature or trail connection | | |
| | Small ID/Rules including street crossings A3/R1 Trail Where patron must exit trail and use onstreet/sidewalk routes to close a gap in trail | | On right side of trail | Rules must be displayed at all entry points | | |
| | | | On right side of exiting trail. | Requires connection map | | |
| | | | Pedestrian Directional: T5 | Major directional at an internal trail intersection OR split | Placed at the apex of the "T" or "V" intersection | |
| | | | Trail Directional: T1 | Minor directional at an internal trail intersection OR split | Placed at the apex of the "T" or "V" intersection | Visible/useful for users coming from different directions |
| _ | | | Trail Crossing: T4 | Where trail makes direct connection across the street | On right side of trail where patrons cross | Must meet MUTCD standards |

Educational

- o Typically includes interpretive signage, although other signage may be applicable
- Interpretive signs are typically used when unique site features or educational characteristics exist; any such signage must adhere to the district's interpretive signage program as administered by its Natural Resources & Trail Management department

4.7.4 Striping

The use of striping is based on the district's Trails Management Program. However, trail projects that are federally funded will be required to follow AASHTO and MUTCD guidelines. The intent of the district's striping protocol of trails is to promote trail user safety by mitigating substandard trail conditions such as trail narrowing, limited sight-distance or sharp curves. It is not THPRD's intent to stripe all the trails throughout the district.

4.7.5 Fencing / Railing

Fences or railings along trails may be needed to prevent access to/from high-speed roadways or to provide protection along steep side slopes and waterways. Fences should only be used where they are needed for safety reasons. They should be placed as far away from the trail as possible; with a minimum offset of two feet. Many of these principles apply to cut-sections of trail where retaining walls are required: minimum two feet offset, with a rub-rail whenever possible. Whenever fencing or railing is used in a trail corridor, the following fencing types should be considered:

General considerations

- The district does not install fencing for property owners; in instances where it is required, the district shall place such fencing on the property owner side of the property line and the property owner is responsible for fencing after installation
- The district does not install fencing to delineate natural area boundaries unless deemed necessary by the Natural Resources & Trail Management department
- Fencing should be located within a mow strip as deemed necessary by the Maintenance Operations department regardless of fencing type

Split-rail

- Preferably used for site boundaries, natural areas and safety; it is the district's preferred fencing type in most situations where delineation between activities or uses is needed
- When used for site boundaries, fencing should be placed on district side of the property line for ease of maintenance
- Generally 3-4 feet tall, having two rails; fences having three rails are considered "heavy duty"
- Consider along trails having steep downhill slopes or at top of retaining walls
- Locate within a bark mulch mow strip as appropriate

Chain-link

- May used for site boundaries and safety
- o Generally 3-6 feet tall depending on situation
- May be galvanized or vinyl-coated depending on location; where vinyl-coating is needed, it should be black
- Consider use of privacy slats as appropriate

Welded wire or field fencing

- o Typically used for natural areas
- Generally 2-5 feet tall
- Consider along natural areas where access by park users are not desired, such as mitigation or restoration areas
- Generally used on a temporary basis

Ornamental / Decorative

 Ornamental or decorative fencing may be considered in those instances where a higher level of design is desired, such as main trailheads located at parks or other district facilities

Safety railing

- Typically used along boardwalks, top of retaining walls and steep slopes where the trail surface is 30 inches or more above ground surface
- o Minimum height of 42 inches
- Openings in the railing must not exceed 4 inches in width
- Where a cyclist's handlebar may come into contact with a fence or barrier, a smooth,
 12 inch wide rub-rail should be installed at a height of three feet

4.7.6 Landscaping

Generally THPRD does not design or install landscaping as part of a trail project unless it relates to mitigation. However, in some situations trail projects and residential developments are combined that require aesthetic landscaping. Use of native and drought tolerant species should be considered whenever possible, especially in locations where irrigation is not provided.

Locations

- Typically located at trailheads and where separation is needed between the trail and other uses, such as roadways, sidewalks and pathways
- Shall include native and drought tolerant plant species as appropriate, but may include ornamental plant species where irrigation is available
- o Trees to be planted no closer than 10 feet from the edge of trail surfacing
- o Shrubs to be planted no closer than 5 feet from the edge of trail surfacing
- Groundcovers and grasses to be planted no closer than 3 feet from the edge of trail surfacing
- Existing landscaping and trees must be protected and incorporated into trail development/enhancement whenever possible

Ornamental grasses

 Generally require minimal maintenance once established and are typically used in landscape buffers separating the trail from roadways and sidewalks

Groundcovers

- Generally require minimal maintenance once established and are typically used in landscape buffers separating the trail from roadways and sidewalks.
- Typically used in areas where turf grass is not appropriate, such as on steep slopes, and landscape buffers separating the trail from roadways, or sidewalks.

Shrubs

 Consider native plant species along park boundaries, natural areas and other locations where buffers are needed

Trees

- Avoid the use of trees having excessive litter and debris
- Consider a tree's ultimate size and growth habit to ensure proper placement for trail designs
- Consider using root barrier in areas where existing trees are located closer than 10 feet to the edge of trail and/or when a large number of trees will be planted
- Refer to the local jurisdiction street tree guidelines for trees to be planted along trails, sidewalks or rights of way

- Low maintenance guidelines
 - Avoid the use of plant species that produce excessive litter and debris, such as fruit, pods or cones
 - Avoid the use of plant species susceptible to wood rot, disease or limb breakage ("weak wooded") in areas of high trail use
 - Avoid siting plant species that overhang trails or have root systems that could impact trail surfaces

4.8 Bridges and Boardwalks

Bridges and boardwalks are structures that span over sensitive natural areas or inundated waterways to limit potential environmental impact. They are typically used when crossing small creeks and wetlands. Boardwalks range in length and can span as little as 10 feet or stretch for longer distances depending on site conditions. Bridges are used where greater lengths are required to span sensitive areas or when the objective is to reduce impacts to the floodplain.

Figure 4G – Typical bridge/boardwalk cross-section.

Bridges and boardwalks are commonly constructed of wood, steel or concrete with recycled plastic components. Wood is the most cost effective, versatile and relatively easy to install. Special consideration must be taken when using pressure treated lumber over waterways. While steel is a more expensive option, it can be purchased as a prefabricated kit, and can expand extensive lengths where other materials cannot. Modular concrete boardwalk systems are gaining popularity due to their low-impact installation methods and durability within wet areas. Recycled plastic is popular for its material durability, but is typically limited to non-bearing uses such as decking and handrails. Bridge and boardwalk designs must consider the intended use and be built from materials that is aesthetically and structurally appropriate.

4.8.1 Boardwalks

General considerations for the use of boardwalks include:

- Clear span width must be a minimum of 14 feet for regional trails and 12 feet for community trails. Wider widths are preferred in areas with higher anticipated use and whenever railings are used
- Use of a 6 inch curb rail is recommended. A 42 inch guardrail is required at locations
 where there is a 30 inch or greater elevation difference in the boardwalk surface and the
 ground/water surface below
- Design to structurally support 5 tons of capacity depending on emergency vehicle access and maintenance requirements
- Evaluate footing types to include uplift as well as loading consideration for flood events.
- Consult a structural engineer for member sizing, headwall and post footing design
- Give careful consideration to selection of decking material to minimize slippery conditions (see Table 3J below)
- Follow all local, state and federal permitting requirements where boardwalks are located within wetlands; construction in wetlands is subject to jurisdictional regulations

4.8.2 Bridges

Bridges are most often used to provide user access over natural features such as streams, creeks and wetlands, where a boardwalk is not an option. The type and size of bridges can vary widely depending on the trail location, site conditions and jurisdictional requirements.

The biggest factor in determining the width and load capacity for trail bridges, as well as boardwalks, is the project requirements and the maintenance program, including emergency/ security access. A developed site and maintenance access determines trail widths and bridge/boardwalk capacity. The funding source is also a determining factor, since federally-funded trails must adhere to the most stringent design standards.

Below is a list of general guidelines for the design of bridges for future trail projects. Many of these considerations are also applicable to design of boardwalks.

- When constructing a federally funded project, design criteria for the width of bridges are established by AASHTO
 - Standard width: 14 feet, unless a design exception is granted
 - Standard for a 'live load' for pedestrian and bicycle bridges: 85 psf (pound per square foot), plus any additional vehicle loading when used by maintenance or emergency/security vehicles
 - For bridges greater than 10 feet wide, the vehicular design load is for an HS10 truck
 - Bridges must also be designed to resist lateral forces from wind and earthquake as described by AAHSTO

- Projects funded from other sources:
 - Bridge width for regional and community trails: 2 feet wider than the paved trail approaching the structure
 - In special situations, a design exception is required in order to allow the width of a bridge to match the width of the trail connecting to it. Refer to Section 3.3.3 above for additional information about design exceptions
- Vehicle-rated bridges will only be specified when they are justified for maintenance, emergency or security access. The justification will be dependent on the site and maintenance program. If determined to be used for vehicle access, a bridge should generally be able to support the weight of a light duty emergency vehicle
- A goal of the district is to reduce, restrict and limit the need for maintenance vehicle access over bridges by placing trash receptacles and other 'high maintenance' site amenities close to the main access points
- If maintenance or emergency/security staff need access to a site's interior, make sure the trail intersections have wide radii and gentle turning movements; i.e., no 90 degree turns or 'T' intersections
- Provide a minimum of one 8 foot wide trail to one end of a bridge or boardwalk for routine maintenance
- If site amenities or structures are in a site's interior and will require vehicle access for routine maintenance (e.g., play equipment, shelter, bridge/boardwalk, sport court, etc.) then a trail with adequate width and proper load capacity must be provided
- Adjust maintenance service delivery measures and design the site to reduce vehicle trips or access into the site's interior
- Some sites may have reduced trail widths or surfacing modifications to meet the intent
 of the NRFP, which calls on staff to: "Plan, provide and manage appropriate
 maintenance access routes, where required, that minimize impacts to natural resource
 areas by designing them with minimal impervious surfaces and widths."

4.8.3 Materials

The district has traditionally used natural wood for its bridges and boardwalks. Over the past several years, the use of recycled plastic lumber has been used in an effort to be more sustainable. Other materials may also prove to be useful, depending on site conditions, costs

and other factors. The following matrix in Table 3J can be used to determine an appropriate surfacing treatment based on a variety of site characteristics. Please note that the following should also be used when determining surfacing materials for stairs or overlooks.

Table 4E. Bridge / Boardwalk Surfacing Matrix.

| | | Tı | Trail Conditions (3 = Better Suited / 1 = Lesser Suited) | | | | | | | |
|-----------------|----------------------------|----------------------|--|-------------------|---------------------------|-----|------|------------------------|--------------------|-------------------------------|
| | | Shaded Conditions | Sun Conditions | Vehicle Access | Active Use (jog/ bike) | ADA | Cost | Ease of Maintenance | Wetlands/ Water | Durability/ Sustainability |
| | IPE | 1 | 3 | TBD | 1 | 3 | 1 | 3 | 3 | 3 |
| | Treated Wood | 2 | 2 | 2 | 2 | 3 | 3 | 2 | 1 | 2 |
| ing | American Plastic Lumber | 2 | 2 | 1 | 3 | 3 | 2 | 2 | 3 | 2 |
| Trail Surfacing | Fiberglass Grating | 3 | 2 | 1 | 2 | 2 | 1 | 3 | 3 | 2 |
| S ii | Metal Grating | 3 | 3 | 1 | 2 | 2 | 1 | 3 | 3 | 2 |
| Tr | Concrete Slab | TBD | | | | | | | | |

As new and/or improved surfacing options become available, they should be evaluated in the same manner described in Table 3J. Consult the district's sustainability policy prior to making decisions about surfacing materials.

4.9 Mid-Block Crossings

The following provides design guidance for roadway intersection treatments. The guidelines presented in this plan represent conceptual recommendations. Specific roadway intersection treatments will be be based on further engineering analysis conducted by a registered engineer and review by the respective jurisdictional agency (City of Beaverton or Washington County).

The approach to designing crossings at mid-block locations depends on an evaluation of vehicular traffic, line of sight, trail traffic, use patterns, vehicle speed, road type, road width and other safety issues such as proximity to major attractions. When space is available, use of a median refuge island can improve user safety by providing pedestrians and bicyclists the space to perform a safe crossing.

Regardless of whether a mid-block crossing is non-signalized or signalized, the crossing should do the following:

- Be a safe distance (based on travel speeds and sight lines) from adjacent intersections and not interfere (or be interfered) with vehicle traffic flow
- Be located on flat topography to increase motorist visibility of the trail crossing
- Be as close to perpendicular (90 degrees) to the roadway as possible
- Use signage and striping to warn trail users of the upcoming roadway is strongly recommended
- Maintain clear sight lines between trail users and motorists by clearing or trimming vegetation obstructions
- Provide a center median refuge if the crossing is more than 75 feet from curb to curb or as directed by the agency with jurisdiction

When a proposed trail mid-block crossing is within approximately 300 feet of an existing signalized pedestrian crosswalk, the trail should be routed to it. This will avoid potential traffic signal operation problems and reduce motorist confusion. For this alignment to be effective, barriers, signage or offset trail alignments may be needed to direct trail users to the signalized crossing. If no pedestrian crossing exists at the signal, modifications may be required to accommodate a safe crossing.

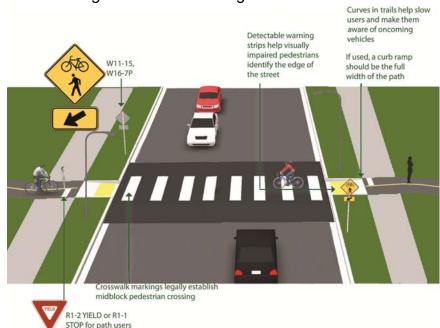

Figure 4H – Mid-block non-signalized trail crossing of a local/residential street.

4.9.1 Non-Signalized Crossings

Non-signalized crossings are most likely to occur at local/neighborhood roadways and some collector roadways. Non-signalized crossings may be appropriate when maximum traffic

THPRD Trails Functional Plan

volumes are less than 9,000-12,000 ADT (average daily traffic) vehicles and maximum travel speed is 35 MPH (miles per hour). Non-signalized crossings may be appropriate with traffic volumes up to 15,000 ADT on two-lane roads and up to 12,000 ADT on four-lane roads, if a median refuge island is provided in both scenarios.

Typical treatments at these crossings include:

- Continental striping, if allowed by the agency with road jurisdiction
- Signage
- Sidewalk improvements, such as ADA transitional ramps
- Vehicle bollards at trail access points
- Street lighting
- Median refuge islands if appropriate
- Speed hump or raised crosswalk on roadways with low to moderate traffic volumes (under 12,000 ADT) and a need to control traffic speeds

Trail design features that may be used to warn trail users of an upcoming roadway crossing may include the following:

- Curves in the trail to help slow trail users and raise awareness of oncoming vehicles
- Detectable warning strips help visually impaired pedestrians identify the edge of the street
- Signage

4.9.2 Signalized Intersections

Signalized crossings are most likely to occur at arterial roadways and some collector roadways. There are different scales of signalization, depending on traffic capacity, speed and trail user volume.

A signalized intersection should include all of the same treatments as a non-signalized crossing, plus the addition of a traffic control device. The addition of a traffic control device, such as a traffic signal or flashing beacon, provides increased protection for trail users.

Typical traffic control devices used by the district, as approved by the City of Beaverton or Washington County, include the following:

• Rectangular Rapid Flashing Beacons (RRFB) act as lit warning devices to supplement the trail crossing warning signs at uncontrolled approaches

THPRD Trails Functional Plan

- Pedestrian Activated Hybrid Beacons (also known as HAWK signals) alert motorists to stop
 when trail users are crossing mid-block. When not activated, the signal is dark. When
 activated, the overhead signal begins flashing yellow, followed by solid yellow, advising
 motorists to prepare to stop. The signal then displays two solid reds allowing bicyclists and
 pedestrians to safely cross. Finally, an alternating flashing red signal indicates that
 motorists may proceed when safe, after coming to a full stop.
- Full Traffic Signal is a typical traffic signal with a green light always shown. When
 activated by a bicyclist or pedestrian, the light changes to yellow, then red; allowing the
 user to safely cross with a "Walk" indicator. Full traffic signal installations must meet
 MUTCD pedestrian standards for schools or modified warrants, which include: being
 located where a shared use path intersects with a high volume, high speed roadway,
 with traffic volumes exceeding 15,000 ADT and vehicle speeds exceeding 40 MPH.

Unlike non-signalized crossings of local or residential street, each signalized crossing (regardless of traffic speed or volume) requires additional review by a registered engineer and the agency having jurisdiction of the roadway to identify sight lines, potential impacts on traffic progression, timing with adjacent signals, capacity and safety.

4.9.3 Grade-Separated Crossings

Grade-separated crossings may be appropriate where a path intersects with a high volume, high speed roadway, with traffic volumes exceeding 25,000 ADT and vehicle speeds exceeding 45 MPH. Due to considerable cost and complexity of design, grade separated crossings are limited to unique situations and usually in partnership with a local jurisdiction. Typical grade-separated crossings include:

- Undercrossing
- Overcrossing

Safety and ADA accessibility is a foremost concern with both types of crossings. In undercrossing situations, the trail user may be temporarily out of sight from public view or experience and environment with poor visibility. To ensure safety and security concerns are met, both types of crossings must be spacious, well-lit and visible to public view. Flooding and/or standing water may also pose a problem for undercrossings requiring the need for periodic cleaning and/or draining (especially after storm events for those undercrossings that may be located within greenways).

4.10 Risk, Safety and Security

4.10.1 Crime Prevention Through Environmental Design (CPTED)

Along with the desire of creating well-designed trails for its residents, the district is also intent on ensuring the safety and security of its trails and facilities. To help make this possible, the following fundamental CPTED principles should be considered.

Access

- Establishment of clearly defined trail entries and facilities for trail users to easily access and move about
- Establishment of clearly defined trail boundaries to differentiate between public and private spaces

Visibility

 Maintain open sight lines throughout a trail corridor in order to promote natural surveillance and the "see and be seen" concept

4.10.2 Scan Analyze Response Assess (SARA)

SARA is a four-step process to quickly address situations that occur in the field, and is described as follows:

- Scan observe what the situation is, to determine what possible factors are the cause
- Analyze determine what possible solutions could be implemented to correct
- Response implement solution
- Assess evaluate if the solution corrected the situation or if additional measures need to be taken

4.10.3 Sight Distance

Maintaining adequate sight distance for trail users is key in providing a safe trail system. This includes ensuring visibility for (and of) trail users at mid-block crossing locations, steep slopes and switchbacks, tight curves, wooded areas and any other situation where sight lines could be impaired due to site conditions.

4.11 Maintenance & Operations

Maintenance operations of district trails fall into one of two categories: park maintenance or natural resources maintenance.

- Park maintenance is responsible for hard surface trails in order to provide safe and open access opportunities for people to recreate, travel, play and enjoy the outdoors
- Natural resources maintenance is responsible for soft surface trails in order to lessen human impacts and allow natural processes to continue, while providing safe passage for people where appropriate

Please refer to the district's PFP for additional information relating to park maintenance and the NRFP for additional information relating to natural resources maintenance. Trail maintenance operations fall into both categories and consist of the following:

4.11.1 Trail Management Program

THPRD's Natural Resources & Trails Management department administers the district's approved Trails Management Program. The goal of the Trails Management Program is to provide high quality trail systems that safely and sustainably connect people and communities. When the program is successful, these conditions will be met:

- Trails will meet safety standards
- Trail stakeholders, such as district departments and volunteers, will know their role
- Trail information will be available to the public

Trails management is a team effort, requiring the cooperation of multiple departments. The Natural Resources & Trail Management department has the lead role to coordinate the strengths of trained volunteers and the Maintenance Operations, Design & Development, Risk Management, and Security Operations departments to recognize and recommend physical and service improvements to our district's trail system. Please refer the program document for more detailed information about trails management.

4.11.2 Safety Inspection Training Program

As part of the Trails Management Program, the district uses a Safety Inspection Training Program. This program trains district staff to be aware and able to identify potential hazards along the trail system, such as overhanging tree limbs, deteriorating trail surfaces or substandard trail sections. These inspections are conducted annually and are prioritized accordingly. Those hazards posing immediate safety concerns to trail users are moved to the top of the list and addressed immediately. All other potential hazards are rated using a risk assessment matrix for future inclusion in the district's capital maintenance replacement program. The Trails Analysis Form is included in the Appendix for reference.

4.11.3 Maintenance Standards Manual

In addition to the district's Trails Management Program, additional standards and guidelines for trail maintenance can be found in THPRD's Maintenance Standards Manual. Please refer to this manual for district standards and guidelines related to trail maintenance practices. This manual is intended to work in tandem with the Trails Management Program and helps implement many of trail management principles.

THPRD Trails Functional Plan

4.11.4 Maintenance Vehicle Access Guidelines

In general, regional and community trails should be designed with maintenance and emergency vehicle access in mind. This includes not only the paved trail, but also any bridges or boardwalks along a trail corridor. However, not all bridges and boardwalks need to be vehicle rated if adequate access can be provided from either end of a bridge or boardwalk. Additional guidance can be found in Section 3.3.8.b above.

5. Implementation & Development / How We Get There

5.1 Prioritization Criteria for Trail Development

The 2006 Trails Master Plan established eight goals for the district's trail system:

- Providing recreation opportunities
- Trail development and regional connections
- Access
- Community linkages
- Amenities
- Maintenance and emergency access
- Preservation
- Funding

These eight goals provided the framework in the establishment of the prioritization criteria discussed in the next paragraph.

With the help of the Trails Advisory Committee and staff, selection criteria were developed to establish the framework for the trail prioritization criteria matrix, Table 4A below. The criteria were used to establish priority recommendations for new trails and upgrades to existing substandard trails. These priorities will be implemented by the district's board of directors through the annual budgeting process. Priorities will largely be set based on the funds that are available and applicable for each category (i.e. capital funding to be used for replacement projects on existing trails, site development changes used for new trail improvements).

The spring 2015 survey indicated that respondents believed the district should allocate its resources in the following order: 1) constructing new trails and 2) upgrading existing substandard trails. Although not specifically asked, it can be inferred that land acquisition for new trails should be a priority of the district because of the desire by survey respondents to see new trails constructed.

As such, there may be extenuating circumstances when land acquisition will take precedence to new trail development or enhancement. Land acquisition is often driven by market conditions, a property owner's willingness to sell, public or private partnerships and other factors. The district will continue to actively pursue land for trails in those areas where no service currently exist, including current and future service areas. In areas currently served, the district will be most interested in acquiring land that will fill gaps in or extend the existing trail network.

Table 5A represents thirteen prioritization criteria that will be used to determine how the district will use its resources for trail development, whether it is the enhancement of existing substandard trails or the development of new trails. In order to better prioritize trail projects

throughout the district, each criterion is weighted based on district policies and desired outcomes. As projects arise, they will be scored and placed in one of two priority areas. Projects scoring 30 or higher will be considered Tier I projects, or high priority projects; projects scoring 29 or lower will be considered Tier II projects, or medium priority.

Table 5A – Trail Prioritization Criteria Matrix.

| Cuitouio | Point Scale (3 = High / 1 = Low) | | | | |
|--|--|--|---|--|--|
| Criteria | 3 | 2 | 1 | | |
| Citizen-Initiated Project Support | Generally Supported by Residents Adjacent to Trail | Generally Supported by the Community At-Large | Neutral or Generally Not Supported | | |
| Located in Environmental Justice Area* or CDBG Designated Area | Within a Significantly Above Average Area | Within an Above Average Area | Within an Average or Below Average Area | | |
| Located in an Underserved Area | No Trail Access (within 1-mile) | Limited Trail Access (within 1-mile) | Adequate Trail Access (within 1- mile) | | |
| Locational Proximity to Residents Served | Surrounded by In- District Residents | Partially Surrounded by In-District Residents | Surrounded by Out- of-District Residents | | |
| Number of Residents Served | More than 1,000 | 500 to 1,000 | Less than 500 | | |
| Overcomes Barriers | Major Improvement (off-street) | Moderate Improvement | Minor or No Improvement (on-street) | | |
| Potential for Access to Scenic / Natural Areas | More than 75% of the Trail Corridor | 30% to 75% of the Trail Corridor | Less than 30% of the Trail Corridor | | |
| Property Ownership | District Owned (fee- simple or easement) | District Owned & Public Right of Way | Public Right of Way (on-street) | | |
| Proximity to Major Destinations / User Generators (parks, schools, transit, commercial centers, etc.) | Less than ½-Mile | ½-Mile to 1-Mile | More than 1-Mile | | |
| Regional Benefits | Improves Access to Regional Areas of Interest | Improves Access to Local/Community Areas of Interest | Improves Access to Neighborhood Areas of Interest | | |

| Criteria | Point Scale (3 = High / 1 = Low) | | | |
|------------------------------|---|--|--|--|
| Cillena | 3 2 | | 1 | |
| Trail Connectivity | Fills a Gap in the Trail System | Improves a Substandard Portion in the Trail System | Does Not Fill a Gap or Improve a Substandard Segment in the Trail System | |
| Trail Ease of Implementation | Minor Site Work | Moderate Site Work | Major Site Work | |
| Staff Judgment | Does this project make sense in this location? Does this project fill a specific need or service? How long has this area had an unmet need? | | | |

^{*}based on information produced by Metro

It should be noted that much of the district's future regional and community trail system is located within environmentally sensitive areas, such as creek corridors. These trail corridors have been identified on the 2015 Trail System Map (Figure 3C) as study areas, which mean they do not have a defined trail alignment at this time.

Instead, these study areas will be analyzed using both the Trail Prioritization Criteria Matrix above (Table 5A) and the district's NRFPs Site Development Suitability Criteria (Table 5A of that plan) to determine an appropriate trail alignment. This could result in the recommendation that a trail, or portion of a trail, be located outside of the resource area (possibly as an onstreet connection). Where the TFP trail prioritization criteria indicates a high priority for trail development and the NRFP site suitability criteria indicates a high priority for natural resource function, it shall be up to the district's management team and/or board of directors to determine which priority takes precedence.

For those trail corridors located within an environmentally sensitive area but not identified on the trail system map in a study area, this same feasibility analysis will take place in order to determine the most appropriate trail alignment.

5.1.1 New Trail Construction

Prioritization of new trail development projects is based on the trail prioritization criteria identified in Table 4A. Prioritization also takes into consideration the district's existing trail network as shown in Figure 3A. Tables 5B and 5C identify development priorities for future trails.

Table 5B - Tier I (High) Priority Projects.

| Trail Name / Segment Number | Description |
|-------------------------------|--|
| Beaverton Creek Trail #1 | THPRD Boundary to 185 th Avenue |
| Beaverton Creek Trail #2 | 185 th Avenue to 170th Avenue |
| Beaverton Creek Trail #3 & #4 | Westside Trail to Hocken Avenue |
| Waterhouse Trail #4 | Willow Creek Greenway to Cornell Road |

Table 5C – Tier II (Medium) Priority Projects.

| Trail Name / Segment Number | Description | |
|---|---|--|
| Beaverton Creek Trail #3 | 170 th Avenue to Westside Trail | |
| Cedar Mill Creek Trail #4 | 114 th Avenue to Foege Park | |
| Fanno Creek Trail #5 | Scholls Ferry Road to 92 nd Avenue | |
| South Johnson Creek Trail #5 | Lowami Hart Woods to Brookhaven Park | |
| Westside Trail #12 – #14 | Merlo Light Rail Station to Sunset Highway | |
| Westside Trail #15 – #19 | Sunset Highway to THPRD Boundary | |
| Westside Trail | Sunset Highway Crossing | |
| Remaining trail segments to be determined | | |

5.1.2 Existing Trail Enhancements¹

Prioritization of enhancement trail projects is based on the trail prioritization criteria found in Table 5A. Prioritization also takes into consideration the district's existing trail network as shown in Figure 3A. In many cases, these represent trails that are narrower than district recommendations or have bridges or boardwalks that are narrower than the trail approaches. In either case, these scenarios cause pinch points along the trail system, increasing safety concerns and decreasing trail functionality for trail users. Tables 5D and 5E highlight enhancement priorities for existing trails.

Table 5D - Tier I (High) Priority Projects.

| Trail Name / Segment Number | Description |
|-----------------------------|----------------------------------|
| Waterhouse Trail #6 | Jocelyn Drive to West Union Road |

¹ Existing substandard trail improvement projects that increase capacity and functionality – such as increased widths and curb cuts – are not SDC eligible. Funding for these types of projects is generally associated with grants, bonds or other funding sources. In limited circumstances, these projects may be associated with a maintenance project – such as a trail overlay – and funded through the General Fund.

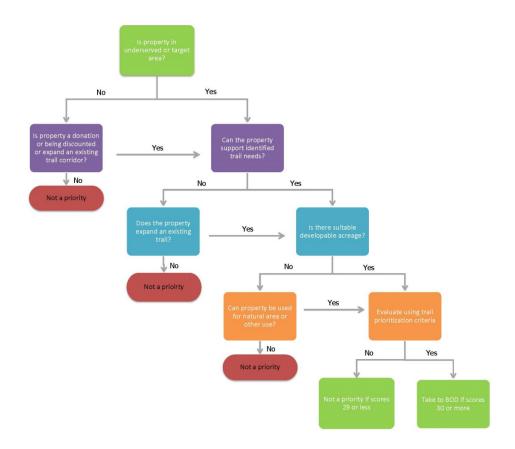

Table 5E - Tier II (Medium) Priority Projects.

| Trail Name / Segment Number | Description | | |
|---|----------------------------|--|--|
| Westside Trail #2 – #4 | Scholls Ferry to Nora Road | | |
| Westside Trail #5 | Rigert Road to Hart Road | | |
| Westside Trail #6 | Hart Road to Burntwood Way | | |
| Remaining trail segments to be determined | | | |

5.2 Land Acquisition / Right of Way

THPRD's Planning and Design & Development departments use its *Acquisition Parameters Guide*, which outlines how the district acquires properties. This includes land acquired as fee simple, easements and donations. As part of its due diligence, the district uses an extensive process of inventorying potential properties for acquisition. This process is highlighted in the following illustration (Figure 5A) and helps to determine site suitability for trail development. This process, initially created and used as part of the 2008 bond measure land acquisition strategy, has been updated to include the trail prioritization criteria outlined in the above.

Figure 5A – Land Acquisition Site Suitability Flow Chart.

In addition to the flow chart, a number of questions are also asked when determining acquisition and prioritization of potential trail sites. These include the following:

- Does it make sense to develop a trail at this location?
- Does this site fill a specific need or service?
- Is this a unique opportunity?
- Can the site fulfill its intended purpose?
- What are potential costs for future trail development (utilities & infrastructure, trail constructability, etc.)?
- Does it serve a multipurpose opportunity for a trail, park, natural area and/or athletic facility, or is it just a trail?
- Is it a key piece to expand an existing trail?

As opportunities arise, properties will be scored and placed in "high", "medium," or "low" suitability trail sites.

5.3 Funding Strategies

5.3.1 Capital Improvement Program (CIP)

The district's capital improvement program (CIP) is a combination of deferred maintenance capital projects and SDC development projects. Additionally, the CIP takes into account the project priorities outlined above. Projects in the CIP are then funded through the district's budgeting process with either general funds or SDC funds. Grants, partnerships, donations and volunteers may also be solicited to help fund projects identified in the CIP in an effort to maximize district resources.

5.3.1.a Property Tax / General Fund

The district's primary funding source is property tax revenue. This revenue goes into the district's general fund and is then allocated for capital projects and maintenance operations on an annual basis. This fund is typically prioritized toward capital replacements.

5.3.1.b System Development Charges / SDC Fund²

The district's main source of funding for new trail improvements comes from its system development charges (SDC) fund. Since 1997 the district has collected fees on new residential and commercial development occurring within its service area. These fees can only be used

² Existing substandard trail improvement projects that increase capacity and functionality – such as increased widths and curb cuts – are not SDC eligible. Funding for these types of projects is generally associated with grants, bonds or other funding sources. In limited circumstances, these projects may be associated with a maintenance project – such as a trail overlay – and funded through the General Fund.

THPRD Trails Functional Plan

for new trail development or improvements to existing trails that expand capacity necessitated by new development. SDC funds cannot be used for capital replacement or maintenance purposes.

5.3.2 Developer SDC Credit Projects

In lieu of paying SDC fees at the time of development, developers may enter into a memorandum of understanding (MOU) to construct trail improvements for the amount of estimated SDC fees that would normally be charged. The MOU outlines specific trail improvements to be constructed for which credit will be issued. The MOU also includes language to ensure that such trail improvements meet district design standards and guidelines.

5.3.3 Grants

Grant sources include private foundations, public agencies, such as the Oregon Parks and Recreation Department, the Oregon Department of Transportation, Metro, and other agencies. Grants can be used to acquire land, fund an entire trail development and/or just a portion of a trail, such as a bridge, signage or trailhead amenities. Grants can also be used for new trail development or enhancement of existing trails and facilities. The district will typically use SDC funds as a local match in order to leverage grant funds.

5.3.4 Donation / Volunteer / Partnership

In certain instances, trail improvements are donated to the district or provided to the district. This could include land, materials, products and/or labor for the construction or maintenance of trail improvements. In most instances, this occurs in conjunction with improvement projects of other public agencies, such as Metro, Washington County, Clean Water Services or the City of Beaverton. In some instances, trail improvements can come from private development or community groups seeking improvements of trail facilities in their neighborhoods.

5.3.5 Bond Funding

The district may pursue the issuance of bonds if approved by voters during a general or special election. Bond funds can be used for a variety of projects based on how the bond is crafted, including land acquisition, new trail development, redevelopment of existing trails, capital replacements or a combination of these items. Bond funds can be short-term or long-term, and can be used for specific projects or many different projects.

6. Success Monitoring / How Are We Doing

6.1 Performance Measures

Perhaps the simplest measures for gauging district progress are tracking:

- Number of master plans completed
- Miles of new trails constructed
- Number of capital replacement projects completed
- Miles of substandard trails enhanced

While the district will monitor these items, they cannot be stand-alone measurements as many factors can influence targeted outcomes. Budget constraints, shifts in priorities, environmental considerations and other such factors can impact the length of time to complete projects or acquire land.

Additional performance measures that can be used by the district include:

- Trail system completion
- Trail system connectivity
- Access and proximity to population
- Trail maintenance
- Trail user satisfaction
- Trail user profile
- Trail user counts

6.2 Monitoring Procedures

The district will use a variety of methods to monitor its successes, or shortfalls, in achieving its expectations. Monitoring of expectations will occur on an annual basis or a multi-year basis depending on outcomes being monitored. The following table identifies specific monitoring procedures to collect data on those performance measures listed above.

Table 6A – Performance Measures and Monitoring Procedures.

| Performance Measure | Monitoring Procedure(s) | Additional Notes |
|------------------------------|----------------------------|--|
| System Completion | GIS evaluation | Maintain GIS database of trails to include attributes such as trail surface, trail width and date of construction |
| Trail System Connectivity | GIS-based model | Use GIS model developed through Rails to Trails Conservancy Trail Modeling and Assessment Program (T-MAP) to inventory and analyze the district's trail system in relation to regional and nationwide trail networks |

| Performance Measure | Monitoring Procedure(s) | Additional Notes |
|------------------------------------|----------------------------|--|
| Access and proximity to population | GIS evaluation | Determine locations of access, quality of access using GIS to determine percentage of households or percentage of population within a half mile of accesses |
| Trail Maintenance | Routine operations | Conduct systematic risk assessment (inspections of railings, bridges, surfaces, signage, etc.; evaluation and removal of debris; emergency response protocol; tracking of incidences and safety issues; vegetation control) |
| Trail Maintenance | Remedial operations | Correct significant defects (resurfacing, repainting, repairing, etc.) |
| User Profile/ Satisfaction | Survey | Gather data on type of use, amount of use, distance traveled, amount of money spent, where money is spent. Information can feed into an economic and health impact assessment. Multiple examples of these analyses can be found around the country and the T-MAP program is also developing these national tools that can be used here |
| Counts | Field counts | Automated or manual calculation of ADT |

Any successful monitoring process includes effective communication of outcomes. As part of the district's effort, it will provide periodic updates or reports to the management team and board of directors on key elements in the monitoring process, including miles of trails completed, identification of most heavily used trail segments (based on trail counts) and where critical gaps in the trail system exist.

Communication with the public is also important and may include updates on initiation of trail master planning, new trail construction and completion of trail development projects. Project updates and highlights of specific trails may be included on the district's website, in its activities guide and/or in its monthly e-newsletter and quarterly newsletter. Any communication intended for the public needs to be coordinated with the district's Communications & Outreach Division.

6.2.1 Short Term Monitoring

One of the easiest ways for the district to gauge whether it is improving its trail system is through its annual maintenance inspection process. Each year all district assets, including trails, are evaluated and placed into the deferred maintenance database. This database is used to help prioritize capital replacement projects during the budgeting process. As replacement projects occur, including updates to trail facilities and amenities, these items can be tracked against the trail inventory completed in spring 2015.

THPRD Trails Functional Plan

Trail user surveys are another way the district can monitor whether or not expectations are being met or if access to trails is improving. Although these types of surveys are not scientific or statistically valid, they do provide a method of getting immediate feedback from the people on the trails. Analysis of trail counts is another method for tracking trail usage and can often reinforce information gathered from user surveys and inspections.

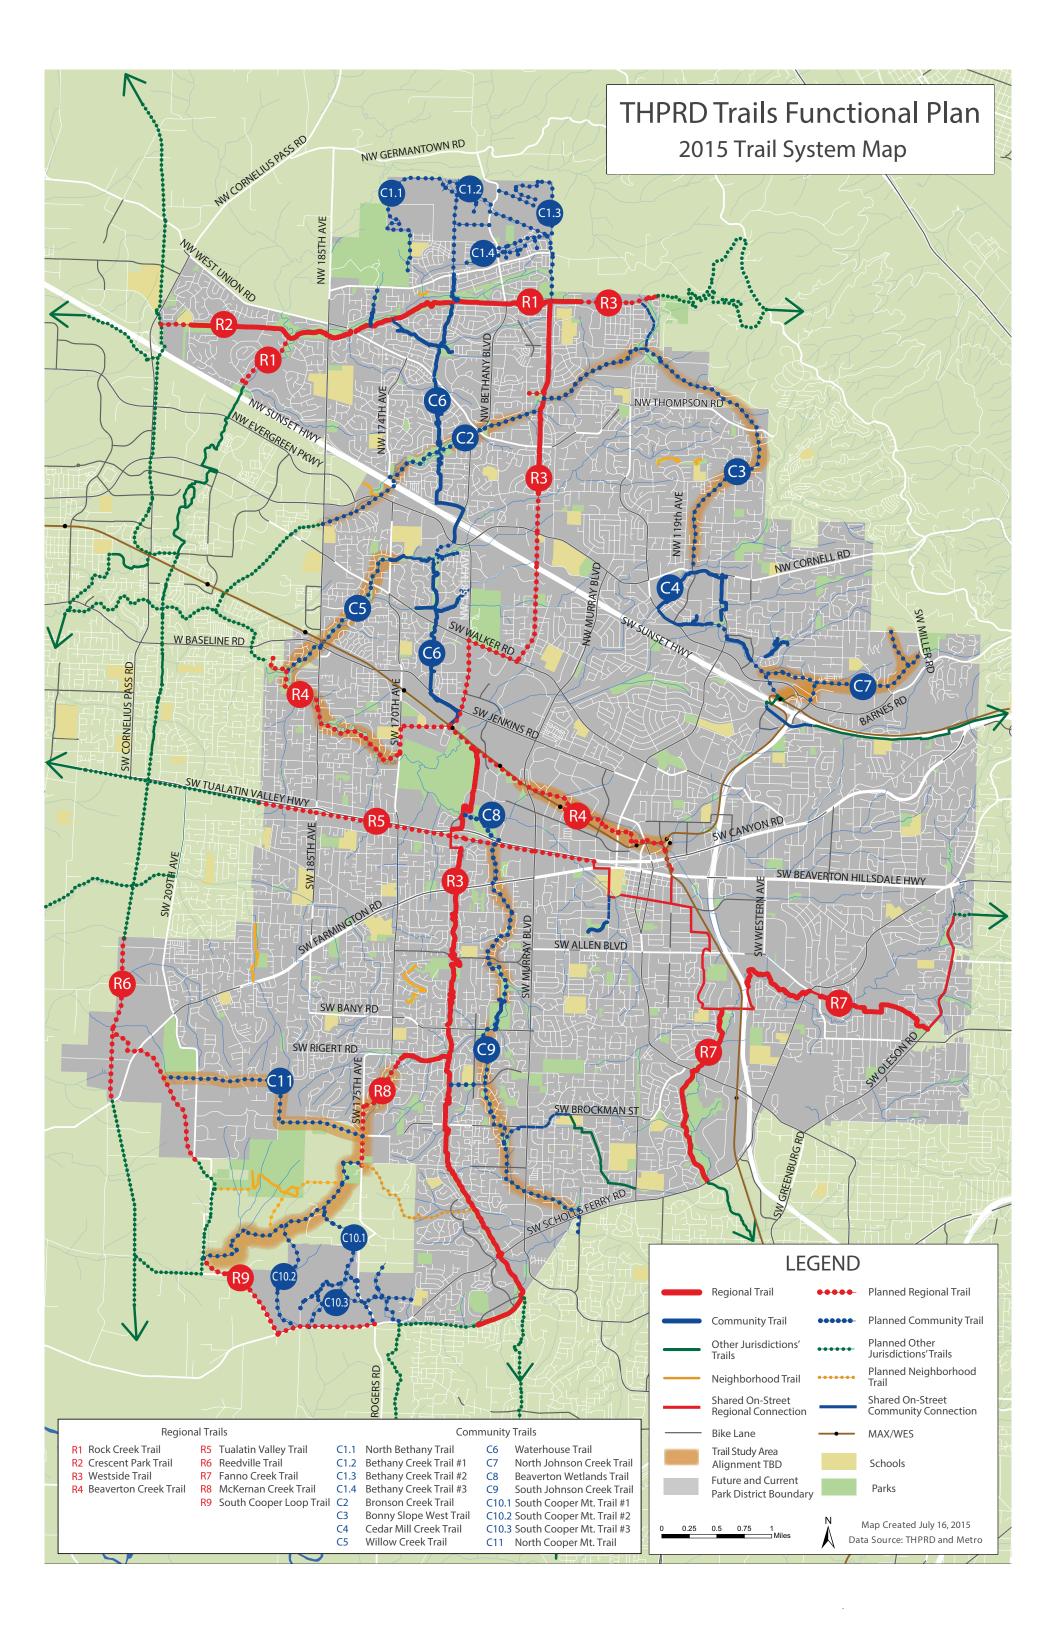

6.2.2 Long Term Monitoring

Because projects such as master plans, new trail development, and existing trail enhancement often take more than one year to complete, it is more effective to monitor for success on a 3-5 year basis. Tracking projects identified in the district's annual budget is one of the easiest ways to track progress, comparing projects completed on time versus those that get delayed or eliminated.

Trail user profiles, and access to user populations, and other demographic information are also better gauged on a long-term basis. These types of analysis tend to be more useful in ensuring all residents have access to the trail system as well as reinforcing the positive benefits trails provide to the community.

MEMO

DATE: November 25, 2015 **TO:** The Board of Directors

FROM: Doug Menke, General Manager

RE: General Manager's Report for December 7, 2015

System Development Charge Capital Improvement Program

With the completion of the Parks and Trails Functional Plans, plus the anticipated adoption of a new SDC Methodology, it is the appropriate time to update the five-year SDC Capital Improvement Program (CIP). This update will be different than prior updates in that it will be driven by the priorities identified in the functional plans, but will also be directed by the capital projects list in the new methodology. As such the CIP project list will be created from scratch rather than updating the existing SDC CIP. The CIP will also reflect development activity and project commitments in the new urban service areas (North Bethany, South Cooper Mountain, and Bonny Slope West).

The district has already received interest from residents near potential new park sites in providing input into the priority sites to be identified in the new CIP. As such the process of developing the proposed CIP for board consideration will include two community meetings to solicit public input, as well as an opportunity for on-line input on the district web page. We are also using our regular contacts at NAC and CPO meetings to inform residents about the opportunities to provide input. A rough summary of the planned timeline is as follows:

- December complete estimation of five-year SDC revenue, land acquisition commitments in the new urban areas, and priority project list based on the functional plans.
- January provide opportunity for public input as noted above.
- February provide a prioritized project list for board review.
- March request board approval of the new five-year SDC CIP.

Audit Report on THPRD Financial Statements for Fiscal Year 2014/15

The Comprehensive Annual Financial Report (CAFR) for the year end June 30, 2015 will be delayed to January 31, 2016. The reason for the delay is to provide the district's auditor, Talbot Korvola & Warwick (TKW), and the district's pension plan holder, The Standard, additional time to implement the new pension accounting requirements on behalf of the district. The Government Accounting Standards Board (GASB) released Statement No. 68 impacting accounting and financial reporting for pensions. Fiscal year ended June 30, 2015 is the first year GASB 68 is implemented. The CAFR will be filed before the Municipal Securities and Rulemaking Board (MSRB) deadline to meet all continuing disclosure filing requirements.

Summer Special Events Recap

The 2015 summer special events season was once again a big success, with great entertainment, food and many happy attendees. At the December meeting, Superintendent of Programs and Special Activities Lisa Novak will be sharing highlights of our recent summer events and activities.

Conestoga's Program Standards Manual Honored by the Learning Resources Network Conestoga Recreation & Aquatic Center recently developed a Program Standards Manual, an evolving guidebook that encompasses the criteria expected for Conestoga's facility presentation, program objectives and instructor expectations. By documenting and qualifying Conestoga's standard benchmarks, staff is able to best evaluate the experience our patrons are receiving based on the guidelines laid out in both a written and visual manner.

In October 2015, Conestoga submitted and received a Management Practice award for the manual from Learning Resources Network (LERN). LERN is the world's largest association in continuing education and lifelong learning, offering information and consulting expertise to providers of continuing education and recreation.

THPRD's New Website Receives Award

THPRD's newly redesigned website has been recognized for professional excellence. The site received a W³ Silver Award in the "user experience" category. The W³ is sanctioned and judged by the Academy of Interactive and Visual Arts, which consists of professionals from media, interactive, advertising, and marketing firms.

Board of Directors Meeting Schedule

The following dates are proposed for the board of directors and budget committee's meeting schedule over the next few months:

- January Regular Board Meeting <u>Tuesday</u>, January 12
- February Regular Board Meeting Monday, February 1
- Mid-Year Budget Review Meeting Monday, February 22
- March Regular Board Meeting Monday, March 7

MEMO

DATE: November 24, 2015

TO: Doug Menke, General Manager

FROM: Aisha Panas, Director of Park & Recreation Services

RE: Resolution Appointing Advisory Committee Members

Introduction

Staff requests board of director's appointment of 27 advisory committee members to three new committees.

Background

In June 2015, the board voted to restructure the advisory committee system into three new committees:

- <u>Nature & Trails</u>: Guides management of natural areas, associated community engagement, trail use, and trail development. Subject areas include natural areas, wildlife, environmental education, and both paved and soft surface trails.
- <u>Parks & Facilities</u>: Reviews development and use of outdoor physical assets, buildings and associated community engagement. Subject areas include developed parks, athletic facilities, program facilities, ADA access, historic properties, and community gardens.
- <u>Programs & Events</u>: Ensures THPRD meets program service delivery goals. Subject areas include programming, cost recovery, diversity and inclusion in environmental education (content covered by Nature & Trails), recreation, sports, volunteering, and aquatic activities.

Members of existing committees were offered the opportunity to move to the new structure, which allows a maximum of nine members per committee. Staff engaged in a community-wide recruitment drive in order to encourage a diverse range of THPRD patrons to participate in the new committee structure. The following table shows the number of returning committee members and the number of new applicants:

| Committee Name | Returning Members | New Applicants |
|--------------------|-------------------|----------------|
| Nature & Trails | 9 | 0 |
| Parks & Facilities | 4 | 8 |
| Programs & Events | 1 | 8 |

The Nature & Trails committee was filled with returning members. Programs & Events had one returning member and eight new applicants which filled the committee. The Parks & Facilities committee had four returning members and eight new applicants, exceeding the limit. Staff's recommendation to fill the five open seats for the Parks & Facilities committee is shown below.

All committees will have their first meeting on January 18, 2016, 6:00 pm at the Fanno Creek Service Center, which will include an orientation and goal setting session.

Proposal Request

Because there are three more applicants than spaces on the Parks & Facilities committee, staff reviewed applications for relevant experience and a balance of interests, and recommend appointments in the following order:

- 1. Sue Rimkeit
- 2. Steve Pearson
- 3. Virginia Bruce
- 4. Kevin Apperson
- 5. Sharad Mishra
- 6. Krista Mancuso
- 7. Nanda Siddaiah
- 8. Galit Pinker
- 9. Layton Rosencrane

The following applicants to the Parks & Facilities committee are qualified, but due to space limitations are not recommended for appointment:

- Kevin Bebb
- Ira Halpern
- Leslie Ray

Recommended rosters and applications for each committee are attached.

Board Member Liaisons

Another component of the new advisory committee structure is the addition of board member liaisons to each of the three advisory committees. At the request of President Pelatt, a scoring matrix was distributed to the board members in order to assist with the discussion regarding the selection of liaisons. The completed scoring matrix will be provided to the board in advance of the December 7, 2015 board meeting. Staff requests board discussion and consensus of which board members are to serve as liaisons to the new advisory committees.

Action Requested

Board of directors' approval of Resolution 2015-19, appointing advisory committee members.

RESOLUTION 2015-19

TUALATIN HILLS PARK & RECREATION DISTRICT, OREGON

A RESOLUTION APPOINTING ADVISORY COMMITTEE MEMBERS

WHEREAS, the Tualatin Hills Park & Recreation District Board of Directors must appoint committee members by resolution; and

WHEREAS, each committee member shall be appointed by the Board for a two or three year term expiring on December 31, 2017 or December 31, 2018 as noted in the attached rosters; and

WHEREAS, the selected committee members have demonstrated their interest and knowledge in the Committee's area of responsibility. Now, therefore

THE TUALATIN HILLS PARK & RECREATION DISTRICT RESOLVES AS FOLLOWS:

The Board of Directors approves the appointment of advisory committee members to the Nature & Trails, Parks & Facilities, and Programs & Events Committees.

Duly passed by the Board of Directors of the Tualatin Hills Park & Recreation District this 7th day of December 2015.

- 4. Have you served on other volunteer committees? YES∑ NO☐ If yes, please explain where, when, and what your responsibilities were:
 - * From 2005-2010, I served on the City of Portland's Budget Advisory Committee. On that committee I helped coordinate comments, write memos, and presented to the City Council.
 - * In 2012, I volunteered with the National Association of Environmental Professionals to plan a national conference that was held in Portland. My role was planning the President's Dinner on one evening of the conference at an off-site location.
 - * In 2008, I co-chaired the Oregon Association of Clean Water Agencies Stormwater Committee. I helped plan and facilitate meetings, maintained meeting notes, and attended Board meetings.
 - * For two years, 1999-2000, I was the local president of the Society of Women Engineers. This included running board meetings, coordinating volunteers, and facilitating a speaker seminar series.
- 5. Please describe any work experience or areas of expertise that you feel would benefit the Advisory Committee:

For the last three years, I've work in watershed management at Clean Water Services and projects have included developing and implementing monitoring of our flow restoration program in upper Tualatin River tributaries; exploring alternative stormwater management strategies; freshening our Tree For All program; and developing a communications strategy. Prior to that I worked for environmental consultant for nine years on water resources issues and planning. In addition, I have volunteered with SOLVE as a Stream Team captain. I'm excited to apply my working knowledge of the Tualatin River watershed as a member of the natural resources committee.

Natural ResourcesXX Parks

- 1. Please explain your interest in serving on the Advisory Committee:

 I am interested in serving on the Natural Resources Advisory Committee because I feel strongly that a truly livable, sustainable and appealing community is more than shopping areas, structured recreation and ball parks. Natural areas need advocacy like everything else under the Park District's oversight. More and more is becoming known on plant and animals' abilities in many species to adapt to a more urban environment if their basic habitat needs are met. In order to plan for the next 7 generations, awareness must be increased in this generation about how our day-to-day decisions impact what the District will look like in coming decades. Natural areas are asked to perform many functions. But not all those functions are equal and not all those needs should be met with one parcel.
- 2. How long have you lived in the community?

24 years

3. Have you or your family participated in any Center or other Recreation District activities?

What: Garden Home Recreation Center classes (many kid classes like gymnastics, etc), adult classes like yoga, weight room use. My daughter and I have a painted tile on the wall at Garden Home. We use Harmon pool and Raleigh Park pool. I have visited the Nature Center and Cooper Mountain several times and participated in nature walks. I helped with some restoration at Moon Shadow Park. I have walked/blked several trails including Greenway Park and Fanno Creek.

When: From 1986 to present

- Flease describe any work experience or areas of expertise that you feel would benefit the Advisory Committee:
- For the last 16 years I have worked as an environmental educator at the Water Resources Education Center funded by the City of Vancouver. In this capacity, I manage 50 acres of Columbia River wetlands, installed a Backyard Wildlife demonstration garden, develop and maintain exhibits in the Nature Center, write some grants, manage the Watershed Monitoring Network with 3 contractors and 3100 students doing water quality and habitat monitoring and develop many education programs, including Science in the Park and Second Saturday.
- For 7 years prior to that I was the earth and environmental education specialist at the Oregon Museum of Science and Industry. Duties involved designing education programs, leading field trips, doing demonstrations, writing grants and developing exhibits.
- Prior to that I work for the US Bureau of Mines as a technical editor. I have a masters degree in geology and earth science.

Question 1

I moved to Portland metro area in 1998 and have used most of THPRD facilities since then. This is my 17th year as a 'frequent user card' holder. Both my kids were born here and learned to swim and play different sports at THPRD facilities. They participated in THPRD Dive, swim, Synchro, waterpolo clubs. They now use THPRD for high school team activities. My daughter is a Jr Lifeguard and has already clocked 149 hours of volunteer work. My son volunteers at CHRC summer camps. I swam with Barracudas (masters swim club at THPRD) for 4 years and still swim laps 3 times a week at Sunset, 50 Mtr, Aloha and Connestoga. I went for voluntary annexation of my property 6 years back. My family and I have benefitted so much from the district that I feel its my turn to give it back. Since I have used gym, classes, camps, pools at almost all THPRD facilities and have worked with staff members that I think I can contribute in improving our parks and facilities.

Question 2 18+ years.

Question 3

T Hills Aquatics - 18 yearsT Hills Athletics - Badminton, Basketball, Volleyball, running track, babysitting facility for 18 yearsT Hills indoor Tennis - During rainy seasons between 2002 - 2008Sunset pool - 18 yearsConnestoga gym and pool - 18 yearsCHRC gym and weight room - 18 yearsOutdoor pool at Somerset West - summersBeaverton pool - 2002-2008HArman - 2002 - 2008PArty in the park - last 5 years or soFamily Triathlon - First 4 yearsConcerts in the park - summersSummers plays in parks Summer camps at CHRC - 2002 - 2008Summer tennis camp at sunset high tennis court - 2006-2009Connestoga tennis and sports camp - 2006-2008Kids sports camp and classes at Athletics center, Connestoga and CHRCArt classes at CHRCMusic classes at CHRCI learned to play guitar at one of the adult guitar group lesson at CHRCPilates, Aerobics and yoga classes at CHRCMost open tennis courts around townWalk regularly on trails at nature park and near my house (watehouse powerline trails).

Question 5

As you can see I am a huge user of THPRD facilities. I think this valuable experience will benefit the advisory committee.

Advisory

My family moved into this neighborhood last January after buying our first home with the intention of planting roots here and being part of our community. We love the parks, the Conestoga Recreation Center. and Beaverton. I would like to be a part of continuing the work of making Beaverton a great place to live for all citizens. As to the Parks & Facilities committee, I found the listed subjects to areas of interest: I enjoy gardening, I am a strong supporter of sports, I believe in the value of the parks and facilities, and I know that the buildings and accessibility are important to the community members.

Question 2

I purchased a home in this neighborhood last January (that I currently live in).

Question 3

My toddler son has done multiple swimming lessons at Conestoga Recreation Center. He is currently enrolled in his second session of Playschool at Conestoga Recreation Center on Mondays, Wednesdays, and Fridays. This past summer we attended the Big Truck Day at Conestoga Recreation Center, THPRD Party in the Park at HMT Recreation Complex, and the Summer Concert in the Park at Greenway Park.

Question 4

I have volunteered with the Portia Project in 2007-2009, which provided legal assistance to incarcerated women; the Student Hurricane Network in 2009, which provided legal assistance to those impacted by Hurricane Katrina in New Orleans; and various organizations while attending law school at the University of Oregon School of Law that planned events and fundraisers.

Question 5

I practiced law for two years before taking a little time off to be home with my two small children (a 2-year old and a 4-month old). I have a good eye for detail and the ability to multi-task. I have also worked in high-pressure situations and with diverse populations throughout my professional career (those facing homelessness as a development associate at a non-profit, students with disabilities as a Best Buddies Program Manager, victims of domestic violence and sexual assault as an advocate for the Marine Corps, and the public and Oregon Legislators as a committee assistant). I am excited to bring whatever experience I can to the team, whether that means baking my almost-famous chocolate chip cookies or spending days making signs for events.

Question 1

As someone who grew up swimming in THPRD pools and attending THPRD activities and events, I have a passion for the community and for all of the wonderful programs that the district provides. I have been looking to serve on a board, and strongly believe that my background in diversity/inclusion and in recreation make me a strong candidate as an advisory board member. I want to give back in a volunteer capacity, while utilizing my knowledge and professional work experience, and would love to do so for an organization that has contributed to my wellbeing, connection to nature, and sense of community.

I have lived in the Tualatin Hills district for over twenty years (with a few exceptions including college

and several months abroad in Ecuador). I have been both living and working in Beaverton for the last three years, and don't have any plan to leave!

Question 3

I have extensively used the aquatic facilities (specifically Harman & Beaverton), and grew up at the Garden Home Rec Center (library, fitness classes). I tend to visit Raleigh Swim Center during the summer, and often visit Cooper Mountain Nature House for quick runs and hikes.

Question 4

I have served on an advisory committee for the Columbia Slough Watershed Council, as they were preparing their first diversity plan for the environmental non-profit. As a board member, I actively volunteered at many canoe/kayak events, helped with outreach, and assisted with Spanish translation where needed.

I also served on the board of EducateYa, which is a Latino-based non-profit. My role was to provide direction for the organization and to provide assistance with fundraising and event outreach. In both cases, I was a resource for equity-related topics and culturally-specific outreach.

As part of my employment, I serve as the staff liaison to Beaverton's Social Service Funding Committee. My role is to facilitate the committee and to ensure a fair and open process for small social service grants to 501c3s.

Question 5

My areas of expertise have been two-fold: equity & inclusion, and aquatics/recreation. My experience has included working as the Cultural Inclusion Specialist for the City of Beaverton, as the Private Lesson Coordinator for the Mittleman JCC, & the Outreach & Events Intern for the Columbia Slough Watershed Council. I have a passion for increasing equity in recreation, particularly in outdoor/water-based activities and have experience in taking the steps to do so, which would greatly benefit the Advisory Committee. I have a lot of experience as a volunteer and managing volunteers, and through my Masters in Public Administration program, I have a strong basis in fiscal management in the public sector. My strengths include a strong understanding of public involvement implementation, cross-cultural communication, and commitment to public service. I bring a lot of enthusiasm for and experience in the Tualatin Hills community, and understand the importance of meeting program delivery goals.

Demographic Survey (optional)

I volunteered for several kid programs (including safety town) when I was younger, and at several events over the years. Most recently, I volunteered at the Beaverton Cultural Festival/Party in the Park event.

Question 1

I am interested in giving back to the community where I live, which includes my time, resources, and network. I am excited about the programs that THPRD offers and want to contribute my time to an organization which values the outdoors, recreational activities, and giving back to the community.

Question 2

I have lived in the Portland/Beaverton metro area for just over six years. Two of the most recent years I've lived in a house we own on West Slope which is very close to many of Tualatin's Hills facilities.

Question 3

1. My Fiance and I have participated in many of Tualatin Hills recreational areas. These include: Tualatin

Hills Aquatic Center (2x in 2014).

- 2. Attended many soccer games at Tualatin Hills Recreational Center (50 NW 158th Ave) Wednesday evenings for Fall and Spring- Men's league division 1 (30 over) soccer.
- 3. We also have a Bernese Mtn dog/Poodle mix that we take to Winkelman Park on Saturdays during the summer months (2015).

Question 4

No direct committee experience but I have volunteered for Doernbecher's Children Hospital:

Activities include Shamrock fair and run (March 2015)

Involved in the shirt/bib distribution and kids booth to hand out treats.

Volunteered at Oregon Food Bank August 2014 by sorting food for 4+ hours.

Question 5

- -Various recruiting activities for many businesses located in the district of Tualatin Hills.
- -Excellent communication skills both written and verbal.
- -Ability to work with many different personalities.
- -Accounting and Finance degrees
- -Strong Business Acumen
- -Live a lifestyle of wellness and love to be outdoors.

Advisory Committees

Question 1

I've been a participant in activities at Garden Home, Cedar Hill and Elsie Sthur recreation centers for 25 years. My children and grandchildren have also participated in THPRD classes over the years. We also enjoy the natural areas and frequently walk the nature trails. Over the last few years I've developed a concern that mature (over 40) adults activities have decreased. I'm concerned that the people that support THPRD with their taxes are not being included in the planning for future activities. More mature adults are looking for affordable, entry level exercise programs and are not interested in strenuous athletic classes. Also, seniors, (over 55) athletic needs are not being addressed. Elsie Stuhr is the only THPRD rec center that doesn't have a gym Because of this, team athletic events

such as volleyball, basketball etc are impossible. It is also the only center that is closed on Sundays. Many seniors are employed during the day and need to have access to exercise facilities on the weekend. I would like to be part of the advisory committee to help THPRD equalize the exercise activities for all age groups and ability levels.

Question 2

I've lived in Beaverton for the last 25 years.

Question 3

I started aerobic classes at Garden Home center around 1990. I also took a ballet class. Classes were twice a week in the evening. I also use the work out room a couple of times a week. I took aerobic classes, conditioning classes and ballroom dance class for about 4 to 5 years. My teenage daughters also took aerobics with me. I always attended at least 2 class a week sometime more during this period. Around 1995 I started gentle aerobics classes at Cedar hills center. My employment location changed and Cedar Hills was more convenient than Garden home. I took step aerobics, other aerobics classes, belly dancing and other exercise classes until I retired in 2010. I generally took 3 to 4 classes a week. Since retirement I've been taking aerobic classes 4 days a week at Elsie Stuhr, Zumba gold class at Stuhr and Zumba Gold at Cedar Hill center. I've also taking other general interest classes

Question 5

I was a employed as a case manager for Oregon Adult and Family service for 26 years. I developed skills in communication, presentation, analyzing and explaining complex issues, organizing and leading meeting

MEMO

DATE: November 20, 2015

TO: Doug Menke, General Manager

FROM: Keith Hobson, Director of Business & Facilities

RE: Resolution Naming Recently Acquired Park Property

Introduction

District staff propose board approval of a resolution naming three recently acquired park properties. These properties include a neighborhood park in South Beaverton, and a neighborhood park and a natural area in the Cedar Mill area. These naming recommendations follow extensive public outreach to park neighbors and community groups, and are consistent with District Compiled Policies (DCP) 8.05, Naming of District Property.

Background

The property in South Beaverton is a 1.2-acre neighborhood park located just east of SW Murray Boulevard at the corner of SW Weir Road and SW Old Weir Road. The park offers recreational amenities including play equipment, picnic areas and open lawn areas. The district, in partnership with the City of Beaverton, purchased the fully improved park from developer Polygon Northwest in May 2014.

The neighborhood park in the Cedar Mill area is a one-acre park located centrally within the Timberland development at the corner of NW 118th Avenue and NW Stone Mountain Lane. The park offers recreational amenities including a public plaza, splash pad, play equipment, and open lawn areas. The district acquired this fully improved park from developer Polygon Northwest in June 2015 through a System Development Charge (SDC) fee/credit project for various land donations containing park and trail improvements within the Timberland development. The board approved a master plan for the Timberland Parks & Trails SDC project in 2004 and the district implemented a Memorandum of Understanding (MOU) with the developer in 2009.

The natural area in Cedar Mill is an 8.77-acre site located in the southeast corner of the Timberland development at NW 116th Avenue and NW Cedar Falls Drive. The site offers recreational trail amenities including a portion of the Cedar Mill Creek Trail. The site contains significant natural resources and two large storm water ponds, and offers recreational opportunities such as hiking and wildlife viewing. The district acquired this fully improved natural area from developer Polygon Northwest in August 2015 through the same Timberland Parks & Trails SDC project noted above.

The natural area site also contains a historical survey control point established in 1851 to demark the Willamette Baseline, which runs east/west along the site's southern property boundary. The intersection of the Willamette Meridian and Baseline is the initial survey point for all of Oregon and Washington.

In December 2005, the board approved the name "Cedar Mill Creek Trail" for the trail that would loop around the Timberland development. The district's 2006 Trails Plan and 2015 draft Trails Functional Plan reflect this approved trail name. Also in December 2005, the board deferred the naming of the central neighborhood park within the Timberland development until the developer named the project, which was later named Timberland. In March 2006, the board approved the name "Sue Conger Boardwalk & Overlook" for the boardwalk with an overlook deck that has now also been constructed directly east of the John Quincy Adams Young House property within the Cedar Mill Creek corridor in conjunction with the Timberland parks & trails SDC project.

In November 2012, staff proposed names for the remaining four properties associated with the Timberland parks & trails SDC project. At that time, the board approved two of the four proposed names for the Cedar Mill Creek Greenway and the Cedar Mill Creek Overlook Park both located along the west side of the Timberland development, but directed staff to conduct additional public outreach for the neighborhood park and natural area, as well as a comprehensive review of the district's naming policy. Staff have now completed the additional outreach and policy work, and is returning for board approval of proposed names.

District Compiled Policies (DCP) 8.05, Naming of District Property, directs that district properties be named or renamed so as to best serve the interests of the district and its residents and ensure a worthy and enduring legacy for the district's park and recreation system. To that end it specifies that naming requests be consistent with one of three categories.

- 1. Historic Events, People, and Places, which includes naming consistent with prominent geographical locations
- 2. Outstanding Individuals
- 3. Donors

From August to November 2015, staff conducted public outreach to property neighbors, community groups, advisory committees, and interested parties for the naming of all three properties proposed herein. An initial eight-week period of outreach solicited name suggestions. Staff then developed name recommendations based on the public outreach, and this was followed by a three-week period of outreach seeking feedback on these recommendations. There was no additional community feedback that was received during the three-week outreach period with the staff recommended names for the sites.

Proposal Request

For the neighborhood park in South Beaverton, staff recommend the name Steeplechase Park. In this case, outreach revealed strong public support for a name that reflects a horse theme, which is also consistent with the street naming theme in the area. Steeplechase reflects the historic name of the adjacent neighborhood and is also a street name within that neighborhood. There are two other nearby district parks, Wildhorse Park and Buckskin Park, which are named after adjacent streets which are also consistent with the horse naming theme in the area.

For the neighborhood park in the Cedar Mill area, staff recommend the name Timberland Park due to its predominant location within the Timberland development and a belief that the community will continue to identify well with this name. It is worth noting in this case that staff received a request to name the park Leonard Uppinghouse Park after one of the district's original board members. This request came from Mr. Uppinghouse's granddaughter, and the staff reasons for not recommending this name are noted alongside the request in the public comment summary, which will be provided to the board prior to the December 7 meeting.

For the natural area in Cedar Mill, staff recommend the name Cedar Mill Creek Greenway. This is consistent with the district's site naming classifications which encourages consolidating site and trail names for sites that are functionally linked. The Cedar Mill Creek Trail runs through this natural area site, and the greenway along the west side of the Timberland development is already named Cedar Mill Creek Greenway for which the trail is aptly named. In addition to this name recommendation, based on public input received, staff are also recommending that an interpretive sign be installed at this site to commemorate the site's historical significance of the Willamette Meridian and Baseline and the original survey work of William Ives.

Staff are requesting board of directors' approval of the attached resolution which calls for the naming of three recently acquired park properties as Steeplechase Park, Timberland Park, and Cedar Mill Creek Greenway.

Benefits of Proposal

Naming the properties as proposed would be consistent with DCP 8.05 for Naming of District Property and would promote a worthy and enduring legacy for the district's park and recreation system.

Potential Downside of Proposal

There is no apparent downside to the proposed names.

Maintenance Impact

The cost of site identification signage will be the responsibility of the developer in return for SDC project credit. The district may incur minor costs for future sign maintenance.

Action Requested

Board of directors' approval of Resolution 2015-20, naming recently acquired park properties as Steeplechase Park, Timberland Park, and Cedar Mill Creek Greenway.

RESOLUTION 2015-20

A RESOLUTION OF THE TUALATIN HILLS PARK & RECREATION DISTRICT BOARD OF DIRECTORS NAMING RECENTLY ACQUIRED PARK PROPERTY

WHEREAS, the Tualatin Hills Park & Recreation District Board of Directors adopted District Compiled Policies (DCP) to guide its consideration of various district operational matters including the naming of district-owned properties.

WHEREAS, the district has acquired three new properties, has conducted public outreach to solicit suggestions for naming these three properties, and has subsequently recommended names for all three properties and conducted additional public outreach to solicit feedback on these name recommendations.

WHEREAS, consistent with DCP 8.05 inasmuch as the names preserve and honor the history of the district and the communities it serves; and, considers each site's history, geographical location, and natural features.

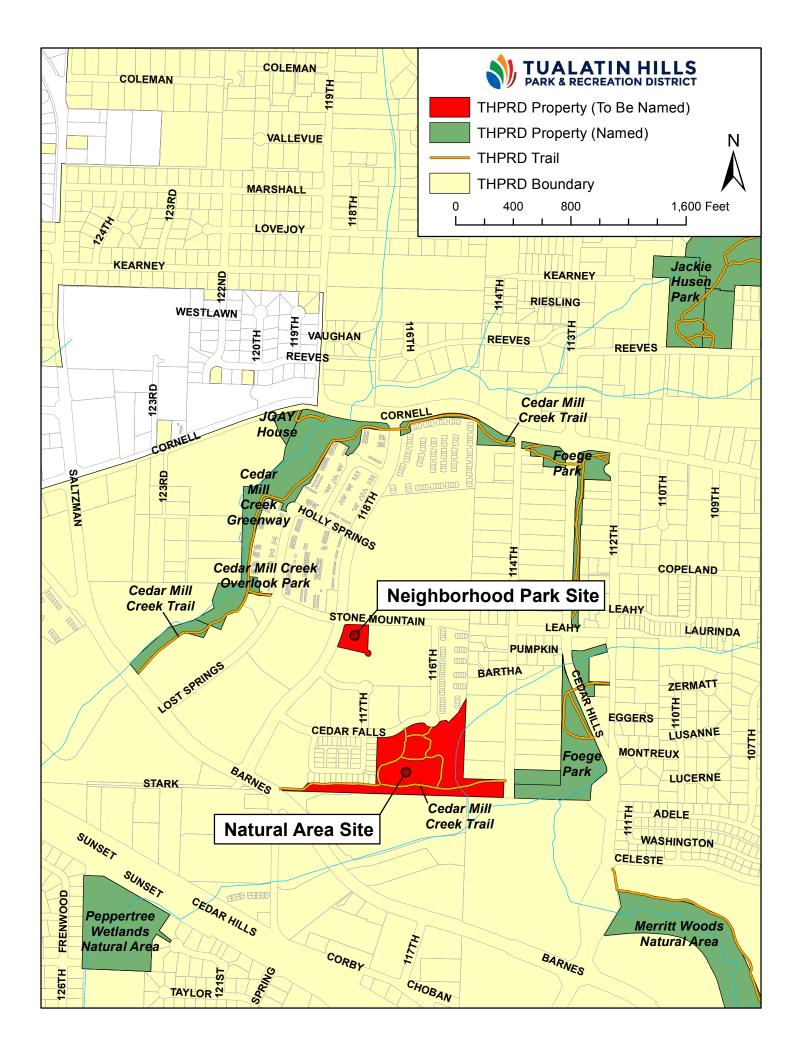

NOW THEREFORE, based on the foregoing, the Tualatin Hills Park & Recreation District hereby resolves as follows:

- Section 1. That the neighborhood park located in South Beaverton be named Steeplechase Park, that the neighborhood park located in the Cedar Mill area's Timberland Development be named Timberland Park, and that the natural area located in the Cedar Mill area's Timberland Development be named Cedar Mill Creek Greenway; and the general manager and staff are to take such steps as are deemed by them as necessary to effect said names in a timely manner.
- **Section 2.** That this resolution is and shall be effective from and after its passage by the board.

Approved and adopted on December 7, 2015 by the Tualatin Hills Park & Recreation District Board of Directors.

Management Report to the Board December 7, 2015

Communications & Outreach

Bob Wayt, Director of Communications & Outreach

- 1. Patrons interested in signing up for winter classes can view THPRD's winter/spring activities guide online (www.thprd.org) or in print at any center, the Administration Office or certain community sites, including Beaverton-area libraries. A postcard was mailed to Beaverton-area residents to inform them about the new guide and promote the broad array of classes offered by the park district. Registration starts December 12 for in-district residents, December 14 for those outside THPRD boundaries.
- 2. <u>The park district is again working to create a brighter holiday season for low-income children and families in the Beaverton area.</u> THPRD is collecting toys, clothing and other items for families identified by the Beaverton School District. THPRD is also taking donations for the Oregon Food Bank. The public is invited to join employees in this meaningful effort, which ends December 18.

Community Partnerships

Geoff Roach, Director of Community Partnerships

1. <u>Overview:</u> The project team has secured 74% of the Access for All capital revenues to be invested in park features and resources for people with disabilities (inclusive of revenues to support fundraising costs). An additional \$200,000 will be raised to support program and equipment costs. The project team aims to secure a minimum of 85% of Access for All capital fundraising by the time the construction contract bid award is made for the park in early 2016. Developments for October and November 2015 include:

A. Foundations

- i. New developments include receiving grant awards of \$20,000 from The Standard and \$5,000 from the Rotary Club of Beaverton.
- ii. Awaiting news on an additional grant submittal and expecting to know more by December.
- iii. Application submittal schedule for emerging foundations is understood.
- iv. Strategic cultivation of priority foundations is proceeding.
- B. Individual donor prospects
 - i. Calls and meetings with donor prospects continue.
 - ii. New donor, THPF board of trustee and Champions Council prospects are identified and cultivation is underway.

Aquatics

Sharon Hoffmeister, Superintendent of Aquatic Program Services

1. Pam's Party at Beaverton Swim Center has become very popular. This year marked the 9th year of Pam's Party, where the host, Pam Gross, rents the pool for her birthday party and instead of receiving gifts from friends, she raises money and collects food donations for the Oregon Food Bank and families at Vose Elementary School. Attendees enjoy swimming, AquaZumba and Deep Water Aerobics, cake and ice cream. At this year's event, 65 attendees donated \$2,000 and 100 cans/boxes of food for the food bank. In the past eight years, this event has raised \$15,000 in cash for the Oregon Food Bank and a ton or so of food donations, plus loads of toys for families of Vose Elementary School who are recipients of Southminster Presbyterian's Christmas Basket program.

2. Sunset Swim Center is partnering with the Stuhr Center to bring the Wellness on Wheels van to Sunset twice per week and offering Strength Focus class at the center for adults aged 55 and better. This has been well received by the water fitness participants at Sunset, where they are able to attend their water fitness class in the morning and then attend the land-based class conveniently located in the classroom at Sunset. Staff is currently working on marketing the program and hopefully expand the opportunities in the future.

Maintenance

Jon Campbell, Superintendent of Maintenance Operations

1. <u>The Greenway Park pedestrian foot bridge replacement project is complete.</u> The 40-year-old bridge located in the northwest section of the park was replaced with a wider and higher style bridge. The extra width will allow more room for users, and the additional 18" off the water will reduce the chance of water-to-wood contact which can lead to wood rot.

- 2. <u>Maintenance staff are preparing for inclement weather days.</u> Each of the Parks and Athletic Facilities staff has been assigned to a facility, and will report there on inclement weather days. The additional support will be used to get the buildings safe and ready to open for our patrons. Additional support may include snow or ice removal, helping with interior cleaning or projects.
- 3. <u>Maintenance will be replacing the signs at priority park and trail sites this winter.</u> Our goal is to continue implementing the conversion to the new signage master plan by replacing approximately 325 signs at 62 sites by the end of February. The selected parks and trails are high-use sites and have multiple signs to replace at each location.
- 4. THPRD and the Portland Rose Society entered into an agreement to create a memorial rose garden at Veterans Memorial Park. THPRD staff will prepare an existing landscape area in the south corner of the property (SW Watson Ave. & SW Washington Ave.) that will support rose bushes. Gardeners will be responsible for supplying, replacing and maintaining the rose bushes within the designated area. The American Legion Post 124 was consulted on the proposal and supports the creation of the rose garden.

Natural Resources & Trails Management

Bruce Barbarasch, Superintendent of Natural Resources & Trails Management

- 1. <u>Fanno Creek Greenway.</u> Staff have been removing weeds and improving wildlife habitat along the greenway in partnership with Clean Water Services. Staff are considering excavation options to better connect the creek to its historic floodplain.
- 2. <u>Oregon Field Guide.</u> Park district staff appeared in an Oregon Public Broadcasting television segment about the benefits and challenges of managing urban beavers.
- 3. Newt Day. Staff set up a variety of interesting and informative activities and displays about the science and nature of fall natural happenings. Due to intense rain, only about 220 people attended. This was about half the usual turn out.

4. <u>Pollinator Project Update.</u> The bond-funded pollinator project in the Rock Creek Greenway, east of Bethany Lake, recently received additional plantings and was seeded with native wildflowers. Staff are hopeful that we'll have a beautiful bloom in the spring.

Planning, Design & Development

Steve Gulgren, Superintendent of Design & Development Jeannine Rustad, Superintendent of Planning

- 1. Design & Development staff continue to work with Polygon Northwest Company for the completion of nearly seven acres of new parks and trails within Polygon's Bethany Creek Falls development in North Bethany. Per a system development charge agreement implemented in August 2013 between THPRD and Polygon, the park and trail amenities will include hard surface trails, a wood boardwalk, plaza areas, a picnic shelter, play areas, sport courts, site furnishings, landscape areas and overlooks for nature viewing. The parks within the Bethany Creek Falls development will be THPRD's first parks constructed in the North Bethany area, and the trails will ultimately connect to other future trails in the North Bethany area. Construction of the recreational improvements began in January 2015. To date, Polygon is nearly complete with phase 1 of the recreational improvements, including a neighborhood park, three smaller park nodes, and trail connections. Staff are working with Polygon to accept the improvements and expect to finalize the various property acquisitions in early 2016. Staff are currently completing plan reviews for the phase 2 improvements which should begin in spring of 2016.
- 2. <u>A neighborhood group appealed the Washington County Board of County Commission's adoption of Ordinance No. 802, which adopted the Bonny Slope West subarea into the Cedar Hills-Cedar Mill Community Plan.</u> Staff will monitor the appeal.
- 3. <u>Development proposals continue in the new urban areas.</u> West Hills had a pre-application conference on a proposed development in Bonny Slope West for approximately 233 single family homes on approximately 45 acres. West Hills has also filed an application with the City of Beaverton for a 384 lot Planned Unit Development on approximately 109 acres in South Cooper Mountain. The South Cooper Mountain development proposes 272 lots Single-Family Detached dwelling units; 110 Single-Family Attached Dwelling units; one lot for future Multi-Family development of ±340 units; and one lot for future residential development; trails; and a neighborhood park. A hearing on the application is scheduled for January 20, 2016.

Programs & Special Activities

Lisa Novak, Superintendent of Programs & Special Activities

- 1. A public meeting was held on November 16 at the Stuhr Center for the ADA Access Audit of facilities and property and the accompanying Transition Plan. Fourteen people were in attendance at the meeting. A slideshow and request for public comments on the ADA audit project are on the THPRD web site.
- 2. <u>Volunteer Services & Special Events staff are busy processing applications and conducting background checks for volunteer basketball coaches.</u> Staff has begun planning for the 2016 special event season.
- 3. <u>December is a month filled with special events at the Stuhr Center.</u> Deck the Halls brings Highland Park Middle School students to the Stuhr Center to decorate our holiday trees. The annual Holiday Concert will be held December 7 (1:30-3 pm) and features music and refreshments. Elsie Stuhr Day & Holiday Celebration will be held on December 18 (10 am-noon) and honors Elsie Stuhr, THPRD founder and lifelong physical fitness advocate.

Recreation

Eric Owens, Superintendent of Recreation

- 1. The first Cedar Hills Recreation Center 5K Family Fun Run and One Mile Walk had more than 250 participants. Family-friendly activities took place in the gymnasium and Beaverton Police officers were there with a motorcycle for kids to check out while parents took pictures. The bounce house, food and music added to the fun.
- 2. <u>Conestoga Recreation & Aquatic Center held their first Veterans Day pancake breakfast with over 30 in attendance.</u> The facility also offered drop-in programs and activities with 267 participants, which is a 42% increase over last year. In 2014, there were 174 participants. Programs were offered free-of-charge to veterans and their families with 46 participating.
- 3. <u>Garden Home Recreation Center youth sports program revenue and attendance has increased compared to 2014.</u> Youth sports programs have 160 registered participants this fall compared to 102 in fall of 2014, an increase of 56%.

Security Operations

Mike Janin, Superintendent of Security Operations

1. <u>In late November, 21 unclaimed bicycles recovered by Park Patrol in THPRD parks were delivered to the Washington County Bicycle Co-op.</u> The bicycles are to be reconditioned and donated to children within the county. Bicycles that are left in THPRD parks are typically stored in a safe place and logged. In addition, serial numbers are checked with the Beaverton Police in an attempt to locate the owners. If, after a period of several months, the bikes are still unclaimed, Park Patrol donates them to the co-op. This marks the second year in a row THPRD has done this during the holiday season.

Sports

Scott Brucker, Superintendent of Sports

1. Programming

- Middle School and 5th grade basketball teams were assigned practices beginning the week of November 30 and the pre-season jamborees are December 5 (5th grade) and December 12 (6th-8th grade). Games begin Saturday, January 9.
- Adult Basketball teams began play November 17. There are 29 teams this year, up four teams from 2014.
- The Bubble Soccer Tournament registration will close on December 3. This event is part of the teen and adventure recreation programming initiative.
- The 2015 Special Olympics Volleyball Tournament and the Oregon Youth Soccer Association/Timbers Presidents and Founders Cup were held on the HMT Complex the weekend of November 21-22.
- Summer 2015 tennis class participation had an 11% increase over summer 2014. The tennis instructional staff continues to work on changing the teaching philosophy from skills-based to game-based instruction.

Business Services

Heidi Starks, Deputy Chief Administrative Officer Nancy Hartman Noye, Human Resources Manager Mark Hokkanen, Risk & Contract Manager Seth Reeser, Operations Analysis Manager Phil Young, Information Services Manager

1. <u>THPRD hosted Live Resume on November 4 at the Tualatin Hills Nature Center.</u> Live Resume is produced by the employment arm of Incight and helps recruit and prepare individuals with

disabilities for re-entry to the employment market. Eighteen job candidates presented to 20 employers, including four THPRD hiring representatives. Staff plan to continue attending future Live Resume events and likely will host again next year. Staff identified two viable candidates for current available part-time positions.

2. Risk Management has completed its review and update of THPRD's insurance schedule for the upcoming 2016 renewal period with the help of our agent of record, Brown & Brown Northwest. In addition to receiving 10% in Best Practices discounts on our general liability, auto liability and property premiums, THPRD has qualified to receive longevity credit due to the district's outstanding five-year loss ratio. SDIS also guaranteed a maximum annual rate increase cap of 5% through the end of renewal period 2017. THPRD received \$26,739 in longevity credits during the 2015 renewal period.

KEY

Budget Estimate based on original budget - not started and/or no basis for change Deferred Some or all of Project has been eliminated to reduce overall capital costs for year.

Award Estimate based on Contract Award amount or quote price estimates

Complete Project completed - no additional estimated costs to complete.

Completed FY 12 Completed FY 11 Completed FY 10

Completed FY 09

MEMORANDUM

Date: November 9, 2015

To: Board of Directors

From: Keith Hobson, Director of Business and Facilities

Re: System Development Charge Report for September, 2015

The Board of Directors approved a resolution implementing the System Development Charge program on November 17, 1998. Below please find the various categories for SDC's, i.e., Single Family, Multiple Family and Non-residential Development. Also listed are the collection amounts for both the City of Beaverton and Washington County, and the 1.6% handling fee for collections through September 2015.

| Type of Dwelling Unit | Current SDC per Type of Dwelling Unit |
|-----------------------|--|
| Single Family | \$6,450.00 with 1.6% discount = \$6,346.80 |
| Multi-Family | \$4,824.00 with 1.6% discount = \$4,746.82 |
| Non-residential | \$167.00 with 1.6% discount = \$164.33 |

| erton Collection of SDCs | Receipts | Collection Fee | Total Revenue |
|--------------------------------------|--|---|--|
| Single Family Units | \$8,693,482.75 | \$229,515.75 | \$8,922,998.50 |
| Single Family Units at \$489.09 | \$7,336.35 | \$221.45 | \$7,557.80 |
| Multi-family Units | \$4,394,681.47 | \$110,665.30 | \$4,505,346.77 |
| Less Multi-family credits | (\$7,957.55) | (\$229.36) | (\$8,186.91) |
| Non-residential | \$605,423.19 | \$17,097.77 | \$622,520.96 |
| | \$13,692,966.21 | \$357,270.91 | \$14,050,237.12 |

Projected SDC balance as of June 30, 2015 per the budget was \$11,440,748. Actual balance was \$11,544,271. This fiscal year's projected total receipts per the budget are \$4,780,750.

THPRD advisory committees seek applicants

Groups advise district's board of directors on long-term planning issues

The Times

The Tualatin Hills Park & Recreation District is accept-

ing applications for positions on two of its three volunteer advisory committees,

The Parks & Facilities committee and the Program & Events committee work with the district's elected board of directors to provide guidance with long-term planning related to

the district's comprehensive plan.

The applications are due by Nov. 5. Applications are online at thord.org.

Advisory committee members are appointed to two- or three-year terms. The groups meet on the third Tuesday of each month, beginning Jan. 19.

The district is not currently seeking new members for its third committee, Nature & Trails.

The three advisory committees were formed during a restructuring of the volunteer groups earlier this year, which consolidated eight committees into three. Each committee includes a member of the board of directors.

"We want citizens to feel engaged and to be working on the most important items," Bruce Barbarasch, superintendent of natural resources and trails management, said in a news release.

"By bringing board members into the room with citizens, we feel we'll have a more focused group."

SPECIAL EVENTS

GREAT PUMPKIN HUNT — Enjoy Halloween-themed activities and decorations, as well as a flashlight pumpkin hunt outside, at the Garden Home Recreation Center, 7475 S.W. Oleson Rd., from 6 to 8 p.m. Friday, Oct. 23. Admission is \$10.

CONESTOGA HALLOWEEN FESTIVAL

— Stop by the trick-or-treat village, the chills and thrills carnival, the little goblin play zone, and the annual pool party for children ages 8 to 13 at the Conestoga Recreation & Aquatic Center in Beaverton, 9985 SW 125th Ave., from 6:30 to 8:30 p.m. Friday, Oct. 23. Costumes are encouraged. Admission is \$7.

PUMPKIN BOB — Take a souvenir from the "floating pumpkin patch" at Harman Swim Center, 7300 S.W. Scholls Ferry Rd., Beaverton, from 3 to 6 p.m. Saturday, Oct. 24. The Disney movie "Hocus Pocus" will also be shown. Admission is \$10 and pre-registration is required. To register, call 503-629-6314.

HALLOWEEN COSTUME PARTY AND

DANCE — Enjoy an afternoon of music, dancing, snacks and fun for visitors 55 and older at the Elsie Stuhr Center, 5550 S.W. Hall Blvd., Beaverton, from 1:30 to 3:30 p.m. Oct. 29. Prizes will be awarded for the best costumes. Admission is

Tualatin Hills Park & Recreation District provides gardening opportunities at 12 sites within the district. COURTERY THPRD

Community gardens

hy not give a local garden a whirl? Community gardens not only give you a chance to make something grow, but they also provide a chance to get outside and enjoy the fresh air in communities with no shortage of public, communal plots to tend. Some gardens are subject to fees and waiting lists.

Beaverton

A FESTIVAL FOR EVERYONE

■ PARTY IN THE PARK (503-645-6433 / thprd.org/events/partyin-thepark.cfm) — Held the last Saturday in July at the Howard M. Terpenning Recreation Complex, this is Beaverton's biggest summer event. It also features The Classic at T-Hills car and truck show, the Beaverton International Celebration and Family Triathlon.

It's playtime!

Local sites offer tons of options for both indoor and outdoor play

Beaverton/Portland

■ GEDAR HILLS INDOOR PLAY-GROUND — 11640 S.W. Park Way, Cedar Hills (503-629-6340). More indoor fun with toys and equipment for kids ages newborn to 6 years old. The indoor playground also is a place for kids to interact and work on social and motor skills. Call for fees.

■ GARDEN HOME INDOOR PLAY PARK — 7475 S.W. Oleson Road, Garden Home (503-629-6341). Open October through May, this indoor play park offers kids ages newborn to 6 years old a supervised gym filled with games, toys, playhouses and other activities to help kids develop communication, special awareness and motor skills, as well as options for kids with special needs. Parent participation is required. The play park is open Mondays, Wednesdays and Fridays from 9:30 to 11:30 a.m. Call for fees.

Beaverton

Diverse, energetic and growing

rom the outside looking in, Beaverton appears to be an endless suburb, a place where every road serves as a major arterial, and apartments exist in seemingly unending number, matched only by the city's many shops, restaurants and malls.

For its residents, however, Beaverton is much more than that.

Beaverton, home to more than 94,000 residents (it's Washington County's second-most populous city) is an incredibly diverse place with a long and proud history. It's home to: Beaverton High School (which will turn 100 years old in 2016) and five other large comprehensive high schools; one of the country's biggest and most influential park districts (Tualatin Hills Park & Recreation District); Oregon's "Silicon Forest" (including Tektronix, IBM and Intel): and shoe, apparel and sports equipment giant Nike.

It wasn't always quite so busy here, though. Beaverton, originally inhabited by tribes of Native Americans known as Atfalati, was settled in the 1840s by trappers and traders attracted by the abundant wildlife, forests, fertile soil and free government issued land.

The city was established with 400 people in 1868 as a shipping

— to the Beaverton Farmers Market.

Railroad (handling timber and produce), and rail has continued to play an outsize role in the city's development and growth. In September of 1998, the reintroduction of passenger rail to the city was accomplished through the completion of the Westside MAX line. The lightrail project, completed by the regional transit agency TriMet, links downtown Portland and

Hillsboro with three stations in

Beaverton, Additions to that

light-rail line, followed by the

completion of the WES com-

center on the Oregon Central

muter line in late 2008 (a 14.7-mile route linking Beaverton to Tigard, Tualatin and Wilsonville) prompted many planners to redefine Beaverton's previous status — based on its mass transit options and pedestrian traffic — as an auto-dependent suburh.

Beaverton's roots, however, long predate the railroad. Lawrence Hall made the first land claim in what is now Beaverton, taking up 640 acres in 1847, and Hall Boulevard is one of many parts of Beaverton named for its first pioneers. Though primarily

an agricultural town at its founding. Beaverton briefly flirted with the glamorous world of motion pictures during the silent-film era before its local film company went bankrupt in 1925

Today, Beaverton continues to be one of the fastest-growing cities in Oregon, with city planners working toward comprehensive reinventions of the Canyon Road corridor and the historic downtown core, commercial developments such as Progress Ridge on the south end, the more centralized Cedar Hills Crossing, and most recently, Timberland Town Center on Northwest Barnes Road.

Central Beaverton remains the city's core, featuring events such as the annual Celebration Parade and Fun Run, its hugely successful Farmers Market, and live music at First Fridays and Third Thursdays from spring through early fall.

Tualatin Hills Park & Recreation District: connecting people, parks and nature

Outdoor circuit training system is district's first

by Bill Evans, THPRD

THPRD has jumped on a fitness trend that provides Elsie Stuhr Center patrons and other area residents an opportunity to get fit while enjoying the outdoors.

In August, a Life Fitness "training station" was installed in the park behind the Stuhr Center (5550 SW Hall Blvd, Beaverton). The apparatus resembles a giant play structure, with eight stations to accommodate circuit training for anyone who wants to tone their physique in a pleasant outdoor setting.

The structure is the first of its kind in the park district.

"There's something to climb on, something to do pull-ups on, something to do abdominal exercises on; it covers a big footprint," said Lisa Novak, THPRD superintendent of Programs & Special Activities and Stuhr Center supervisor.

The apparatus, which opened to the public on Aug. 31, has visual instructions to help new users. Those who are savvy with technology can scan QR codes with their smartphone for detailed instructions.

Novak expects the new attraction to provide community benefit to older adults at the Stuhr Center and students at nearby Pilgrim Lutheran School, as well as park neighbors in the densely populated central Beaverton district.

"It's for everyone, and we're hoping it will be highly used," Novak said. "Our park gets a lot

Participants in a morning fitness class observe as Carolyn Strayer, Stuhr Center fitness instructor, demonstrates the new circuit training system outside the center. The equipment features eight stations offering a variety

of action."

Stuhr Center Program Coordinator Ann Satterfield says the installation has enabled the Stuhr Center to program several small

group fitness classes that use the structure, starting this fall.

"Our staff is excited to bring classes outside and add some playfulness to our fitness classes," Satterfield said. "The added dimension of environmental wellness only enhances our program offerings."

Novak said she initially saw the equipment demonstrated at a National Recreation and Parks Association conference last year. She suggested it to the Stuhr Center Advisory Committee for funding consideration.

"They thought it was a great idea," she said. So great, in fact, that they contributed \$16,500 of the \$41,500 total cost for equipment and installation.

elebration

THPRD plans holiday giving drive

Tualatin Hills Park & Recreation District will be collecting toys, clothing and other items for selected families within its Beaverton-area boundaries for the holiday season.

The park district will also collect food for the Oregon Food Bank.

The public is invited to join employees and support both efforts at THPRD facilities throughout the Beaverton area.

Donations of non-perishable food will be accepted from through Dec. 18 for the Oregon Food Bank-Washington County in Beaverton. As an incentive, THPRD will waive admission to any of its drop-in programs at participating recreation and aquatic centers during the three days after Thanksgiving (Nov. 27-29) with a donation of two non-perishable food items.

Starting Dec. 2 and running through Dec. 18, each THPRD center and administrative facility will have a giving tree, wreath or garland with "wishing stars" that specify a variety of wish-list items.

Donors will be able to take a wishing star and return with a new, unwrapped gift. All gifts are to be distributed to families that have been identified by the Beaverton School District.

Donations will be accepted at the following park district locations:

- Aloha Swim Center: 18650
 S.W. Kinnaman Road, Aloha
- Beaverton Swim Center:
 12850 S.W. Third St., Beaverton
- Cedar Hills Recreation Center: 11640 S.W. Park Way, Portland

THPRD LAUNCHES ANNUAL HOLIDAY GIVING PROGRAM

The Times

Tualatin Hills Park & Recreation District will again work to brighten the holiday season for low-income children and families in the Beaverton area.

THPRD will collect toys, clothing and other items for selected families living within its boundaries and also will collect food for the Oregon Food Bank.

The district invites patrons to join its employees in supporting both holiday giving efforts.

Donations of non-perishable food will be accepted from Nov. 25 through Dec. 18 and be passed on to the Oregon Food Bank's Washington County site in Beaverton.

As an incentive, THPRD will waive admission fees to any of its drop-in programs at participating recreation and aquatic centers during the three days after Thanksgiving (Nov. 27-29) with the donation of two non-perishable food items.

Examples of drop-in activities include open, lap or family swims, pickup basketball or volleyball, indoor track and cardio, and weight exercise rooms.

From Dec. 2-18, THPRD swim and recreation centers and administrative offices will have a giving tree, wreath or garland with "wishing stars" that specify a variety of wish list items.

Donors may take a wishing star and return with a new, unwrapped gift. All gifts will be distributed to families identified by the Beaverton School District.

"Many of our neighbors are hurting and that pain just becomes more acute during the holiday season," said Doug Menke, THPRD general manager. "We encourage everyone with the ability to give to make this time a little brighter for those in need."

For participating locations and other information, go to thprd.com.

State and federal priorities shifting Beaverton workshop toward community jobs for adults with disabilities

By ERIC APALATEGUI The Times

Sue O. has been coming to Jenkins Estate to pull weeds and rake leaves for about three decades as part of a partnership between Edwards Enterprises and **Tualatin Hills Park & Recreation** District.

Sue loves the serenity at Jenkins Estate and her wages have helped her - she has a significant learning disability - save enough money to take cherished trips to Disneyland and Las Vegas over the years.

"I like to pull some weeds," she said at one of their final work sessions at Jenkins before a winter break. "I like raking leaves."

Cindy H. - she also has a disability - has worked at Beavertonbased Edwards Enterprises even longer, starting when the organization's workshop first opened 43 years ago.

"I like all the jobs I'm involved in," she explained while running a damp dust cloth over used cables

for Edwards' contract with Com-

Due to major shifts now underway for employment programs like Edwards Enterprises, Sue Q. and many of her peers may get more opportunities to work at jobs in the community, jobs that would allow her to earn the minimum wage and save up money for living expenses and perhaps more trips.

But for Cindy H., who struggles with anxiety that would make a transition to the outside workforce difficult, those same changes in employment options for people with disabilities may threaten a job that has been a significant part of her life for more than four decades.

"I think I like working here better," Cindy said.

"She's a prime example of someone who wouldn't succeed in the community," agreed Joel Mosier, director of operations at Edwards Enterprises.

In September, Gov. Kate Brown and other state officials announced

Edwards: Employment shifts

From page A1

the settlement of a lawsuit brought by Disability Rights Oregon and another group on behalf of plaintiffs, including one Aloha woman they said earned 66 cents per hour at Edwards Enterprises.

With the settlement, state officials have pledged to put additional resources into what they call "integrated employment opportunities." Edwards calls them "enclaves" and sends small groups of clients to several job sites, including its 30-year contract with THPRD that is considered a plum job for clients.

But with shifts in funding moving toward community-based jobs, Jessica Leitner, executive director at parent organization Edwards Center, fears that many clients like Cindy might be out of a job if "sheltered workshops" like those provided by Edwards Enterprises lose funding in the transition.

"All of this is swirling around," said Leitner, still unsure how future funding from state and federal sources will impact their workshop or others that provide similar work programs, including Tualatin Valley Workshop in Hillsboro. "Like all controversial issues, there's multiple sides."

Leitner said "tough choices" may be ahead for both her organization and the clients who work there.

"We definitely do not want to close," she said. "We definitely believe in the work we

Mosier believes the 66-cent hourly wage figure quoted in the lawsuit is lower than actual wages the woman earned at his facility several years ago. But he acknowledged that many clients do earn just a few dollars an hour because they get paid a piece rate. That rate is based on prevailing wages for this type of work - about \$11 an hour - but all but a handful of Edwards clients aren't capable of cleaning enough cables or packaging enough gift bags in an hour to make minimum wage, Mosier

Based on a tour of the workshop Mosier gave this week, it's clear that clients at Edwards vary widely in productivity. Many are profoundly affected by development disabilities but seemed happy in their work, while others spent more time socializing with peers and visitors. Some also have significant medical issues, including seizure disorders and medication requirements.

"We have trained personnel that provide those additional supports," Mosier said.

Mosier said Edwards Enterprises provides jobs for about 130 clients. On a given weekday, 90 of those employees busy themselves in the workshop during the first shift, a smaller crew works a swing shift and about 20 go to job sites elsewhere. He said roughly half of those 130 could handle - and would likely thrive - in a communitybased job if Edwards had more placements, so signing up new employers is a major focus at the agency.

But dozens of their clients don't have the capacity to be productive outside the workshop, Mosier said.

"They at least have a paycheck" coming from the workshop, he said.

And they have companies

willing to pay them for cleaning or packaging their products.

"Most companies don't leave us because our rates are good and our accuracy is out of sight," Mosier said.

Sam J. has worked at Edwards Enterprises for 10 years, earning money he needs to buy clothes and electronics.

"Otherwise I wouldn't have money for rent or anything," he said.

If he can, Sam is one of the clients who could benefit from the state's promise to support more community-based jobs paying at least minimum wage.

"\$9.25 is pretty good for me," Sam said.

But Loretta W., busily folding science kit bags used in high schools, has no intention of working in the community after 20 years at Edwards Enterprises, where she earns money to help with food and rent.

Asked what else she would do if she couldn't come to the workshop, Loretta simply said:

"Nothing."

Beaverton Resource Guide, December 2015

Tualatin Hills Park & Recreation District: connecting people, parks and nature

Longtime THPRD-Edwards contract a benefit to both

by Amy Milshtein

The Edwards Center, based in Aloha, provides housing, social outlets and employment opportunities to people with developmental disabilities. For the past 30 years, THPRD has partnered with the center, employing a six-person landscape crew at the Jenkins Estate two days a week from April through November.

The program has proved successful and fulfilling for both parties.

"The crew picks weeds, spreads mulch, rakes leaves and scrubs out the greenhouses twice a season," says Mike Fontenot, Parks Maintenance coordinator.

This intensive, hands-on labor frees up full-time THPRD staff to work on other projects. It also means fewer fungicides and herbicides are needed throughout the 68-acre site on Cooper Mountain.

"Their work fits well with our integrated pest management program," Fontenot said.

Crews from the Edwards Center benefit in a multitude of ways. Because they are on fixed incomes, the wages they receive from THPRD allow for extras: a trip to the movies, a new shirt or, in one case, a rose for a girl friend. But this work offers more than just pocket money.

"It gives them a feeling of selfaccomplishment and self-worth," explains Georgia Lampros,

Taking a break from their landscaping duties at THPRD's Jenkins Estate, Edwards Center workers happily stand for a photo with park district staff.

marketing manager for Edwards Enterprises.

Edwards crew leader Marcie Dearing reports on the positive effects to her clients.

"One of the workers was having problems in her group home," she says. "Since starting here, she's had a big change in attitude, and she's lost quite a bit a weight!"

"We have had probably 40 different workers over the 30 years that have worked at the Jenkins Estate," Lampros said. "Even through there are only six at a time, we have always rotated in people who wanted the chance to work at that beautiful place.

"THPRD has changed lives for many, many people."

The district also delivers classes to a day program at Edwards' Aloha Community Center. They include naturefocused offerings from the Tualatin Hills Nature Center and visits from the Elsie Stuhr Center's Wellness on Wheels (WOW) van.

Rachel Gorman, specialized recreation and inclusion specialist at the Stuhr Center, hopes for more.

"If you don't have contact with this population, it can seem scary," Gorman says. "Programs like these normalize the experience and take away that 'scary unknown'."

Events at Elsie Stuhr Center

Veterans Day Celebration

Holiday Concert

Tuesday, December 8, 1:30-3pm

EVENT

(Manzanita)

Come and enjoy the season with a variety of musical entertainment with the Children's Bell Choir from Pilgrim Lutheran Church, a sing-a-long of your favorite holiday carols with our own Stuhr Cabaret Chorus and harp musician, from Annie Driscoll, of the Heritage Harp Center. Light refreshments will be served. (Free)

End of the Year Formal Dance Thursday, December 31, 1:30-3:30p (Manznita)

Say goodbye to 2015 in the best way...dance it away! Have fun dressing up and enjoy the live 7-piece band, hors d' oeuvres, and a toast to celebrate the New Year! \$5.00 per person at the door.

Elsie Stuhr Center, 5550 SW Hall Blvd, Beaverton, 503-629-6342
